Overview & Current Events

BancFirst Corp. (BANF) serves as the financial holding company for BancFirst, a state-chartered bank headquartered in Oklahoma City, Oklahoma. The company was founded in 1984 and in the subsequent year proceeded to merge with seven other bank holding companies based in Oklahoma. For the next several years, the company acquired additional banks and bank holding companies. By 1989, the company had consolidated its 12 subsidiary banks under its current name. The company has 107 banking locations serving 58 communities throughout Oklahoma, and has over 1,900 employees. BancFirst offers a variety of commercial banking services to retail customers and small and mid-sized businesses. For retail customers, this includes checking, savings, CDs, personal loans and other services. For commercial customers, the bank offers business lending services, including agricultural and multi-family loans, along with a variety of other business banking services. The company has a market capitalization of \$1.8 billion and a total asset base of \$7.7 billion.

On July 18th, 2019 BancFirst reported second quarter results for the period ended June 30, 2019. Earnings per share for the first quarter was \$1.02 compared to \$0.91 in the same quarter the prior year, representing an increase of 12.1%. The net interest margin for this quarter was 3.89%, compared to 3.70% for the same quarter last year. Net charge-offs remained low at 0.01%, equal to the year prior.

Growth on a Per-Share Basis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
EPS	\$1.09	\$1.35	\$1.47	\$1.68	\$1.75	\$2.02	\$2.09	\$2.22	\$2.65	\$3.76	\$3.98	\$5.08
DPS	\$0.45	\$0.48	\$0.52	\$0.56	\$0.60	\$0.65	\$0.70	\$0.74	\$0.80	\$1.02	\$1.24	\$1.58
Shares¹	31.0	30.7	30.2	30.5	30.7	31.0	31.2	31.6	31.9	32.6	33.0	34.0

BancFirst has grown its earnings per share by an average of 12.1% per year over the past ten years, and by an average of 14.5% over the past five years. However, going back to a longer 15-year period to account for the prior recession, the bank has only grown earnings by an average of 8.8% per year.

The bank's net interest margin has increased in recent years, largely thanks to the Federal Reserve raising key interest rates. In 2019 so far, the Federal Reserve has cut interest rates twice, and this trend may persist. Therefore, we expect the bank's profit margin to be pressured in the coming years. Consensus analysts expect flat-to-negative growth over the next 2 years. We estimate 5.0% growth over the next five years, including a flat or negative period over the first half of that time period.

Valuation Analysis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	Now	2024

BancFirst Corp. (BANF)

Updated September 29th, 2019 by Lyn Alden

BancFirst's P/E ratio has averaged 14.9 over the past ten years with relatively little change from year-to-year. We feel that a multiple of 15.0 is fair for a company of this size with a moderate growth rate and yield. The stock currently has a price-to-book ratio of slightly under 2, which is right in line with its 5-year historical average.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
Payout	41%	36%	35%	33%	34%	32%	34%	33%	30%	27%	31%	31%

BancFirst is a well-managed bank that has raised its dividend for 25 consecutive years and emerged from the global financial crisis relatively unscathed. Although earnings fell approximately 35% from their peak in 2007 to their bottom in 2009 and then took five years to surpass the 2007 peak, this was very healthy compared to many other banks in the country, and at no point did earnings fall enough to put the dividend payout ratio above 50%. Today, the bank has a highly-diversified asset base with commercial loans, real estate loans, and debt securities, and maintains compliance with banking regulations and capital reserve ratios.

Oklahoma's banking industry is diversified, and the company does not have a significant competitive advantage over regional or national banks. However, well-run banks generally enjoy high switching costs, as depositors are unlikely to go through the hassle to switch banks in most scenarios. BancFirst has considerably outperformed the S&P 500 and all of the "Big Four" national banks over the past 25 years in terms of total shareholder returns, which indicates an above-average company culture and management team. David Rainbolt was the CEO for virtually the entirety of this long period of outperformance, but as of two years ago moved on to become the executive chairman, while David Harlow, former BancFirst president, is now the CEO.

Final Thoughts & Recommendation

BancFirst is a small bank with a long stretch of consistent dividend growth, significant resilience through recessions, and a history of considerably outperforming the broader banking industry and the stock market more generally. Interest rates and other factors outside of their control may be a negative headwind going forward, but BancFirst's recently-reduced valuation appears to factor in many of these potential headwinds. We consider BancFirst to be a hold at the current time.
