Overview & Current Events

W.W. Grainger, headquartered in Lake Forest, IL, is one of the world's largest business-to-business distributors of maintenance, repair, and operations ("MRO") supplies. The company was founded in 1927 and generated sales of \$15.2 billion in 2022. Grainger trades with a market capitalization of \$34.8 billion and is a member of the Dividend Aristocrats Index and the Dividend Kings Index.

On April 26th, 2023, W.W. Grainger raised its dividend by 8% to a quarterly rate of \$1.86.

On April 27nd, 2023, W.W. Grainger reported its Q1 results for the period ending March 31st, 2023. Revenues came in at \$4.1 billion, up 12.2% on a reported and up 14.5% on a daily, constant currency basis (adjusted) compared to last year. Results were driven primarily by the High-Touch Solutions segment achieving adjusted sales growth of 14.5% due to both strong price realization and continued volume gains across all geographies. The Endless Assortment segment also performed well, with its sales growing by 14% on an adjusted basis, driven by core small business growth with new and repeat customers.

Net income equaled \$508 million, a 31.9% increase compared to Q1-2022. Net income was boosted by a 200 basis point expansion in both the gross and operating margin year-over-year. This resulted from strong price realization, freight efficiencies, and favorable business unit mix. A lower share count further boosted the per-share result amid Grainger's stock buybacks. Earnings-per-share came in at \$9.61, 36% higher year-over-year.

For fiscal 2023, the company still expects to post \$16.2 billion to \$16.8 billion in sales. However, they raised their profitability outlook, expecting earnings-per-share to land between \$34.25 and \$36.75 (up from \$32.00 to \$34.50 previously). We have utilized the midpoint of the updated range in our forecast, implying year-over-year growth of 18%.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$11.52	\$12.26	\$11.94	\$11.58	\$11.46	\$16.70	\$17.29	\$16.18	\$19.84	\$30.06	\$35.50	\$48.64
DPS	\$3.59	\$4.17	\$4.59	\$4.83	\$5.06	\$5.36	\$5.68	\$5.94	\$6.39	\$6.78	\$7.44	\$9.97
Shares¹	68.8	67.4	62	58.8	56.3	55.9	53.7	53.7	52.2	51.1	50.2	48.0

Grainger had grown its earnings-per-share at an 11.2% average annual compound rate between 2013 and 2022. This result was driven by ~5.5% annual revenue growth, an expanding profit margin, and a share count that has been reduced by an average of -3.3% per year. Results stalled in 2019 and 2020 as the company came off a significantly lower tax rate for 2018 and dealt with the COVID-19 pandemic in 2020. Still, results have held up reasonably well in lesser times and surged notably in 2022. Grainger's strategic shift of lowering its pricing, thereby creating higher demand, and growing its revenues, seems to have worked well.

Over the intermediate period, profit growth will be driven not only by rising revenue but also by a reduction in the company's share count. The company plans to repurchase about \$550 to \$700 million of its stock during 2023, or roughly 1.5% -2.0% of its outstanding shares at its current market cap.

W.W. Grainger Inc. (GWW)

Updated April 28th, 2023, by Nikolaos Sismanis

Moreover, we are encouraged by recent performance, along with the company continuing its 52-year dividend growth streak and providing strong guidance. We are forecasting \$35.50 in earnings-per-share this year (the midpoint of management’s guidance) to go along with a 6.5% medium-term growth rate. We also forecast dividends per share to grow on average by 6% through 2028.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	21.5	20.3	19.0	19.1	17.7	17.9	17	20.4	22.0	18.7	19.5	18.0
Avg. Yld.	1.4%	1.7%	2.0%	2.2%	2.5%	1.8%	1.9%	1.8%	1.5%	1.2%	1.1%	1.1%

Over the past decade, shares of Grainger have traded hands with an average P/E ratio of 20.2 times earnings. We are using 18 times earnings as a fair value baseline, taking into consideration a slightly slower expected growth rate and a rising interest rates environment. With shares presently trading above our fair multiple, we believe there is potential for a modest valuation headwind. Meanwhile, the dividend yield is not especially compelling, but the dividend-per-share’s propensity to grow over time is noteworthy.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	31%	34%	38%	42%	44%	32%	33%	37%	32%	23%	21%	20%

Grainger has an excellent dividend growth track record. Despite increasing its payout every year for over half a century, the company’s dividend payout ratio has not risen to a high level, as it remained below 50% throughout the last decade. The low dividend payout ratio and a very long dividend growth track record, coupled with a relatively stable recession performance, make us believe that Grainger’s dividend is safe.

The services Grainger provides are essential for other businesses. This makes the business resilient to recessions and economic downturns. During the last recession Grainger posted earnings-per-share of \$6.09, \$5.25 and \$6.81 during the 2008 through 2010 stretch. In 2020, results proved to be similarly durable.

Final Thoughts & Recommendation

Grainger is a good example of a company in an unspectacular industry that has achieved a strong earnings and dividend growth track record, nevertheless. Total return potential comes in at 5.8% per year, stemming from 6.5% growth and a 1.1% starting dividend yield, offset by the potential of a 1.6% annual valuation headwind. Even though the total return proposition does not appear compelling, the resilience of the company, its low payout ratio, and its impressive dividend growth streak are noteworthy. Shares earn a hold rating.
