Overview & Current Events

W.P. Carey is a commercial real estate focused REIT that operates two segments: real estate ownership and investment management. W.P. Carey was founded 45 years ago, is headquartered in New York, NY, and is currently valued at a market capitalization of \$11.9 billion.

W. P. Carey reported its fourth quarter and full year earnings results on February 21. The trust reported that its revenues totaled \$273 million during the fourth quarter, which was 38.8% more than the revenues that W. P. Carey generated during the previous year's period. This very sizeable revenue growth rate was primarily attributed to the impact of the CPA:17 acquisition that has increased W. P. Carey's asset base and rent proceeds drastically, although other acquisitions and organic growth had a positive impact on W. P. Carey's revenue growth rate as well.

The trust was much more profitable than what the analyst community expected, as funds from operations came in at \$1.33 on a per-share basis, which was \$0.19, or 20% more than the analyst consensus. Funds from operations were up 2% on a per-share basis compared to the previous year's quarter. The majority of W. P. Carey's funds from operations (roughly 85%) were derived from its real estate segment, with its investment management business providing the remainder during the fourth quarter.

W. P. Carey guides for funds from operations of \$4.70 to \$4.90 per share during fiscal 2019, which is less than the \$5.41 that W. P. Carey has earned during 2018 (on a per-share basis), but which is still more than what the analyst community had forecast for fiscal 2019.

Growth on a Per-Share Basis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
FFOPS	\$3.09	\$3.27	\$4.71	\$3.76	\$4.22	\$4.81	\$4.99	\$5.12	\$5.30	\$5.41	\$4.80	\$5.65
DPS	\$2.00	\$2.03	\$2.19	\$2.44	\$3.39	\$3.69	\$3.81	\$3.90	\$4.01	\$4.09	\$4.17	\$4.50
Shares	40	41	40	69	68	104	104	107	108	146	147	150

W. P. Carey generated FFO-per-share growth rate of 6.4% annually between 2009 and 2018, which is a quite solid growth rate for a real estate investment trust, as those usually are low-growth vehicles. The growth rate has slowed down over the years, though, as its FFO-per-share growth rate has averaged just 3% between 2014 and 2018. This is still a decent growth rate for a REIT, though.

W. P. Carey invests additional money into new properties continuously. Since 2012 the REIT invested \$9.7 billion, excluding the CPA:17 takeover, into new assets by either purchasing REITs or through single-asset/portfolio purchases. W. P. Carey can access debt markets at favorable rates, which lowers the trust's cost of capital, which allows for improved investment spreads. Since W. P. Carey cannot finance these acquisitions with debt alone, and since the REIT does not retain a large portion of its cash flows, W. P. Carey issues new shares regularly.

Another factor that drives growth is that the contracts W. P. Carey and the tenants have include ongoing rent increases, which results in growing revenues even without new asset purchases. All of these factors will persist going forward, which is why W. P. Carey should be able to increase its profits over the coming years, although the inclusion of CPA:17 comes with some additional one-time costs. The takeover should be accretive in the long run, however.

Valuation Analysis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	Now	2024
P/FFO	9.1	9.5	8.7	12.4	13.4	12.9	12.7	12.2	12.4	12.0	15.4	12.5
Avg. Yld.	7.7%	6.7%	5.6%	5.2%	5.2%	5.7%	6.0%	6.2%	6.1%	6.3%	5.6%	6.4%

W. P. Carey's share price has risen considerably over the last year, while profits during 2019 will be lower than during the last couple of years, primarily due to the costs that occur for the integration of CPA:17. This combination has made W. P. Carey's shares expensive, as they currently trade well above our fair value estimate.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
Payout	64.7%	62.1%	46.5%	64.9%	80.3%	76.7%	76.4%	76.2%	75.7%	75.6%	86.9%	79.6%

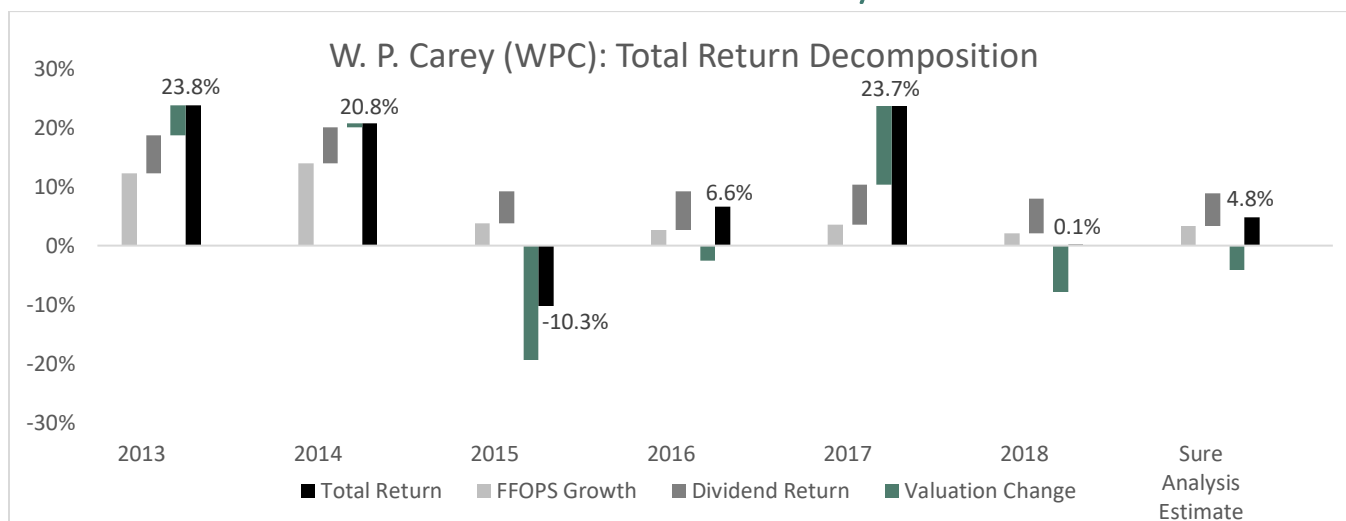

W. P. Carey has grown its dividend very regularly during the last decade. There has not been any dividend cut or dividend freeze during that time frame. The dividend payout ratio is high, especially during the current year as the trust will pay out almost all of its profits to its owners. We still believe that the dividend is sustainable, especially as W. P. Carey did not have any problems financing its dividend during previous recessions.

W.P. Carey is quite recession-proof as even during the last financial crisis, its profits did not decline. Due to diversification across industries as well as geographically (65% US, 30% Europe, 5% other), W. P. Carey is not overly dependent on the progress of any single market either, which makes the REIT a relatively safe investment. This safety is underlined by long-lasting contracts, very high occupancy rates (~99%), considerable scale, and an investment grade rating. W. P. Carey is one of the biggest players in its industry, and its focus on the sale-and-lease-back-transactions niche markets means that it is unlikely that any competitor or new market entrant will hurt the trust's profits.

Final Thoughts & Recommendation

W. P. Carey looks like a fundamentally strong and low-risk REIT, and the trust has a compelling dividend growth track record. The trust's shares are looking quite expensive here, though, which is why total returns will likely not be overly strong going forward. We rate W. P. Carey a hold as its growth rate and high yield are partially offset by the high valuation.
