Overview & Current Events

Cummins, headquartered in Indiana and founded in 1919, designs, manufactures, distributes and services engines for heavy, medium and light-duty trucks. The company's products include diesel and natural gas engines as well as hybrid and electric platforms. Cummins operates in four segments: Engines (35% of 2018 revenue), Distribution (26%), Components (24%) and Power Systems (15%). Roughly 60% of its business is done in the U.S. and Canada. The \$28 billion market capitalization company employs more than 60,000 people and serves customers in about 190 countries. Cummins generates nearly \$24 billion in annual revenues.

Cummins reported third quarter results on 10/29/2019. The company earned \$3.88 per share during the quarter, which topped estimates by \$0.04, but declined 4.2% from the previous year. Revenue decreased 2.9% to \$5.8 billion, missing estimates by \$100 million. Currency reduced revenues by 1%. EBITDA was 16.6% of sales.

Lower demand for trucks and construction equipment was responsible for most of the top and bottom-line declines. U.S. sales were flat while international was down 8%. Sales for the Engine segment dropped 11% as on-highway revenues were down 9% and off-highway revenues were lower by 20%. Lower demand in China caused a 25% decline in international revenues for this segment. Distribution revenues improved 4% due to stronger demand for power generation equipment in North America. Components sales were lower by 6% due to decreased demand in Europe, India and China. Power Systems had 2% growth as industrial and power generation revenues were both up slightly. Cummins now expects the medium and heavy-duty truck market to be down 7% for the year, an improvement from its prior expected decline of 10%. Cummins has lowered its revenue forecast to a decline of 2% from flat earlier. The company expects EBITDA in a range of 15.9% to 16.3%, down from previous guidance of 16.25% to 16.75%.

Growth on a Per-Share Basis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
EPS	\$2.47	\$5.17	\$9.07	\$8.69	\$7.91	\$9.14	\$8.92	\$8.23	\$10.63	\$13.15	\$15.50	\$19.78
DPS	\$0.70	\$0.88	\$1.33	\$1.80	\$2.25	\$2.81	\$3.51	\$4.00	\$4.21	\$4.44	\$5.24	\$6.69
Shares¹	201	198	193	190	187	182	175	168	166	163	157	150

The above table is slightly misleading as it relates to growth, as the data starts at the last recession. Looking at the 2008 to 2018 period, Cummins grew earnings-per-share by an average compound rate of 12.4%, quite an impressive record, although most of the improvement was in the 2010-2011 and 2017-2018 periods. We forecast 5% earnings growth due to increases in revenue and share repurchases.

Cummins has been benefiting from an increase in worldwide emission regulations and fuel efficiency standards. When paired with the company's reliable and superior quality engines, this has afforded the company growth opportunities. This trend is likely to continue, but we believe there is a tipping point whereby the increase in standards starts to be addressed via alternative technologies, such as batteries. In turn, this could slow Cummins' growth profile as the company would either need to invest heavily in new technologies or risk falling behind. Cummins increased its dividend 15% to \$1.31 for the 9/3/2019 payment. On an annualized basis, the stock has a yield of 3%.

Valuation Analysis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	Now	2024
Avg. P/E	14.8	14.5	11.1	11.9	15.3	15.8	14.0	14.1	14.9	10.2	11.4	13.0
Avg. Yld.	1.9%	1.2%	1.3%	1.7%	1.9%	1.9%	2.8%	3.5%	2.7%	3.3%	3.0%	2.6%

Over the past decade, shares of Cummins have traded with an average price-to-earnings ratio of 13 to 14 times earnings. We believe this is a reasonable multiple considering the company's growth prospects paired with a fair amount of cyclicality in earnings. Shares of Cummins are up \$12, or 7.3%, since our 7/30/2019 update. Using our expectations for earnings for 2019, the stock trades with a multiple of 11.4 currently. If shares were to trade at our target multiple by 2024, then valuation would be a 2.6% tailwind to total returns over this time period.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
Payout	28%	17%	15%	21%	28%	31%	39%	49%	40%	34%	34%	34%

During the last recession Cummins posted earnings-per-share of \$4.08, \$2.47, \$5.17 and \$9.07 during the 2008 through 2011 stretch. Meanwhile, the dividend kept increasing during this time. We view this a microcosm of the business at large. That is, in lesser economic times earnings are likely to falter, but the company has the ability to recovery quickly, and the dividend payout ratio is low enough to keep the payment steady.

Cummins maintains a competitive advantage in its strong brand name, stemming from reliability and superior quality. In turn, the company maintains a large share of the heavy-duty engine market. Two main risks stick out: a high reliance on a few customers, namely PACCAR, Daimler, Chrysler and Navistar, which could turn to manufacturing in-house, and the potential for new technologies to disrupt or require increased investment.

Final Thoughts & Recommendation

We forecast that the company can offer a total annual return of 10.2% through 2024, down from 12.4% previously. Cummins had a difficult third quarter. The company saw the majority of segments decline year-over-year and lowered its guidance for revenue and EBITDA. The total return potential continues to earn Cummins a buy from Sure Dividend, but we caution investors that the company saw weakness in many of its end markets. On the other hand, the company's slight improvement in medium and heavy-duty truck market is a positive sign. We reaffirm our 2024 price target of \$257.
