Overview & Current Events

Otter Tail Corporation goes back to 1907 with its electric utility, which was founded in Fergus Falls, MN. The company eventually expanded into metal fabrication and plastics manufacturing and today, it has about \$950 million in annual revenue split between utility, manufacturing and plastics operations. Otter Tail has a \$2 billion market capitalization.

Otter Tail reported Q1 earnings on 5/6/19. Consolidated operating revenues increased 2.0% to \$246.0 million compared with \$241.3 million for the first quarter of 2018. Consolidated net income and diluted earnings per share were \$26.3 million and \$0.66 per share, respectively, compared with \$26.2 million and \$0.66 per share for the first quarter of 2018. As a result of the solid report, Otter Tail reaffirmed its 2019 earnings guidance range of \$2.10-\$2.25 per diluted share, and we maintained our expectation of \$2.18 earnings per share for the year. The main factors driving growth in the company are strong rate base growth investments, as well as incremental improvements to efficiencies at existing facilities.

Some highlights from the quarter included the electric and manufacturing segments increasing their quarter-over-quarter net earnings, while the plastics segment's first quarter earnings results were in line with the company's 2019 expectations. The company also continued to make progress on its 150-megawatt Merricourt wind generation project with the execution of the MISO Generator Interconnection Agreement in the first quarter. Construction is expected to start in the second half of 2019 and will be the largest capital investment in the history of the company.

Growth on a Per-Share Basis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
EPS	\$0.71	\$0.38	\$0.45	\$1.05	\$1.37	\$1.55	\$1.56	\$1.60	\$1.86	\$2.06	\$2.18	\$2.78
DPS	\$1.19	\$1.19	\$1.19	\$1.19	\$1.19	\$1.21	\$1.23	\$1.25	\$1.28	\$1.34	\$1.40	\$1.80
Shares	36	36	36	36	36	37	38	39	40	40	40	42

Otter Tail's earnings-per-share history has been fairly strong in the last decade, as earnings bottomed in 2010 and have grown every year since. Guidance for this year is for ~\$2.18 and we see average growth of 5% going forward. Otter Tail will achieve this growth via revenue increases from its utility business – which is looking stronger now that North Dakota and South Dakota have approved rate increases – as well as continued strong performances in its other two, non-utility lines of business. It continues to increase margins as well and the diversification it offers over other utilities is certainly a strength that is showing its value. The company's manufacturing and plastics businesses have benefited from higher order rates as well as a lower income tax rate, while seeing gross margins tick higher over time. The higher operating expenses seen in prior quarters are uncharacteristic for Otter Tail, so we don't see any long-term impairment just yet. We see all of these factors as continuing until further notice and as a result, earnings should grow steadily in the coming years. Otter Tail's full rate case in South Dakota is still pending, but the company has a favorable relationship with its regulators, so we are optimistic that Otter Tail will continue to receive the rate increases it needs to grow revenue.

Otter Tail Corporation (OTTR)

Updated May 14th, 2019 by Samuel Smith

The dividend was stagnant from 2008 to 2013, as Otter Tail was not able to cover the payout with earnings. However, that situation has rectified itself as the company has managed to produce some robust earnings growth and as a result, the dividend is being raised again. This is an important factor for the stock and we see modest payout growth ahead.

Valuation Analysis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	Now	2024
Avg. P/E	31.2	55.1	47.5	21.7	21.1	18.8	18.2	20.2	22.1	22.2	23.2	20.0
Avg. Yld.	5.4%	5.7%	5.6%	5.2%	4.1%	4.1%	4.3%	3.9%	3.1%	2.9%	2.8%	3.2%

The stock's price-to-earnings multiple has moved significantly lower in recent years after being artificially inflated due to low earnings-per-share from 2008 to 2011. However, today's multiple of 23.2 is in excess of its recent historical norm of 20 and as such, we see the stock as overvalued. We think shares will drift back towards a multiple of 20 over time, causing a modest 2.9% headwind to total returns. The yield should remain near where it is today at around 3% as dividend increases keep pace with the stock, and Otter Tail remains a decent income stock choice among utilities.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
Payout	---	---	---	113%	87%	78%	79%	78%	69%	65%	64%	65%

Otter Tail's payout ratio remains around two-thirds of earnings and we don't expect that will change. The company continues to boost its payout at roughly the same rate as earnings, so the dividend is quite safe and should continue to move higher over time.

Otter Tail's competitive advantage of having a diversified business model is also its disadvantage during recessions. The non-utility businesses are providing strong growth today but during the last recession, earnings fell much more than expected for a pure utility. That will likely happen next time there is a downturn, so investors should keep this in mind.

Final Thoughts & Recommendation

We see Otter Tail as a stock that has a relatively strong growth outlook compared to its peers, but also one that is trading in excess of fair value. Growth levers with all three of its businesses are apparent but the stock's strong returns in the past three years have left it overvalued. We see total returns of 4.9% annually moving forward, consisting of the current 2.8% yield, 5% earnings-per-share growth and a 2.9% headwind from the lower valuation. Given these low projected returns, Otter Tail Corporation earns a sell recommendation from Sure Dividend at current prices.
