Overview & Current Events

AvalonBay Communities (AVB) is a \$27 billion multifamily REIT that owns a portfolio of 270 apartment communities with over 73,500 units and is developing 18 additional properties with over 7,200 units. The company's strategy consists of owning top-tier properties in the major metropolitan areas of New England, New York/New Jersey, Washington D.C., California, and the Pacific Northwest. It was formed by the 1998 merger of Avalon Properties with Bay Apartment Communities and has raised its dividend for seven consecutive years.

AVB reported solid Q4 results, FY18 results, and FY19 guidance on 2/4/19. Core portfolio occupancy remained unchanged at 96.1% and FFO and NOI growth came in at 2.7% for the quarter. This was in-line with operating expense increases, implying that the portfolio's earnings power is keeping up with inflation, but not outperforming it either, and down considerably from previous quarters as FY18 core FFO/share growth was 4.4%. 2019 guidance projects a continuation of this slowing growth momentum, with core FFO/share growth projected to be 3.3% and NOI and expense growth hovering around 3%. On a positive growth note, management is guiding for between \$850 million and \$1.05 billion in development starts this year, up significantly from the \$720 million they put into development starts in 2018.

Growth on a Per-Share Basis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
FFO	\$3.89	\$3.98	\$4.64	\$5.43	\$6.23	\$6.78	\$7.55	\$8.19	\$8.62	\$9.00	\$9.30	\$10.78
DPS	\$3.57	\$3.57	\$3.57	\$3.88	\$4.28	\$4.64	\$5.00	\$5.40	\$5.68	\$5.88	\$6.08	\$7.22
Shares	81	85	91	98	127	131	135	137	138	138	138	140

Over the past decade, AVB generated very impressive annualized Core FFO/share growth of ~9.75% thanks to its growing scale and strong rental rate growth. However, this growth rate has slowed dramatically in recent years, coming in at 5.5% in 2017 and just 4.4% in 2018. 2019 should see this slowdown continue, with a 3.3% growth rate projected. This is due to the law of large numbers as well as rising margin pressures, thanks to inflation and plenty of competing new supply hitting key markets. AVB also faces the threat of future rent control legislation in its West-Coast markets, as this was already on the ballot in the 2018 mid-term elections. On the plus side, development spending is projected to rise in 2019 for AVB and the NOI and OpEx comps are expected to be steady, implying we are near a trough in the growth rate. As a result, we are projecting a 3% growth rate over the next five years. We expect the dividend to slightly outgrow FFO/share during this time span due to the low 65% payout ratio and management's trend for doing so in recent years as well. As a result, we think the dividend will grow at about a 3.5% clip.

Valuation Analysis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	Now	2024
Avg. P/FFO	21.4	28.5	28.9	25.3	18.2	19.0	24.2	21.8	20.7	19.2	21.2	18.0
Avg. Yld.	4.3%	3.2%	2.2%	2.8%	3.6%	2.8%	2.7%	3.0%	3.2%	3.4%	3.1%	3.7%

The recent valuation multiple has hovered around 20x Core FFO/share and the dividend yield has ranged between 2.7% and 3.4%. However, as discussed previously, the abundant new supply reaching markets combined with increasing inflationary pressures on margins - not to mention a challenging acquisition climate due to compressed cap rates - will

lead to continued slowing growth for AVB. Therefore, the stock will warrant a low valuation multiple and a higher dividend yield. Therefore, we expect a fairly steep contraction in the valuation multiple towards 18x. This number is not without precedent either as it was seen back in 2013-2014 during a period in which the company's growth rate slowed.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
Payout	91.8%	89.7%	76.9%	71.5%	68.7%	68.4%	66.2%	65.9%	65.9%	65.3%	65.4%	67.0%

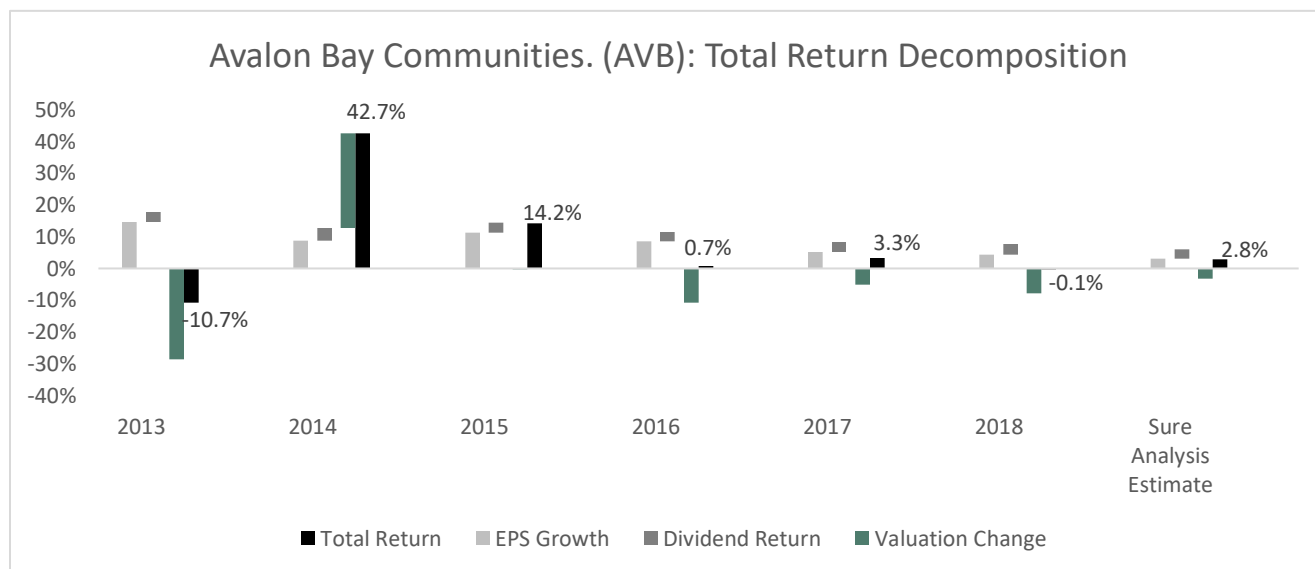

AVB significantly outperformed the S&P 500 during the Great Recession due to the defensive nature of the multifamily sector. However, it still experienced a sizable decline in FFO/share (from \$4.61 in 2007 down to a low of \$3.89 in 2009). Additionally, multifamily apartments lack a strong competitive advantage due to the ease of creating new supply as well as the alternative sources of affordable housing in large metropolitan areas in which AVB operates. Given that, AVB's investments are essentially plays on the economic strength of its core markets. Furthermore, the fact that most of its assets are high-quality "A" apartment units makes it even more levered to the state of the economy, as these apartments are in high demand during strong economic conditions, but are less affordable during a recession. AVB does have considerable economies of scale, low cost of capital, operational and marketing expertise, and a brand name advantage which enable it to compete effectively against competitors.

The company's balance sheet is also very strong, as its sector-leading A- credit rating makes clear. With nearly \$1.75 billion in liquidity at the end of 2018, a fairly low Net Debt-to-EBITDA of 4.6x, and a mere 65% payout ratio, AVB has plenty of resources to invest in its development projects and sustain the dividend during a downturn while also reacting opportunistically to opportunities that may become available.

Final Thoughts & Recommendation

AVB has an excellent track record and a stellar balance sheet. That being said, its dividend yield is quite low and its growth rate has been slowing considerably over the past several years, with further slowing projected for this year. Without a strong moat protecting its earnings power and the economy appearing poised for a general slowdown, AVB appears overpriced at this time and likely to deliver underwhelming total returns over the next several years. We view AVB as a sell at current prices.
