Overview & Current Events

Deutsche Telekom is the largest telecommunications company in Europe and the second-largest telecommunications company in the world. The company operates through the following segments: Germany, United States, Europe, and System Solutions. The German segment provides fixed-network and mobile solutions as well as wholesale telecommunications services. The United States segment includes T-Mobile, while Europe encompasses all fixed-network and mobile operations outside Germany. The Systems Solution segment provides information and communication technology systems. Deutsche Telekom has over 160 million mobile customers, 29 million fixed-network lines, and more than 18 million broadband lines. United States investors can initiate an ownership stake in Deutsche Telekom through American Depositary Receipts that trade over-the-counter under the ticker DTEGY with a market capitalization of US\$80 billion.

In early November, Deutsche Telekom reported (11/8/18) financial results for the third quarter of fiscal 2018. In the quarter, net revenues decreased 0.7% but currency-adjusted net revenues rose 2.8%. The U.S. segment maintained its positive momentum, with 6.7% revenue growth in USD but the strengthening of the dollar resulted in a 0.7% decline of the segment's revenue in euros. Staff-related measures caused a decrease in EBIT but losses from financial activities plunged from €3.7 billion to €2.1 billion and resulted in a €0.5 billion increase in earnings, from €2.1 to €2.6 billion.

Deutsche Telekom's earnings growth has been somewhat volatile, partly due to the spinoff of T-Mobile in 2012. Even including the impact of this spinoff, the company grew its earnings-per-share by about 6% per year over the last decade. We believe that this level of growth is likely to continue for the foreseeable future. Due to lackluster performance and a markedly strong dollar, we have lowered our earnings-per-share estimate for this year, from \$1.10 to \$0.95.

Valuation Analysis

Year	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	Now	2023
Avg. P/E	35.1	20.0	14.4	14.9	17.2	20.4	20.3	23.1	27.7	20.2	17.9	15.0
Avg. Yld.	7.2%	8.1%	7.9%	7.2%	7.7%	7.2%	4.2%	3.2%	3.7%	3.6%	4.5%	5.3%

Deutsche Telekom's P/E valuation has been volatile over the last decade, ranging from as high as 35 to as low as 14, with an average value of 21.3. We believe this historical valuation multiple is far too rich for a company like Deutsche Telekom. Given comparable valuations in the domestic telecommunications industry, our target for Deutsche Telekom's fair value is a price-to-earnings ratio of 15. The stock is trading at an earnings multiple of 17.9 today. If it approaches our fair estimate of 15 over the next five years, it will incur a 3.5% annualized drag.

Deutsche Telekom's gross profits to assets ratio is far better than many other sectors of the stock market, but it is actually quite weak relative to its other major global peer AT&T. For context, AT&T has reported a gross profit to assets ratio above 50% throughout the last decade. Still, Deutsche Telekom appears to be a high-quality investment. The company has undisputed leadership within the European telecommunications market and is investing aggressively to maintain this position. Last year, the company invested a record €12.1 billion (US\$14.9 billion) to build out its telecommunications network. Deutsche Telekom also has an investment-grade BBB+ credit rating from Standard & Poor's, which allows it to raise capital at attractive rates to continue investing in its future as a business.

Final Thoughts & Recommendation

Deutsche Telekom provides exactly what most investors in the telecommunications sector are looking for: stability, cash flow, and a high dividend payout. Moreover, the company's global business model combined with its ~64% ownership of T-Mobile gives it exposure to telecommunications markets worldwide. In addition, the stock has been trading in a narrow range, between \$14 and \$20, in the last five years. This means that most returns usually come from its generous dividend. This feature also makes it easier to hold the stock for the long term, without emotional pressure to sell during market sell-offs. At its current price, Deutsche Telekom is likely to offer a 7.0% average annual return over the next five years, but it is still not the most compelling investment opportunity in its sector (AT&T has likely earned that title). As a result, the stock fails to earn a buy recommendation from Sure Dividend at current prices, although it remains a strong hold for existing stockholders.
