Overview & Current Events

CAE Inc. is the global leader in training and simulation devices for civil aviation, defense, military security, and healthcare employees. The company operates in three reporting segments, including Civil Aviation Training Solutions, Defense and Security, and Healthcare. CAE is headquartered in Montreal, Quebec, Canada and is cross-listed on both the Toronto Stock Exchange and the New York Stock Exchange, where it trades with a market capitalization of US\$6.7 billion. The company reports financial results in Canadian dollars. Accordingly, all financial results in this report are in CAD and the company's TSX-listed shares have been used for the purpose of valuation analysis.

In mid-May, CAE reported (5/17/19) financial results for the fourth quarter of fiscal 2019. In the quarter, revenue increased 40% over the prior year and adjusted earnings-per-share jumped 55%, from \$0.31 to \$0.48. Management had warned over disproportionate growth in the fourth quarter, which would more than offset the deceleration witnessed in the third quarter. In the year, CAE grew its revenue and its adjusted earnings-per-share by 17% and 13%, respectively. In Civil, which generated 58% of total revenue, CAE delivered over one million hours of aviation training and grew operating income by 13%. Moreover, the company received a record \$4.0 billion annual order intake and thus grew its backlog from \$8.1 to \$9.5 billion. Overall, CAE exhibited impressive performance in its fiscal 2019, with record revenue and earnings.

Thanks to strong business momentum, management expects operating income to grow in the upper 20 percent range in its Civil segment and at a mid-to-high-single digit rate in Defense in fiscal 2020. Given the strong trends in the business of CAE, we expect 12% earnings-per-share growth this year and have revised our expected earnings-per-share growth rate beyond 2020 from 6% to 7%.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	\$0.66	\$0.66	\$0.70	\$0.74	\$0.73	\$0.76	\$0.86	\$1.03	\$1.11	\$1.25	\$1.40	\$1.96
DPS	\$0.12	\$0.15	\$0.16	\$0.19	\$0.22	\$0.26	\$0.29	\$0.31	\$0.34	\$0.40	\$0.44	\$0.64
Shares	256.52	256.52	258.27	259.40	263.77	266.90	269.63	268.40	267.70	264.00	261.00	250.00

CAE has a strong growth outlook as the leader in the employee training and simulation industry, which is characterized by secular growth. While the company has only managed to compound its adjusted earnings-per-share at 4.7% per year over the last decade, we believe its future growth will be better. We expect the company to generate 7% earnings-per-share growth beyond fiscal 2020.

CAE has a conservative payout ratio while it has also communicated that returning capital to its shareholders is a top priority. Accordingly, we believe that CAE's dividend growth will outpace earnings growth for the foreseeable future. We are forecasting 8% growth in per-share dividend payments over the next five years.

Valuation Analysis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	Now	2024
Avg. P/E	12.6	16.4	15.8	13.8	16.6	19.1	16.7	19.0	19.9	20.8	23.6	17.1
Avg. Yld.	1.4%	1.4%	1.4%	1.9%	1.8%	1.8%	2.0%	1.7%	1.5%	1.5%	1.3%	1.9%

CAE has traded at an average price-to-earnings ratio of 17.1 over the last decade. Thanks to its strong business momentum, the stock is trading at a price-to-earnings ratio of 23.6 today. However, it is reasonable to expect the stock to revert to its average valuation level in five years from now. If this occurs, the stock will incur a 6.2% annualized drag due to the contraction of its valuation level.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	18.2%	22.7%	22.9%	25.7%	30.1%	34.2%	33.7%	30.1%	30.6%	32.0%	31.4%	32.7%

CAE operates in highly regulated industries, which have mandatory and recurring training requirements for the renewal of professional certifications. As a result, the company has long-term contracts with many airlines and business aircraft operators and a significant portion of its revenues are recurring. In addition, as CAE is the global leader in its business, it has a strong brand name, which provides a meaningful competitive advantage to the company.

Moreover, CAE has a strong balance sheet, with its interest expense consuming only 15% of its operating income. With a low payout ratio, the company has ample room to continue raising its dividend at a meaningful pace for years.

Final Thoughts & Recommendation

CAE is the leader in the business-to-business training and simulation industry and currently enjoys strong momentum, with promising growth prospects ahead. However, the market has already priced a significant portion of future growth into the stock. As long as market sentiment remains positive, the stock is likely to maintain its rich valuation but it will have significant downside risk whenever a downturn shows up. Overall, CAE may offer a poor average annual return over the next five years. We rate CAE as a sell at current prices due to its excessive valuation.
