Overview \& Current Events
IBM is a global information technology company that provides integrated enterprise solutions for software, hardware, and services. IBM's focus is running mission critical systems for large, multi-national customers and governments. IBM typically provides end-to-end solutions. IBM spun off Kyndryl, its managed infrastructure business, on November $3^{\text {rd }}$, 2021, but is still one of the largest IT services companies in the world. The company now has four business segments: Software, Consulting, Infrastructure, and Financing. IBM had annual revenue of $\sim \$ 57.4 \mathrm{~B}$ in 2021 (not including Kyndryl). IBM reported solid results for Q3 2022 on October 19 ${ }^{\text {th }}$, 2022. Companywide revenue increased $6 \%$ to $\$ 17,739 \mathrm{M}$ from $\$ 16,339 \mathrm{M}$ while diluted adjusted earnings per share fell ( $-2 \%$ ) to $\$ 1.81$ from $\$ 1.84$ on a year-over-year basis. Diluted GAAP earnings per share declined to a loss of ( $\$ 3.55$ ) in the quarter from $\$ 1.14$ in the prior year on pension settlement charges. Also, IBM's earnings are being impacted by the strong US dollar, but growth was strong in constant currency. Revenue for Software increased $7 \%$ to $\$ 5,811 \mathrm{M}$ from $\$ 5,406 \mathrm{M}$ in comparable quarters due to $8 \%$ growth in Hybrid Platform \& Solutions and a $33 \%$ increase in Transaction Processing. Revenue was up $12 \%$ for RedHat, ( $-2 \%$ ) for Automation, ( $-1 \%$ ) for Data \& AI, and ( $-1 \%$ ) for Security. Consulting revenue increased $5.4 \%$ to $\$ 4,700 \mathrm{M}$ from $\$ 4,457 \mathrm{M}$ due to 5\% rise in Business Transformation, 6\% growth in Technology Consulting, and 6\% growth in Application Operations. The book-to-bill ratio is a healthy 1.05X. Revenue for Infrastructure was up $14.8 \%$ at $\$ 3,352 \mathrm{M}$ from $\$ 2,921 \mathrm{M}$ due to a $33 \%$ rise in Hybrid Infrastructure and ( $-3 \%$ ) decline in Infrastructure Support. Z Systems had $88 \%$ growth.
IBM completed its spinoff of Kyndryl at end of 2021, which was reported as discontinued operations.
IBM continues its higher pace of acquisitions with Envizi, Sentaca, Neudesic, Randori, Databand.ai, and Dialexa expanding its expertise and offerings. It is planning to sell Watson Health for $\$ 1$ billion.
IBM forecasts revenue growth in the high-single-digits and free cash flow of about \$10 billion in 2022.

IBM's core operations are profitable. But IBM had difficulty generating growth in the past several years due to the transition to cloud and SaaS in the IT industry and IBM's late emphasis on this market. However, IBM is now focusing on cloud and SaaS and intends to be a major player in hybrid cloud as illustrated by the Red Hat and many smaller acquisitions. Earnings in 2020 were impacted by COVID-19 and non-operating pre-tax charges for business simplification. The company spun off Kyndryl in 2021, which had declining revenue and was not profitable. IBM has reorganized the remaining businesses into three operating segments. Due to the Red Hat acquisition and impact of the coronavirus we are not expecting any share buybacks in 2022 as the company deleverages. The company is increasing the dividend but at a very low rate of less than $1 \%$ annually.

IBM's stock price is up since our last report on good results. We have maintained our earnings estimate for 2022. Our fair value estimate is now $\$ 118$ using a fair value multiple of 12 X . We increased the multiple due to rising software revenue. Our five-year price target is now $\$ 143$ share. The current dividend yield is still well above the market average.

Safety, Quality, Competitive Advantage, \& Recession Resiliency

| Year | $\mathbf{2 0 1 2}$ | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ | $\mathbf{2 0 1 8}$ | $\mathbf{2 0 1 9}$ | $\mathbf{2 0 2 0}$ | $\mathbf{2 0 2 1}$ | $\mathbf{2 0 2 1}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Payout | $23 \%$ | $25 \%$ | $27 \%$ | $37 \%$ | $44 \%$ | $43 \%$ | $45 \%$ | $50 \%$ | $75 \%$ | $83 \%$ | $\mathbf{6 7 \%}$ |

IBM's competitive strength is its brand, entrenched customer relations and extensive patent portfolio. IBM is also the market leader in mainframe computers where it has $90 \%$ of the market and little competition. IBM is a different company after the Kyndryl spin off, but it should still be recession resistant. The nature of mission critical IT enterprise systems and software makes this unlikely to change in the near future. IBM has a leading position in networking, global cellular connections, credit card transaction processing, airlines, banks, hotels, retail, etc. However, the company does face risks in that many of its competitors have emphasized the cloud earlier and are growing faster.
IBM is deleveraging after increasing debt for acquiring Red Hat. IBM divides its debt into core debt and financing debt. Debt is down $\sim \$ 22 \mathrm{~B}+$ since the acquisition and core debt is now $\$ 39.7 \mathrm{~B}$ and is offset by $\$ 9.7 \mathrm{~B}$ in cash, equivalents, and securities. Global Financing debt is $\$ 11.2 \mathrm{~B}$ and it is decreasing due to winding down of OEM financing.

## Final Thoughts \& Recommendation

At present we are forecasting a $5.6 \%$ annualized total return for the next five years from a dividend yield of 4.9\%, 4\% EPS growth, and ( $-2.7 \%$ ) from P/E contraction. IBM is now primarily a software and consulting company focusing on the hybrid cloud. IBM should benefit moving forward as software sales are higher margin. The current dividend yield is attractive, and earnings coverage has improved since 2021. At the current price, we rate this stock a hold.
