Overview & Current Events

Founded in 2011 and public since 2014, STORE Capital Corp is a real estate investment trust involved in the acquisition and management of single tenant operation real estate, or STORE, properties across the U.S. STORE Capital primarily leases facilities at which a trust operates its business and generates sales to middle-market and large businesses through long-term agreements. Most of STORE's revenue comes from its service sector customers, which include, notably, restaurants, movie theaters, health clubs, early childhood education centers, and furniture stores. A sizable percentage of STORE's total real estate portfolio is comprised of restaurant and industrial locations. Specifically, properties in Texas, Illinois, and Georgia make up a large amount of STORE's investments as well. It currently trades at a market capitalization of \$8.6 billion.

STORE Capital reported its Q2 results on August 1st, reporting solid FFO-per-share growth of 11% year-over-year (\$0.5 against \$0.45 in the year-ago quarter) and boosted the lower end of its 2019 FFO-per-share guidance range to \$1.92 from \$1.90. The REIT also originated \$364.1 million of gross investments, representing 79 properties during the quarter, with a weighted average initial cap rate of 7.9%. The trust also harvested \$15 million of profit during the quarter by selling 22 properties. Occupancy stood at a robust 99.7% at quarter end.

Growth on a Per-Share Basis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
AFFO/S	---	---	---	---	---	\$1.41	\$1.50	\$1.65	\$1.71	\$1.84	\$1.93	\$2.46
DPS	---	---	---	---	---	\$0.11	\$0.104	\$0.112	\$0.120	\$0.128	\$0.134	\$0.171
Shares¹	---	---	---	---	---	78	122	149	179	205	220	270

STORE Capital's AFFO/share growth has been strong since coming public as it has gone from \$1.41 in 2014 to \$1.84 in 2018 (~7% growth per year). Looking ahead, the trust expects its aggressive acquisition pipeline (fishing in a \$3 trillion pool of assets) to combine with its defensive net-leases to drive solid mid-single digit growth. We don't expect the trust to continue its 2018 pace of acquisition-fueled growth, which produced 10% FFO per share growth due to gradually compressing cap rates and the law of large numbers. However, we do believe that the trust's strategy of focusing on profit center real estate that is leased on a long-term basis to a highly diversified group of middle market and larger companies across the United States, with strong rent escalators and senior lease positioning should continue to generate attractive returns. Further fueling this growth is the fact that STORE's equity trades at a premium to NAV, enabling the trust to accretively issue shares and then invest the proceeds into new properties. As a result, we expect STORE to achieve annual growth of ~5% over the next half decade and the dividend to keep pace with that level of growth.

Valuation Analysis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	Now	2024
P/AFFO	---	---	---	---	---	15.4	15.4	15.0	15.3	15.3	19.2	17.0
Avg. Yld.	---	---	---	---	---	0.5%	4.5%	6.8%	4.6%	4.6%	3.6%	4.1%

STORE Capital does not look particularly cheap right now as evidenced by its dividend yield and P/AFFO relative to its historical levels. While the trust's safety has increased with its growing scale, diversification, and strength of balance sheet, the trust's growth prospects have slowed a little bit due to the law of large numbers and declining cap rates. As a result, we believe that shares deserve a P/AFFO multiple of 17x. Therefore, we believe that shares are overvalued at present and the value multiple will experience a -2.4% compression annually moving forward for the next five years as the market comes to realize that its growth optimism has become slightly overblown.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	Now	2024
Payout	---	---	---	---	---	7.8%	69.3%	67.9%	70.1%	69.6%	69.4%	69.5%

As a net lease REIT, STORE Capital is a defensive stock because its leases have a senior position to other obligations, are long-term, and have regular rent escalators built in. Additionally, the nature of triple net leases is such that the tenant takes care of virtually all of the operating costs, making them carry very little operating risk for the landlord. Another factor contributing to STORE's safety is the fact that it has achieved tremendous diversification with over 400 customers; more tenants and a more diverse investment portfolio than any other net lease REIT. STORE is among the very few REITs (and the only net lease REIT) to have the ability to issue AAA-rated notes, which, in itself, is an affirmation of the safety of the diverse portfolio it have assembled.

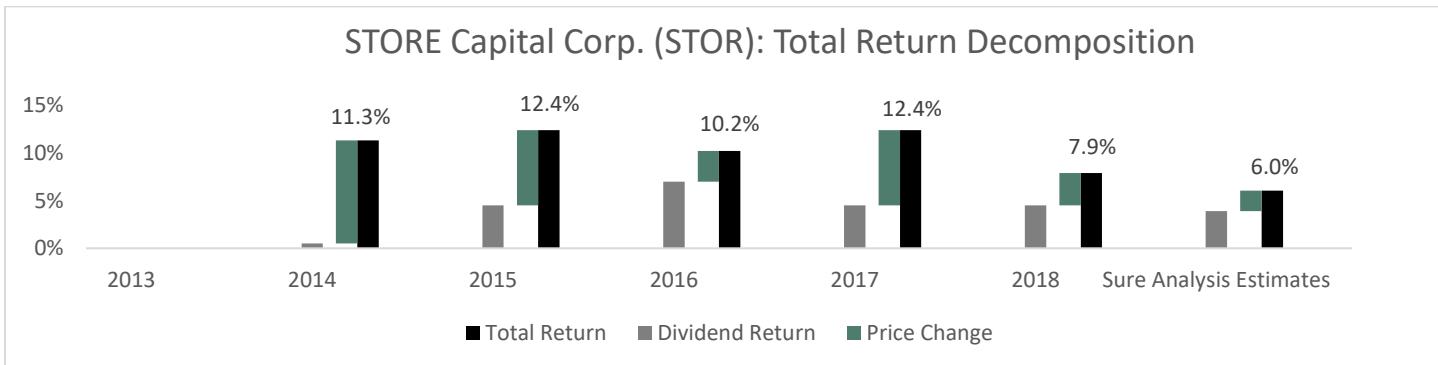

Though it was founded after the financial crisis had already passed, the strong performance of other triple net lease REITs during that time period bodes well for it should a similar event occur in the future. The balance sheet is also in great shape as the trust has a stable outlook, a BBB credit rating, and ~7.5x debt service coverage

Final Thoughts & Recommendation

STORE Capital has an impressive track record and shows no sign of changing its growth trend. However, compressing cap rates and the law of large numbers are likely to begin catching up to it over the next half decade, which we expect will slow its AFFO/share growth to ~5% annually during that time period and cause its multiple to contract slightly.

Combined with its current 3.6% dividend, STORE is likely to produce 6% annualized returns moving forward, making it a hold at current prices.
