Overview & Current Events

Johnson Outdoors is a leading company in the outdoor recreation industry. The company operates through several well-known brands that cater to various aspects of outdoor activities. Old Town Canoes & Kayaks, for example, is renowned for its durable and high-performance watercraft. Minn Kota is a leader in electric trolling motors and boat accessories. Humminbird offers advanced marine electronics, including fish finders and GPS systems. Jetboil has a strong presence in efficient portable cooking systems. Its high-quality products are designed for fishing, boating, and camping enthusiasts. The company generated almost $593 million in revenues last year, and is based in Racine, Wisconsin.

On May 2nd, 2025, Johnson Outdoors reported its fiscal Q2 results for the period ending March 28th, 2025. Note that the company's fiscal year ends every September.

For the quarter, revenues came in at $168.3 million, down 4.3% compared to last year. This result reflected a continued soft market environment. Specifically, the Fishing segment's sales fell 3%, due to ongoing macroeconomic pressures. Camping & Watercraft Recreation segment sales were down 12%, with growth in Jetboil partially offset by declines in watercraft and the exit of the Eureka! brand. The Diving segment's sales declined 7%, driven by softening demand and broader economic uncertainty across all regions.

Gross margins were roughly flat, inching up slightly from 34.9% to 35.0%. The company posted a net income of $2.3 million, or $0.22 per share, compared to $2.2 million, or $0.21 per share last year. While management highlighted innovation gains in products like Humminbird and Jetboil, they continue to face headwinds from tariffs and broader consumer softness. The company remains in a strong financial position with $94.0 million in cash and no debt, but continues to take a cautious stance on the fiscal 2025 outlook. We have assumed an EPS power of $2.50 in our estimates, though the company may just break even this year.

Growth on a Per-Share Basis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
EPS	$1.07	$1.34	$3.51	$4.05	$5.11	$5.47	$8.21	$4.37	$1.90	($2.60)	***$0.01***	***$2.50***
DPS	$0.31	$0.33	$0.37	$0.48	$0.59	$0.72	$0.93	$1.21	$1.26	$1.32	***$1.32***	***$1.46***
Shares[2]	9.7	9.9	9.9	10..0	10.0	10.1	10.1	10.2	10.2	10.2	***10.3***	***11.0***

Over the past decade, Johnson Outdoors has navigated a dynamic market landscape, including multiple successes and challenges. One significant period of increased profitability took place in 2021, during the COVID-19 pandemic. The surge in outdoor activities as people sought socially distant recreation led to a spike in demand for outdoor equipment, benefiting its key segments like kayaks and marine electronics.

That said, Johnson Outdoors has historically faced challenges that have constrained long-term profitability, including in its recent results. In 2018, the company struggled with higher costs and supply chain disruptions, which hurt its margins. The integration of acquired brands, such as the purchase of the kayak brand, Old Town, in 2017, introduced complexities

in aligning operations and supply chains. The company's investments in innovation and new product development, while crucial for growth, have also boosted R&D expenditures, affecting profitability in the short term.

Also, rising raw material costs and operational inefficiencies have continued to pose challenges, evident in varying profit margins despite overall revenue growth. Post-COVID, the company's profitability has plummeted due to the significant drop in demand for Johnson Outdoors' products as the socially distant recreation trend waned, while the cost-increasing factors have stayed. We expect no growth from our EPS power estimate due to high uncertainty regarding the business.

About the dividend, the company has increased it for 11 consecutive years, which is impressive, given the volatile nature of its earnings. We believe the dividend will continue to grow moving forward, though by a much softer rate, which we have set at 2%. This is because management will likely seek to maintain a healthy payout ratio from here.

Valuation Analysis

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Now	2030
Avg. P/E	24.8	20.1	13.2	17.9	14.1	13.5	13.4	18.5	30.7	---	***9.7***	***10.0***
Avg. Yld.	1.2%	1.2%	0.8%	0.7%	0.8%	1.0%	0.8%	1.5%	2.2%	2.8%	***5.4%***	***5.8%***

Johnson Outdoors' valuation has fluctuated significantly over the years, mirroring its volatile earnings. The stock is now trading at 9.7 times its potential earnings under "normal" conditions. We believe this conservative multiple is somewhat fair for the company given the recent challenges and the risks attached to the company's cyclical business model. The stock's yield has risen significantly, driven by a declining stock price. It now better reflects the underlying risks attached.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2030
Payout	29%	25%	11%	12%	12%	13%	11%	28%	66%	---	***53%***	***58%***

Johnson Outdoors' key quality lies in the strength of its brands, such as Humminbird, Minn Kota, and Old Town, which are known for their quality and durability. This has fostered customer loyalty, especially in marine electronics and watercraft. However, the nature of the outdoor recreation market means that Johnson Outdoors faces cyclical demand, which can be influenced by broader economic conditions. That said, the company has shown some recession resiliency. During economic downturns, while discretionary spending on high-end outdoor equipment may decline, the company benefits from its diverse product range, which includes lower-cost items that remain accessible to consumers even in tougher times. We also believe the dividend remains safe for now, and praise the fact that Jonson Outdoors has a net cash position of $94 million, which currently equals over a third of its market cap.

Final Thoughts & Recommendation

Shares of Johnson Outdoors have been on a consistent decline from its 2021 highs. We don't believe the company has noteworthy prospects ahead, as returns from the yield could be offset by a potential valuation headwind. EPS growth remains highly speculative and we don't trust the dividend. We rate JOUT a hold due to its dividend track record.
