Overview & Current Events

Franco-Nevada Corporation (FNV) is a royalty and stream company focused on gold and other precious metals, and oil and gas. The company's cash-flow producing portfolio is actively managed and aims to maintain over 80% of revenue from precious metals. The business model is to grow and build the portfolio of royalties and streams, thus it does not operate mines or conduct exploration. This lean business model allows for the $49 billion market cap company to employ only 38 full-time employees. The corporation is still exposed to commodity price fluctuations in the short-term but utilizes the commodity down cycles to opportunistically make investments. The corporation was founded in 1983 as a mining royalty business. In 2002, it was acquired by Newmont Mining for $2.5 billion. On December 20, 2007, the original FNV team repurchased the royalty portfolio for $1.2 billion by launching an IPO with the newly incorporated Franco-Nevada. The corporation is headquartered in Toronto and trades on both the Toronto and New York Stock Exchanges under the ticker symbol FNV. FNV has raised its dividend for 19 consecutive years.

Franco-Nevada took a $1.2 billion impairment loss on Cobre Panama in 2023 due to the production halt since November 2023 as a result of a mining moratorium. This is significant because Cobre Panama represented 20% of 2023 revenue. A new president of Panama was inaugurated into office on July 1st, 2024. He announced the government will conduct a strict environmental audit of the Cobre Panama mine, and so far, has authorized the restart of the power station, which occurred in Q4 2025. In January 2026, export of about 70K tonnes of copper ore was authorized, but approvals are pending and processing should take around one year.

On March 10th, 2026, Franco-Nevada reported fourth quarter 2025 results. Gold Equivalent Ounces (GEOs) sold increased 18% compared to fourth quarter 2024. Revenue soared 86% year-over-year to $597 million, which was a new record. Adjusted net income jumped 94% to $356 million, resulting in adjusted net income per share of $1.85. The company expects 2026 GEO sales of 510,000 to 570,000 oz, comprised of 90% precious metal assets and 10% from diversified assets.

Growth on a Per-Share Basis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Adj. NIPS	$0.94	$1.08	$1.17	$1.82	$2.71	$3.52	$3.64	$3.56	$3.21	$5.58	***$8.73***	***$11.68***
DPS	$0.87	$0.91	$0.95	$0.99	$1.03	$1.16	$1.28	$1.36	$1.44	$1.52	***$1.76***	***$2.59***
Shares[2]	178.5	185.9	186.7	189.4	191.0	191.5	191.9	192.3	192.5	193.2	***193.6***	***200.0***

Franco-Nevada measures its growth using adjusted net income per share, which adjusts for impairment charges and reversals, foreign exchange gains and losses and other income and expenses. For a company involved in commodities, net income has remained consistent and stable as Franco-Nevada has limited exposure to many of the risks operating companies may face. Management can focus on growth rather than operational or development issues.

The company has a long runway of growth still ahead of it. Its new metals stream and natural gas royalties have immediately added cash flow. Further portfolio additions would likely do the same, though it is not baked into its

Updated March 19th, 2026 by Quinn Mohammed

immediate growth outlook. GEOs sold are expected to increase over the next five years. The existing portfolio is expected to produce roughly 555,000 to 615,000 total GEOs in 2030. This outlook assumes new mines at Cascabel, Copper World, Eskay Creek, Stibnite Gold and Rebecca-Roe, expansions at Detour Lake, Magino and Castle Mountain Phase 2, and the development of Coroccohuayco. The number of GEOs could come in 150K to 175K GEOs higher if Cobre Panama resumes production at full capacity.

We expect the company's adjusted net income per share to increase by 6.0% annually through 2031. In the past nine and five years, FNV grew adjusted net income per share at a 21.9% and 15.5% CAGR, respectively.

Valuation Analysis

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Now	2031
Avg. P/ANI	69.4	67.6	60.2	46.6	50.0	39.1	37.7	38.8	37.3	30.9	***26.3***	***34.0***
Avg. Yld.	1.3%	1.2%	1.3%	1.1%	0.8%	0.8%	0.9%	1.0%	1.2%	0.9%	***0.7%***	***0.7%***

Franco-Nevada has traded at a price-to-adjusted-net-income ratio of 47.8 on average in the past ten years, and 36.8 in the past five years. While shares trade at 26.3 times estimated 2026 adjusted net income, we believe fair value can be as high as 34.0 times, which implies a valuation tailwind. The dividend yield is likely to remain around 1%.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2031
Payout	93%	84%	81%	54%	38%	33%	35%	38%	45%	27%	***20%***	***22%***

The business model Franco-Nevada has embraced is a competitive advantage, as it has gained upside exposure to commodity markets and the commodity cycle without many of the downsides. Furthermore, FNV demonstrates a robust performance relative to its industry peers, achieving an adjusted EBITDA margin of 91% for 2025 (up from 86% in 2024). Even more, the corporation has no debt and $3.1 billion in available capital on December 31, 2025. The company is diversified geographically across the entire world, with the bulk of GEOs in Latin America, then Canada and America, and the rest of the world. They are also diversified in metals (gold, silver, PGM) and oil and gas (oil, gas, NGL). Franco-Nevada as we know it was born during the great recession, and adjusted net income fell 60% between 2008-2009, but then returned and surpassed prior levels within one year.

Final Thoughts & Recommendation

Franco-Nevada is a leaner and more risk-averse play on the commodity price upside than directly owning mining or energy companies. This safe approach has led to 19 consecutive dividend raises since the corporation IPOd, and we see this continuing. FNV stock trades at 77% of our fair value estimate, providing a strong margin of safety. Given 12.2% in expected annualized total returns, FNV earns a hold rating, and we remark that it is a high-quality business that often trades at a premium.
