Overview & Current Events

Edison International is a renewable energy company that is active in energy generation and distribution. Edison International also operates an energy services and a technologies business. The company was founded in 1987 and is headquartered in Rosemead, CA. Edison International has a market capitalization of \$19.5 billion.

Edison International reported its fourth quarter and full year earnings results on February 28. The company reported revenues of \$3.01 billion for the fourth quarter, which was 6.5% less than the revenues that the company generated during the previous year's quarter. Edison International's top line was also lower than what the analyst community had forecasted.

Edison International announced that its adjusted earnings-per-share totaled \$0.94 during the fourth quarter, which was in line with analysts' consensus. Earnings-per-share would have been negative on a GAAP basis due to a one-time charge related to the California Wildfires that totaled \$2.5 billion (after insurance recoveries), which equates to \$5.60 on a per-share basis. Even when this is backed out, Edison International's earnings-per-share were still down 15% versus the prior year's fourth quarter earnings-per-share of \$0.94.

Edison International generated consolidated revenues of \$12.6 billion during fiscal 2018, which was up slightly versus \$12.3 billion during the previous year. Edison International's adjusted earnings-per-share nevertheless declined from \$4.51 to \$4.15 over the last year.

Growth on a Per-Share Basis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
EPS	\$3.24	\$3.35	\$3.23	\$4.55	\$3.78	\$4.33	\$4.15	\$3.94	\$4.51	\$4.15	\$4.50	\$5.47
DPS	\$1.25	\$1.27	\$1.29	\$1.31	\$1.37	\$1.48	\$1.73	\$1.98	\$2.23	\$2.43	\$2.60	\$3.30
Shares	326	326	326	326	326	326	326	327	327	326	326	325

Edison International remained highly profitable during the last financial crisis, as the company's earnings-per-share declined by just 12% between 2008 and 2009, and started to rise again during 2010. Edison International is thus not impacted by the strength of the economy to a significant degree. On the other hand, Edison did not generate strong growth since The Great Recession; its earnings-per-share rose by just 2.8% a year between 2009 and 2018.

Edison International's regulated utility business is a slow grower, which is typical for utilities, but the business is a very stable cash cow. Its non-regulated segments, such as renewable energy production via methods ranging from biomass to wind energy, has the potential to grow at a somewhat higher rate. Due to being non-regulated, this business can be more cyclical than the regulated utility operations. Edison has put a focus on renewable energy when it comes to energy production over the last decades. Among other moves, Edison has also sold coal power plants and shut down a nuclear power plant. This was, at least partially, based on heavy regulation in California, where Edison operates, as California no longer allows utilities to generate electric power from coal.

It is likely that Edison International will be able to grow its earnings-per-share at a low to mid-single digits rate going forward, relatively in line with the growth that the company has generated in the past. Edison International has grown its dividend annually throughout the last decade, with growth accelerating more recently.

Valuation Analysis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	Now	2024
Avg. P/E	9.7	10.3	11.8	9.7	12.7	13.0	14.8	17.9	17.2	13.7	13.3	12.6
Avg. Yld.	4.0%	3.7%	3.4%	3.0%	2.8%	2.6%	2.8%	2.8%	2.9%	4.3%	4.3%	4.8%

Edison International trades at slightly above 13 times this year's expected net profits right now. This is less than the valuations Edison International has traded at since 2015, but we still believe that Edison International's shares are slightly overvalued. This is due in part to the fact that Edison International's shares were much cheaper in 2009-2013. Investors should also account for the uncertainties introduced by the California Fires.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
Payout	38.5%	37.9%	39.9%	28.8%	36.2%	34.2%	41.7%	50.3%	49.4%	58.6%	57.8%	60.3%

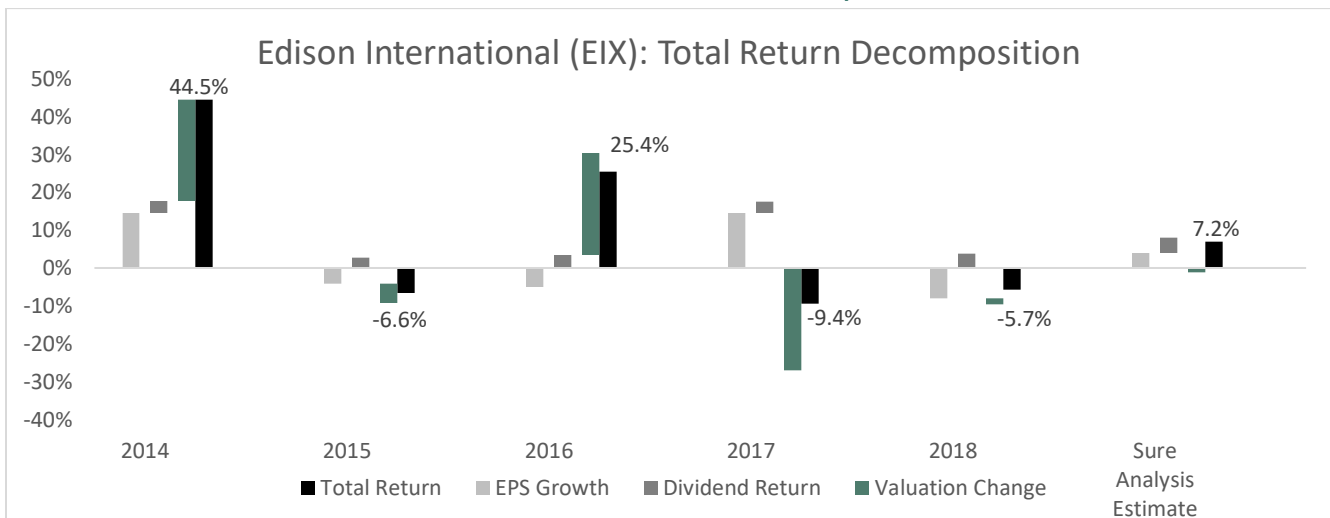

Despite the fact that earnings have seen some ups and downs, Edison International grew its dividend very consistently throughout the last decade. This was only possible due to an increase in the company's dividend payout ratio, as its earnings-per-share did not grow as consistently. The dividend still looks relatively safe, though, as Edison International's operations are not overly cyclical. Its dividend growth rate will likely slow down going forward.

Edison International belongs to California's largest utilities, as the company serves about 13 million customers in the state. Due to the regulated nature of the utilities business, Edison International does not have to worry about significant competitive pressures. The company's operations have been very recession-resilient in the past, and this will likely remain the case going forward, as consumers need electricity no matter how well the economy is doing.

Final Thoughts & Recommendation

Edison International is one of the larger publicly traded utilities. It has seen its share price decline substantially following the California wildfires, but shares still look marginally overvalued. Earnings should resume growth during 2019, but the total return outlook is not overly strong, and due to uncertainties around the wildfire payouts we believe that Edison International should only be held by risk-tolerant investors. The yield is attractive and Edison's growth outlook has improved, but the risk of wildfire liabilities and the somewhat high valuation means we rate the stock a hold.
