Overview & Current Events

Ross Stores operates 1,502 stores with off-price apparel and home fashion in 38 states. It also operates 243 dd's DISCOUNTS stores in 18 states. The retailer offers attractive merchandize at a 20%-60% discount compared to the regular prices of department and specialty stores. Ross Stores has grown its revenue and its earnings-per-share every single year for more than a decade. This record is a testament to the strength of its business model and the quality of its management, which executes its growth plan in an exemplary way. The \$34 billion market cap company generated \$15 billion in sales last year.

In late May, Ross Stores reported (5/23/19) financial results for the first quarter of fiscal 2019. The retailer grew its sales by 6% thanks to its new stores and 2% same-store sales growth. Earnings-per-share rose 3.6%, from \$1.11 in last year's quarter to \$1.15, and exceeded analysts' consensus by \$0.01. However, earnings rose only 0.7% due to margin pressure from higher freight and wage costs and poor performance in Ladies apparel.

Management improved its guidance for this year, as it now expects earnings-per-share of \$4.38-\$4.52 (instead of \$4.30-\$4.50). It also plans to open about 100 new stores and expects 1%-2% same-store sales growth.

Growth on a Per-Share Basis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
EPS	\$0.89	\$1.16	\$1.43	\$1.77	\$1.94	\$2.21	\$2.51	\$2.83	\$3.55	\$4.26	\$4.52	\$7.28
DPS	\$0.12	\$0.18	\$0.24	\$0.30	\$0.36	\$0.40	\$0.47	\$0.54	\$0.64	\$0.90	\$1.02	\$1.80
Shares	491.7	472.3	451.8	440.0	426.8	414.9	402.3	391.9	379.7	368.4	355.0	310.0

Ross Stores has grown its earnings-per-share by a multiple of 7 in the last decade, from \$0.58 in 2008 to \$4.26 in 2018. Moreover, it still has growth prospects ahead. The company currently has 1,745 stores while management is confident for a potential of 2,500 to 3,000 stores in the U.S. Thus, the company can still grow its store count by up to 72%. As the retailer opens about 100 new stores per year, it is evident that it has at least a decade of growth ahead.

Ross Stores has missed the analysts' estimates only once in the last 21 quarters. As it tends to be conservative in its guidance, we expect earnings-per-share to be around \$4.52 this year. Moreover, the company has grown its earnings-per-share by 22.1% and 14.0% per year on average in the last 10 and 5 years, respectively. As the retailer will find it increasingly difficult to keep growing at its historical pace, we assume 10.0% average annual earnings-per-share growth for the next five years. We have also noted a change in management's language in recent quarters, as it has stated that competition is very intense while its results have a tough comparison base due to strong performance in recent years. It is also worth noting that the company is poised to grow its earnings-per-share by only 6% this year.

Valuation Analysis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	Now	2024

Ross Stores (ROST)

Updated May 29th, 2019 by Aristofanis Papadatos

Ross Stores is trading at a price-to-earnings ratio of 20.1, which is higher than its 10-year average price-to-earnings ratio of 17.1. If the stock reverts to its average valuation level in the next five years, it will incur a 3.2% annualized drag due to the contraction of its valuation level during this period.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
Payout	13.5%	15.5%	16.8%	16.9%	18.6%	18.1%	18.7%	19.1%	19.2%	21.1%	22.6%	24.7%

The key behind the exceptional growth record of Ross Stores is the fact that it offers great discounts on popular brands. It thus creates a treasure-hunting experience, which is appealing to consumers and constitutes a moat. This unique shopping experience helps explain why Ross Stores is one of the few retailers that have not been affected by Amazon. Moreover, while the U.S. economy has been growing for a whole decade, consumers have become increasingly price-conscious in recent years. Therefore, Ross Stores appeals to a wide range of consumers. With that said, competition has become increasingly heated in the retail sector.

Ross Stores offers a low dividend yield (1.1%) but has raised its dividend for 25 consecutive years. It has raised its dividend at a 24% average annual rate since 2001 and yet still has a low payout ratio and a strong balance sheet. Furthermore, its capital expenses have remained below half of its operating cash flows every year in the last decade, resulting in high free cash flows. Ross Stores will likely keep growing its dividend at a double-digit pace for years. Ross Stores is also resilient during recessions, as consumers become particularly price-sensitive.

Final Thoughts & Recommendation

Ross Stores has a somewhat rich valuation and may offer just a 7.9% average annual return over the next five years. It is a high quality discount retailer with a wide moat and solid growth prospects over the next several years. However, due to its valuation, the stock could be sensitive to any negative news. For instance, shares fell 10% after a previous earnings report, due to a mild downward revision of its guidance. The stock does not earn a buy rating, though it is a suitable hold for those who can maintain a long-term horizon and stomach short-term valuation pressure.
