## Overview & Current Events

Sunoco is a master limited partnership that distributes fuel products through its wholesale and retail business units. The wholesale unit purchases fuel products from refiners and sells those products to both its own and independently-owned dealers. The retail unit operates stores where fuel products as well as other products such as convenience products and food are sold to customers. Sunoco was founded in 2012, is headquartered in Dallas, TX, and currently trades with a market capitalization of \$2.6 billion.

Sunoco reported its second quarter earnings results on August 7. The company reported that its revenues totaled \$4.48 billion during the quarter, which was 2.8% less than the revenues that Sunoco generated during the previous year's quarter. The company nevertheless was able to beat the analyst consensus estimate, though. Gasoline prices were down during the quarter on a year-over-year basis, which is why revenues did not benefit from gasoline price tailwinds during the quarter. Sunoco was able to increase its sales volumes by 4% year over year, though.

Sunoco reported that its adjusted EBITDA rose to \$152 million during the second quarter, which was 9% more than the adjusted EBITDA that Sunoco generated during the previous year's quarter. This was possible due to an increase in Sunoco's EBITDA margin, primarily. Sunoco's distributable cash flows totaled \$101 million during the second quarter, which was slightly lower compared to the previous year's quarter, and which resulted in a coverage ratio of 1.17.

## Growth on a Per-Share Basis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
<b>EBITDA/S</b>	---	---	---	\$1.40	\$2.51	\$3.14	\$7.95	\$3.34	\$7.32	\$7.51	<b>\$7.60</b>	<b>\$8.19</b>
<b>DPS</b>	---	---	---	\$0.47	\$1.80	\$2.05	\$2.68	\$3.26	\$3.30	\$3.30	<b>\$3.30</b>	<b>\$3.30</b>
<b>Shares<sup>1</sup></b>	---	---	---	22	22	24	50	52	100	85	<b>87</b>	<b>95</b>

Sunoco does not have a long history, as the company was created just a few years ago. During that time frame its results varied significantly. Sunoco's abnormally high EBITDA during 2015, which was caused by unusually high spreads between oil prices and fuel/gasoline prices, is an outlier. During 2017 Sunoco was able to grow its EBITDA-per-share massively, despite the issuance of a high amount of new shares. Sunoco issues new shares to acquire companies or assets. The partnership only does this when the transaction is expected to be accretive to its EBITDA-per-share.

Sunoco is able to generate growth through a multitude of factors. Following the sale of a large amount of its convenience stores, Sunoco is now more dependent on its fuel wholesale business, where it profits from significant scale and revenue consistency. In Texas, Sunoco is one of the largest independent fuel distributors, and Sunoco is also among the top distributors of Chevron, Exxon, and Valero-branded motor fuel in the rest of the United States. In the fuel wholesale industry, scale is important, as increased scale allows for higher margins and a better negotiating position with both suppliers and customers. Total gasoline sales declined relatively steadily since the beginning of the current millennium, but bottomed in 2015 and started to rise again over the last three years. This macro shift towards higher gasoline consumption, can be explained by customers' preference for larger, less efficient models such as SUVs and trucks. Higher gasoline demand is a macro tailwind for Sunoco's business.

## Valuation Analysis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	Now	2024
P/EBITDA	---	---	---	17.7	11.2	13.4	5.0	8.1	4.0	3.5	4.1	4.5
Avg. Yld.	---	---	---	1.9%	6.4%	5.1%	6.1%	9.8%	11.8%	12.7%	10.5%	9.0%

Sunoco trades at a very low price to EBITDA multiple right now, as it did in 2017 and 2018. Sunoco's share price is still well below the peak of \$60 that was hit during 2014, whereas profitability, measured by EBITDA-per-share, is close to peak levels. The combination of these factors explains why Sunoco's current valuation is so low. We see some upside potential to a price to EBITDA multiple of 4.5. This is well below the level shares traded at in 2012-2014, but Sunoco was a different, more convenience store-oriented company back then.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
Payout	---	---	---	---	71.7%	65.3%	33.7%	97.6%	45.1%	43.9%	43.4%	40.3%

Sunoco's dividend payout ratio has moved in a wide range throughout its existence, as EBITDA has seen steep ups and downs. The company has never cut its dividend, but there has not been any dividend increases since 2017, either. The current yield of 10.5% provides more than ample income. Sunoco has covered its dividend payout by a factor of 1.35 via distributable cash flows during the last 4 quarters, thus the dividend looks somewhat safe for now.

Sunoco is one of the largest fuel wholesalers in Texas, which provides competitive advantages in terms of size and scale. It is also a key distributor for Exxon and Chevron branded fuels, and the company has good relations to these energy giants. Via tuck-in acquisitions, Sunoco can increase its scale advantage further over the coming years.

## Final Thoughts & Recommendation

Following the sale of much of its convenience business, Sunoco is centered on fuel wholesale now, a business where Sunoco has huge scale advantages, especially in its home market Texas. The company trades below our fair value estimate and could produce compelling total returns, and investors get a high dividend yield. Investors should keep in mind that results can be cyclical. We rate Sunoco a buy at current prices for those that do not mind the ups and downs.
