Overview & Current Events

MasterCard is a world leader in electronic payments. The company partners with 25,000 financial institutions around the world to provide an electronic payment network. MasterCard currently has almost 2.6 billion credit and debit cards in use and has a market capitalization of \$284 billion. The company generates nearly \$17 billion in annual revenues.

MasterCard reported financial results for the first quarter on 7/30/2019. The company's adjusted earnings-per-share came to \$1.89, which was \$0.06 above expectations and a 14% increase from the previous year. Revenue grew 10.8% to \$4.1 billion, which beat estimates by \$20 million.

Gross dollar volumes improved 13% in constant currency, with 10% growth in the U.S. and 14% in international markets. Switched transactions increased 18%, with Europe and Latin America showing the largest improvements. Cross border volumes were higher by 16% in local currency. Credit card volumes grew 10.4% while debit volumes were higher by 15.6%. MasterCard's tax rate was 18.5% for the quarter compared to 18.8% a year ago. The company's operating margin declined 70 bps to 58.3% due to investments in strategic opportunities. Operating expenses declined ~1%. MasterCard repurchased 7.7 million shares of stock during the quarter at an average price of \$247.

We maintain our forecast for adjusted earnings-per-share of \$7.53 per share for the year, which would represent 16% growth from 2018 if achieved.

Growth on a Per-Share Basis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
EPS	\$1.12	\$1.41	\$1.87	\$2.19	\$2.56	\$3.10	\$3.35	\$3.69	\$4.58	\$6.49	\$7.53	\$15.15
DPS	\$0.06	\$0.06	\$0.06	\$0.12	\$0.29	\$0.44	\$0.64	\$0.76	\$0.88	\$1.00	\$1.28	\$2.57
Shares	1297.7	1309	1280	1250	1211	1165	1116	1081	1054	1040	1025	1000

MasterCard has grown earnings-per-share at a rate of almost 18% per year over the last decade. Erring on the side of caution, we project that the company can continue to grow earnings by at least 15% annually through 2024. This growth will come primarily through an increase in revenue. If the company is able to hit our projections, then MasterCard could earn \$15.15 based off of 2019 earnings estimates.

It is estimated by some research firms that a little more than 20% of point-of-sale purchase were made with cash in the U.S. This trend is similar to other industrialized countries. Consumers are also turning towards online shopping to make their purchases, making a credit card essential to them. The conversion from cash to credit and debit cards should allow MasterCard an opportunity for growth for the foreseeable future.

MasterCard has increased its dividends for the last 8 years, and has paid an uninterrupted dividend since 2006. We see the dividend nearly doubling to \$2.57 per share by 2024 as the payout ratio is quite low and earnings growth is outstanding.

Valuation Analysis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	Now	2024
Avg. P/E	16.8	16.3	15.9	19.7	24.1	25	27.6	26.0	27.8	30	36.9	22.3
Avg. Yld.	0.3%	0.3%	0.2%	0.3%	0.5%	0.6%	0.7%	0.8%	0.7%	0.5%	0.5%	0.8%

MasterCard's share price has increased \$28, or 11.2%, since our 5/1/2019 update. Based off of 2019 earnings-per-share estimates, shares have a current price-to-earnings ratio, or P/E, of 36.9. MasterCard have an average P/E ratio of 22.3 over the past ten years. If shares were to revert to their historical P/E by 2024, then valuation would be a 9.6% headwind to annual returns over this time period.

MasterCard is one of the lower yielding stocks in our coverage universe, but we feel that the stock shouldn't be ignored by dividend growth investors. MasterCard increased its dividend 32% for the 2/8/2019 payment, which is very much in line with the company's average growth rate over the past decade. This level of dividend growth can help raise the annual dividend growth rate within an investor's diversified portfolio.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
Payout	5%	4%	3%	6%	11%	14%	19%	21%	19%	15%	17%	17%

MasterCard was able to grow earnings during the last recession. Consumers will likely cut back on spending if/when the economy weakens, but they will still need to buy items like gas, groceries and clothes. While total spending may fall, consumers' habits of using credit and debit cards to make purchases will likely remain the same if not increase in the future. This is one of the key competitive advantages that MasterCard possess. As one of the largest companies in the electronic payment space, MasterCard is likely to benefit from increased use of debit and credit cards as a form of payment for goods and services. In addition, the company discussed several partnerships on the first quarter conference call with different corporations. For example, iPhone users will be able to access a digital version of their MasterCard in their Apple Wallet, making it easy and convenient to shop and spend.

Final Thoughts & Recommendation

MasterCard continues to be one of the best performing stocks in the market, having increased nearly 50% so far in 2019. Still, we expect that shares can off a total annual return of 5.9% through 2024. MasterCard had another good quarter, but the stock's valuation is reaching very high levels. Given the mid-single digit expected returns over the next five years, we rate shares of MasterCard as a hold and encourage investors wait for a pullback before purchasing the stock.
