Overview & Current Events

Imperial Oil is one of Canada's largest integrated oil businesses. The company operates through three reporting segments: Upstream, Downstream, and Chemical. Imperial Oil is headquartered in Calgary, Alberta, Canada. Exxon Mobil (XOM) owns approximately 70% of Imperial Oil's common equity. Imperial Oil is cross-listed on both the Toronto Stock Exchange and the New York Stock Exchange, where it trades with a market capitalization of US\$19 billion. Imperial Oil reports financial results in Canadian dollars, but the figures shown in the data tables of this research report have been converted to U.S. dollars and refer to the company's NYSE-listed shares.

Imperial Oil is different from the well-known integrated oil majors, such as Exxon Mobil and Chevron, in one aspect. While the earnings of these companies greatly depend on the prices of WTI and Brent, the earnings of Imperial Oil are affected to a great extent by the prices of WTI and WCS (Western Canada Select). The latter often trades at a deep discount to WTI so it differentiates the earnings of Imperial Oil compared to those of the oil majors.

In early August, Imperial Oil reported (8/2/19) financial results for the second quarter of fiscal 2019. The company greatly benefited from a drastic decrease in the tax rate of Alberta, from 12% to 8% by 2022. This decrease boosted the earnings of the upstream segment by CAD\$689 million and the upstream segment switched from a loss of CAD\$6 million in last year's quarter to a profit of CAD\$985 million. Moreover, the company's downstream earnings increased 28% over last year's quarter thanks to higher utilization rates. Overall, Imperial Oil grew its earnings-per-share from \$0.19 in last year's quarter to \$1.21. Thanks to the drastic tax cut of Alberta, we raised our earnings-per-share forecast for this year from \$1.90 to \$2.40.

Growth on a Per-Share Basis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
EPS	\$1.76	\$2.48	\$3.77	\$4.35	\$2.98	\$3.30	\$1.17	\$0.56	\$0.86	\$2.20	\$2.40	\$3.06
DPS	\$0.35	\$0.40	\$0.44	\$0.48	\$0.46	\$0.45	\$0.39	\$0.44	\$0.50	\$0.58	\$0.68	\$0.90
Shares¹	847.6	847.6	847.6	847.6	847.6	847.6	847.6	847.6	831.2	790.0	760.0	700.0

Imperial Oil's earnings-per-share history has been volatile, largely due to the high volatility of oil prices, particularly during the 2014-2017 downturn, and the volatility of refining margins. Indeed, 2017 earnings-per-share were less than one-fourth of their peak levels. On the other hand, Canada has the third-highest level of oil reserves worldwide, behind only Venezuela and Saudi Arabia. Imperial Oil expects to grow its production by 15% from 2018 to 2020. Opportunistic share repurchases should also play a role in Imperial Oil's per-share growth. The company's share count has decreased by 5% in the last 12 months and management intends to maintain a significant buyback rate. Management also raised the dividend by 16% this year. Nevertheless, as this year's results will benefit from the major tax cut of Alberta, they will form a high comparison base for the upcoming years. Consequently, we have lowered our expected earnings-per-share growth rate for the next five years from 7% to 5%.

Valuation Analysis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	Now	2024
Avg. P/E	20.8	15.5	11.8	10.3	14.1	14.4	31.5	---	35.6	13.9	10.4	14.0
Avg. Yld.	0.9%	1.0%	1.0%	1.1%	1.1%	0.9%	1.1%	1.4%	1.6%	1.9%	2.7%	2.1%

Imperial Oil is trading at a price-to-earnings ratio of 10.4, which is lower than our assumed fair price-to-earnings ratio of 14.0. If the stock approaches our fair value estimate over the next five years, it will enjoy a 6.1% annualized gain thanks to the expansion of its valuation level.

Safety, Quality, Competitive Advantage, & Recession Resiliency

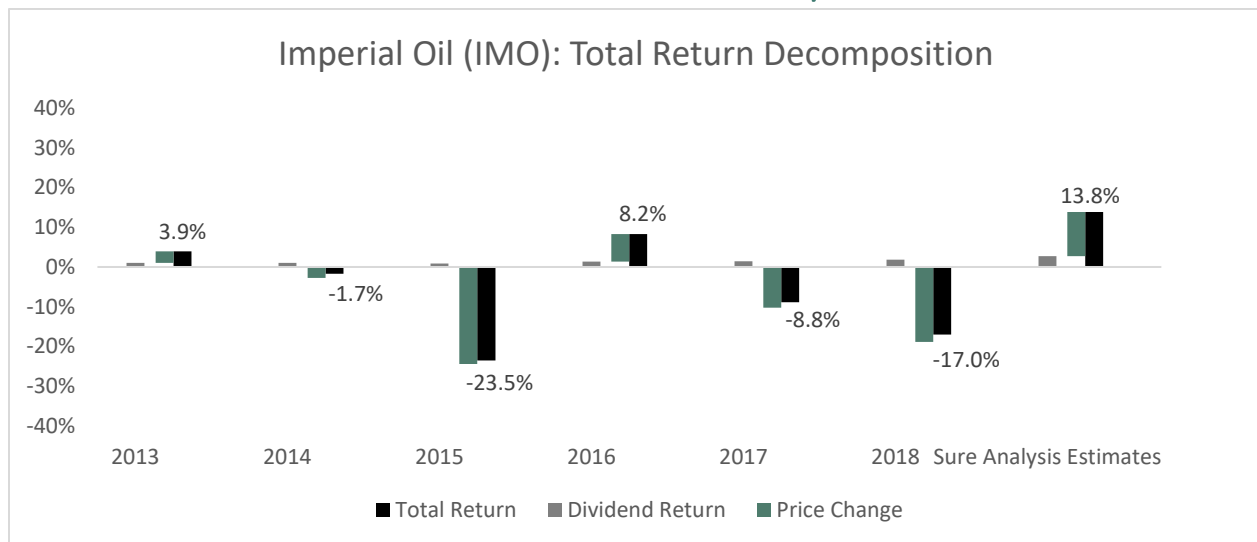

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
Payout	19.9%	16.1%	11.7%	11.0%	15.4%	13.6%	33.3%	78.6%	58.1%	26.4%	28.3%	29.4%

Imperial Oil is one of the highest-quality energy businesses in the Canadian market. The company has a credit rating of AA+ from S&P, which is higher than all of its peers in the Canadian energy space. Moreover, the company has paid 100+ years of consecutive dividends and has increased its dividend (in Canadian dollars) for 25 consecutive years. The company's 10-year average dividend growth rate (again, in Canadian dollars) is 7%. Imperial Oil seems laser-focused on returning capital to shareholders and we expect this to continue moving forward. Furthermore, the company benefits from leveraging the expertise of its major shareholder, Exxon Mobil.

Final Thoughts & Recommendation

Imperial Oil has shed 28% off its peak about 10 months ago and is now trading at a 10-year low level. This poor stock price performance has mostly resulted from lackluster oil prices and the market's fear that the production growth of the company will decelerate in the upcoming years. However, we expect Imperial Oil to continue growing its production at a significant rate for years. We expect the stock to offer a 13.8% average annual return over the next five years, partly thanks to its opportune valuation. We rate the stock as a buy but only for investors who can tolerate the pronounced volatility that results from the dramatic swings of the price of oil.
