Overview & Current Events

Franklin Resources, founded in 1947 and headquartered in San Mateo, CA, is a global asset manager with a long and successful history. The company offers investment management (which makes up the bulk of fees the company collects) and related services to its customers, including sales, distribution, and shareholder servicing. As of July 31st, 2019, assets under management (AUM) totaled \$709.5 billion for the \$14 billion market cap company.

On July 30th, 2019 Franklin Resources reported Q3 2019 results for the period ending June 30th, 2019. (Franklin Resources' fiscal year ends September 30th.) For the quarter total assets under management equaled \$715.2 billion, which was up \$2.9 billion compared to Q3 2018, as a positive \$8.3 billion in net market change was offset partially by \$5.4 billion in net outflows. Negative net flows are an item Franklin Resources has faced for several quarters in a row. Total operating revenue came in at \$1.477 billion (0.21% of AUM or approximately 83 basis points on an annualized basis) compared to \$1.559 billion in the year ago period, a 5.3% decrease. Net income equaled \$245.9 million or \$0.48 per share compared to \$402 million or \$0.75 in Q3 2018. However, this result was impacted by a \$0.17 per share charge related to recent tax reform. Without this charge, adjusted earnings-per-share would have been \$0.65.

Growth on a Per-Share Basis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
EPS	\$1.30	\$2.12	\$2.89	\$2.99	\$3.37	\$3.79	\$3.29	\$2.94	\$3.01	\$3.38	\$2.65	\$3.07
DPS	\$0.28	\$0.29	\$0.33	\$0.36	\$0.39	\$0.46	\$0.57	\$0.69	\$0.78	\$0.89	\$1.04	\$1.32
Shares¹	688	672	653	637	631	623	604	570	555	519	502	475

Since 2007 Franklin Resources has grown earnings-per-share by an average compound rate of 3.3% per annum.

The biggest growth segment in the asset management industry is ETFs, which have much lower expense ratios than actively managed funds. Franklin's actively managed funds have been performing well over the last decade, which serves as an advantage versus other active asset managers; however, low-cost passive funds are the true competition. The rise of ETF investing is a problem for Franklin Resources and will be a challenging headwind for the entire industry. The "race to the bottom" as it relates to fees, is good for investors but not asset managers. We expect assets under management to stabilize as net outflows are weighed against higher asset prices in the long-term. However, if Franklin Resources has to keep lowering its management fees, stable AUM will still lead to declining net income, all else equal.

A counterpoint to this notion is that the Franklin Resources has an exceptional balance sheet, allowing the company to repurchase significant blocks of stock and work towards a solution in the changing asset management industry. Taking these items collectively, we are forecasting 3% annual growth over the intermediate-term.

Valuation Analysis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	Now	2024
Avg. P/E	17.3	16.4	13.9	12.3	14.0	14.4	15.4	12.4	13.7	11.1	10.2	12.0

Franklin Resources (BEN)

Updated August 17th, 2019 by Eli Inkrot

Over the past decade shares of Franklin Resources have traded with an average P/E ratio of about 14 times earnings. We are using 12 times earnings as our beginning baseline, as asset managers are facing substantial headwinds in the way of falling asset management fees. That being said, this multiple could be too conservative given Franklin’s immense financial power. Still, with shares trading near 10 times earnings, this implies the potential for a valuation tailwind.

The dividend is also worth mentioning. Not only is the 3.9% starting yield very well covered, Franklin Resources also has a tendency to periodically pay out a special dividend. While we have not included this in our forecast, investors may very well receive a yield in excess of the stated payout.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
Payout	22%	14%	11%	12%	12%	12%	17%	23%	26%	26%	39%	43%

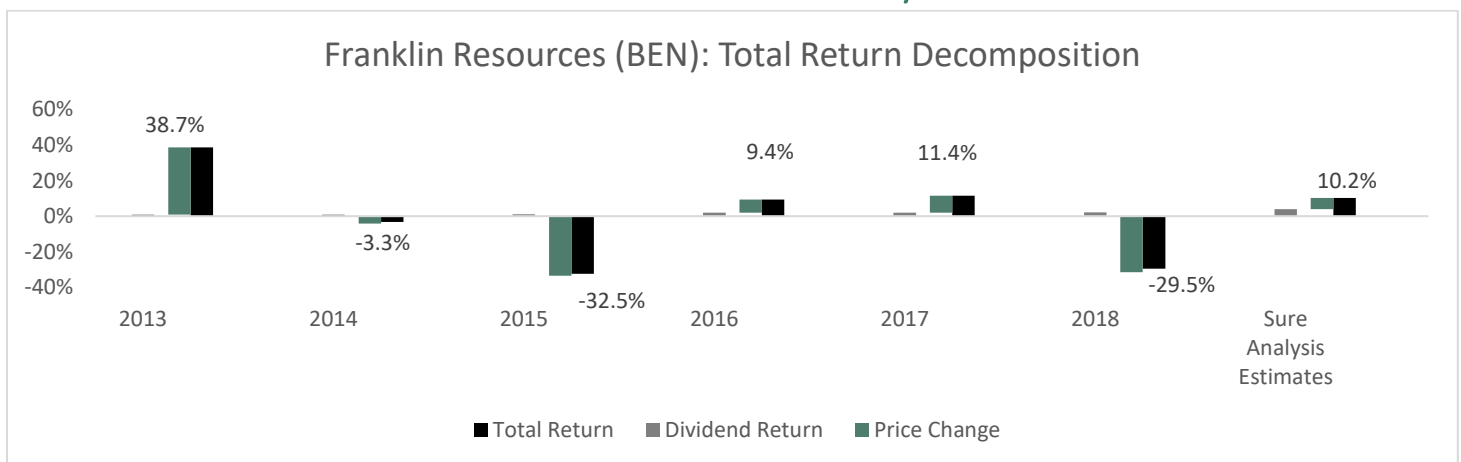

Franklin Resources’ funds have performed well over the long-term, but we do not believe the company has a meaningful competitive advantage in its field. Indeed, Franklin Resources needs to adapt to the trend towards low-cost passive ETF’s to remain competitive. Unless a novel solution is found, this could mean declining profits in the years to come.

The dividend payout ratio has never been especially high, which has allowed the company to retire a meaningful amount of shares and pay the occasional special dividend. Lately the payout ratio has inched upward toward the 40% mark, but this payment is still very well covered. Indeed, Franklin Resources has perhaps one of the best balance sheets in our coverage universe. As of the last quarter, the company held \$5.5 billion in cash and \$14.5 billion in total assets against total liabilities of \$3.1 billion. While a moderate amount of debt is held (~\$700 million) annual earnings power is twice this amount and cash on hand alone easily covers all liabilities.

Final Thoughts & Recommendation

Shares are down 18% since our last update. Franklin Resources is a classic asset manager that has to battle the rise of low-cost ETF investing, which has been responsible for customers moving money from actively managed funds to ETFs. The company is in an interesting situation where the core business is declining, but the financial foundation – allowing for share repurchases and above average payouts – is exceptional. Total return potential comes in at 10.2% per annum, stemming from 3% growth, a 3.9% dividend yield and the possibility of a 3.3% valuation tailwind. While we acknowledge the challenges facing the business, we are enthused by the sound financial footing of the company. Moreover, we believe the current share price more than reflects the intermediate-term issues and rate shares as a buy.
