Overview & Current Events

Restaurant Brands International is one of the world's largest owner-operators of quick service restaurants (hence its stock ticker, QSR). The company was founded in 2014 by the \$12.5 billion merger between American fast food restaurant chain Burger King and Canadian coffee shop and restaurant Tim Horton's. Later, Restaurant Brands International expanded its franchise portfolio with the 2017 acquisition of American fast food chain Popeye's Louisiana Kitchen. At the end of the most recent reporting period, Restaurant Brands International had the following restaurant counts at each of its three franchises: Tim Horton's, 4,872; Burger King, 18,008; Popeye's Louisiana Kitchen, 3,156. Restaurant Brands International is headquartered in Oakville, Ontario, Canada and trades on the New York Stock Exchange with a market capitalization of \$34 billion.

In early August, Restaurant Brands International reported (8/2/19) financial results for the second quarter of fiscal 2019. The company generated system-wide sales growth across each of its restaurant chains. More specifically, Tim Horton's generated system-wide sales growth of 1.6%, Burger King generated system-wide sales growth of 9.8%, and Popeye's Louisiana Kitchen generated system-wide sales growth of 8.8%. Just like in previous quarters, the majority of the average 7.9% growth came from new restaurant additions, as comparable store sales growth was modest: 0.5% at Tim Horton's, 3.6% at Burger King, and 3.0% at Popeye's Louisiana Kitchen. While same-store sales growth was not exciting, it was much better than in previous quarters. Net restaurant count increased 1.6% at Tim Horton's, 5.8% at Burger King, and 6.1% at Popeye's Louisiana Kitchen. Adjusted earnings-per-share rose 7.5%, from \$0.66 to \$0.71, and exceeded analysts' consensus by \$0.04.

It is also remarkable that Burger King tested Impossible Whopper, a plant-based burger, in seven markets and saw the stores with that burger outperform the other stores in traffic by 18.5%. As a result, Burger King brought the Impossible Whopper in all of its 7,200 U.S. stores in early August.

Growth on a Per-Share Basis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
EPS	---	---	---	\$0.33	\$0.65	\$0.33	\$0.78	\$1.45	\$2.10	\$2.63	\$2.80	\$4.31
DPS	---	---	---	\$0.04	\$0.24	\$0.30	\$0.44	\$0.62	\$0.78	\$1.80	\$2.00	\$2.70
Shares¹	---	---	---	350.2	351.8	358.0	476.0	470.0	477.0	473.0	465.0	420.0

Restaurant Brands International grew its earnings-per-share by 25% last year, mostly thanks to the opening of new stores. The lackluster same-store sales growth is a concern, as it reflects the potential growth rate when the company approaches a saturation point in the number of restaurants. However, the company has ample room to keep opening new stores for several years. Management has announced plans to increase the total store count from the current level of 26,036 to more than 40,000 over the next 8-10 years. Thanks to this growth potential and the operational expertise of 3G Capital (the majority owners of QSR), we expect Restaurant Brands International to grow its earnings-per-share by about 9% per year over the next five years.

¹ Share count is in millions.

Valuation Analysis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	Now	2024
Avg. P/E	---	---	---	46.2	30.0	85.8	49.8	28.9	32.9	22.1	26.4	17.0
Avg. Yld.	---	---	---	0.3%	1.2%	1.1%	1.1%	1.5%	1.3%	3.1%	2.7%	3.7%

Restaurant Brands International's valuation has been irrationally high (average price-to-earnings ratio of 42.2) for most of its time since the iconic Burger King-Tim Horton's merger. We believe a fair value for Restaurant Brands International is a price-to-earnings ratio of around 17. The stock has rallied 47% off its bottom at the end of last year, much more than the broad market, and is now trading at an earnings multiple of 26.4. If its valuation contracts to 17 times earnings over the next five years, the stock will incur an 8.4% annualized drag in its returns during this period.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
Payout	---	---	---	---	---	---	24.0%	25.9%	16.0%	68.4%	71.4%	62.6%

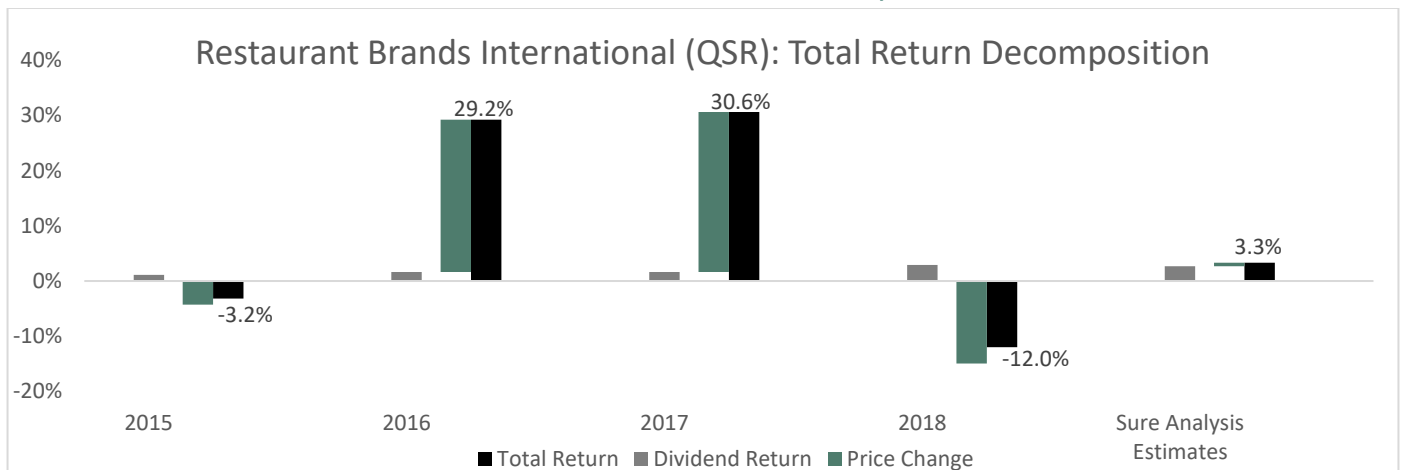

Restaurant Brands International operates in the business of quick service restaurants, where competition has been remarkably heated in recent years. Nevertheless, the company can be considered to have a meaningful competitive advantage; the strength of its brands.

Restaurant Brands International's operates with an appreciable amount of debt, as its net debt of \$16.3 billion is about 13 times its annual earnings and its interest expense consumes 29% of its operating income. However, thanks to its reliable growth trajectory, the company is not likely to have any problem servicing its debt.

Final Thoughts & Recommendation

Restaurant Brands International has rallied 47% off its bottom in the Christmas sell-off. As a result, it is trading in excess of our estimate of fair value and may offer just a 3.3% average annual return over the next five years. Accordingly, we are recommending investors sell this overvalued security. In the absence of a recession, the stock will probably maintain its premium valuation so it could reward investors thanks to its strong growth. However, investors should be aware of the significant downside risk of the stock in the event of a downturn due to its rich valuation.
