Overview & Current Events

NACCO Industries is a holding company for The North American Coal Corporation, which incorporated in 1913. The company supplies coal from surface mines to power generation companies. At 35 million tons of annual production, NACCO Industries is the largest lignite coal producer in the U.S. and ranks among the top ten of all coal producers. NACCO Industries operates in the states of North Dakota, Texas, Mississippi, Louisiana and on the Navajo Nation in New Mexico. The company has a current market capitalization of \$350 million and annual revenues of \$135 million.

The company has been very active in purchasing and spinning off a wide variety of businesses in its history. In 1988 and 1990, NACCO Industries made several purchases that expanded the business to include housewares. In 2012, NACCO Industries spun off its Materials Handling Group (a combination of Yale Materials Handling Corporation and the Hyster Company). The company completed its spinoff of its housewares-related business on 9/29/2017.

NACCO Industries announced first quarter earnings results on 5/1/2019. The company earned \$2.15 per share, a 182% increase from the prior year. Revenue grew 29% to \$40.1 million. These results were even more impressive because the company's tax rate was higher (13.4% Q1 2019 vs 9% Q2 2018).

NACCO Industries' top and bottom lines improved significantly primarily due to a higher number of third party operated wells to extract natural gas from the company's mineral reserves in Ohio. This isn't likely to be the case in future quarters. Coal deliveries of 9.2 million in the first quarter were flat year-over-year. Unconsolidated coal deliveries increased 1.2% while consolidated coal deliveries declined 14.3%. Unconsolidated coal is easier to acquire because it is found among loose materials where consolidated coal is found among solid rock. Limestone deliveries decreased 2.5% to 11.7 million tons due to a drop off in consolidated operations. The company bought back \$1.3 million worth of stock in the first quarter. We maintain our expected earnings-per-share of \$5.00 for 2019.

Growth on a Per-Share Basis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
EPS	\$1.03	\$9.53	\$14.86	\$5.02	\$5.79	\$3.98	\$3.13	\$4.32	\$4.14	\$5.00	\$5.00	\$5.26
DPS	\$2.07	\$2.09	\$2.12	\$1.88	\$1.00	\$1.02	\$1.05	\$1.07	\$0.98	\$0.66	\$0.76	\$1.31
Shares	8	8	9	8	8	7	7	7	7	6	6	5

Because NACCO Industries spun off its Materials Handling Group in 2012, it is not appropriate to compare today's company to the pre-spinoff equivalent. NACCO saw its earnings per share decline 6.5% per year through 2017. Management has not offered guidance for 2019, but the company did perform better last year. Although NACCO has shown negative growth since 2012 and volatile earnings-per-share since then, we are increasing our projected growth to 1% from 0%. This is due to recent improvements in both coal and limestone deliveries.

NACCO Industries increased its dividend by 15% for the upcoming payment. While the dividend has grown by 11.6% per year over the past 5-years, the company will likely be unable to match this growth rate unless earnings cease their decline. With a targeted payout ratio of 25%, near the average since the spinoff of the Materials Handling Group, shareholders are likely looking at \$1.31 in dividends-per-share by 2024.

Valuation Analysis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	Now	Now	2024
Avg. P/E	41.6	8.9	6.2	18.4	10.0	13.8	16.8	14.5	18.2	8.7	10.0	12.0
Avg. Yld.	4.8%	2.5%	2.3%	2.0%	1.7%	1.9%	2.0%	1.7%	1.3%	1.8%	1.5%	2.1%

Shares of NACCO Industries have increased by \$13, or 35%, since our March 9th update. Focusing on just the past 5 years, NACCO Industries shares have traded with an average price to earnings multiple of 14.4. This is significantly higher than the stock's current multiple of 10x earnings. Investors are just not willing to pay for a company that has declining earnings while the rest of the investment world enjoys an extended bull market. NACCO Industries needs to prove it can reliably grow earnings-per-share before it reaches its 5-year historical averages. We are targeting a price-to-earnings ratio of 12.0 for the stock. If achieved, this would add 3.7% in annual returns over the next five years.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
Payout	201%	22%	14%	38%	17%	26%	34%	25%	24%	13%	15%	25%

The previous version of NACCO Industries actually saw earnings improve during the last recession, but this is not the same company. NACCO Industries now sees a substantial portion of revenues from coal. As demand for coal fluctuates, so will the company's ability to produce revenue. company has also kept its payout ratio low in recent years, which is a prudent decision by management as earnings-per-share continues to drop.

NACCO Industries' primary competitive advantage is that it doesn't acquire existing coal mines or mining companies, as this would increase its leverage position. Instead, NACCO Industries focuses on reducing coal production costs and maximizing efficiency and operating capacity at the mine locations.

Final Thoughts & Recommendation

After first quarter results, we expect NACCO Industries to offer a total annual return of 6.2% through 2024, down from 13% previous. The significant increase in share price has removed much of our expected total annual return. The company benefited from an increase in revenues outside of its coal and limestone operations that may not be a recurring source of revenue. NACCO Industries has a poor track record of growth. We encourage investors holding the stock to consider taking profits and redeploying them into a more stable industrial stock. We lower our rating of the stock to sell from hold.
