Overview & Current Events

Eaton Corporation is a diversified industrial equipment and parts manufacturer. The company's engineered electrical systems and components are used by customers in the industrial, vehicle, commercial, and aerospace markets. The Ireland-based Eaton was founded in 1916 and has a current market capitalization of more than \$37 billion, with annual revenues in excess of \$22 billion. The company employs more than 95,000 people. Eaton has 6 divisions: Electrical Products, Electrical Systems & Services, Hydraulics, Aerospace, Vehicle, and eMobility.

Eaton reported earnings results for the third quarter on 10/29/2019. The company earned \$1.52 per share, which came in \$0.01 ahead of estimates and grew 6.3% year-over-year. Revenue declined 1.8% to \$5.3 billion, missing estimates by \$200 million. Currency translation reduce revenue totals by 1.5%.

Eaton's organic growth declined 1% during the quarter, though segment margins grew 110 bps to an all-time record 18.7%. Sales for Electrical Products were flat. Lighting orders were a headwind during the quarter, though the company announced it would divest this business in Q1 2020. This division did post record margins of 20.3% and saw strength in residential and commercial construction markets in the Americas region. Electrical Systems & Services grew 3% and operating margins improved 290 bps to a record 18.3%. Each region contributed to growth and orders were up 5% on rolling 12-month basis. Aerospace sales were up 7%. This segment also had record operating margins of 25.1% which was a 310bps increase from the previous year. Orders were up 13%, mostly due to military and aftermarket services. Organic growth was a company-best 8%. Hydraulics experienced a 10% drop in revenues. This segment has struggled all year as order declines reached 14% in the quarter due to a weak market for mobile equipment. Vehicle sales also continue to decline, with a 13% drop in the third quarter due to weakness in the global light vehicle market. eMobility declined 1%, mostly due to higher research and development costs. Operating cash flow grew 8% to a quarterly record \$1.1 billion. The company also bought back \$539 million worth of shares in the quarter. Eaton has reduced its share count from the beginning of the year by 2.8% through the first three quarters of 2019.

Eaton lowered its organic sales forecast to 1% from its prior estimate of 3% due to the negative impact from currency translation. The company lowered its adjusted earnings-per-share guidance for the year to a range of \$5.67 to \$5.77 from \$5.77 to \$5.97. Shares initially dropped following the earnings release, but closed the trading day higher by 2%.

Growth on a Per-Share Basis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
EPS	\$1.30	\$2.73	\$3.96	\$3.96	\$4.19	\$4.67	\$4.30	\$4.21	\$4.65	\$5.39	\$5.72	\$6.63
DPS	\$1.00	\$1.08	\$1.36	\$1.52	\$1.68	\$1.96	\$2.20	\$2.28	\$2.40	\$2.64	\$2.84	\$3.29
Shares¹	332.4	339.9	334.4	470.7	475.1	467.9	458.8	449.4	439	433	418	400

While Eaton has delivered mid-single-digit organic growth in recent years, the company's earnings-per-share decreased dramatically during the last recession. To strike a balance between current organic growth and the company's performance during the last recession, we expect earnings-per-share to grow at a rate of 3% through 2024.

Eaton Corporation (ETN)

Updated October 29th, 2019 by Nathan Parsh

Eaton paused dividend growth in 2009, as this was prudent given the earnings decline. Following the 8% dividend increase for the 3/22/2019 payment, Eaton has now increased its dividend for 10 consecutive years.

Valuation Analysis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	Now	2024
Avg. P/E	19.4	14.2	12.1	11.8	15.6	15.2	14.6	14.6	16.1	13.1	15.6	14.4
Avg. Yld.	4.0%	2.8%	2.8%	3.2%	2.6%	2.8%	3.5%	3.7%	3.2%	3.7%	3.2%	3.4%

Shares of Eaton have increased \$6, or 7.2%, since our 7/30/2019 update. Based off of updated guidance for 2019, the stock now trades with a price-to-earnings multiple of 15.6. Eaton's stock has an average price-to-earnings ratio of 14.4 over the past decade. Given the steep drop in earnings that the company had in 2009, it appears that investors haven't been willing to pay a high multiple for shares given that the company is far from recession proof. If shares were to trade at the average P/E by 2024, then valuation would be a 1.5% headwind to total returns over this time frame. Eaton has a current yield of 3.2%, which is just above the stock's 10-year average yield of 3.1%.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
Payout	77%	40%	34%	38%	40%	42%	51%	54%	52%	49%	50%	50%

Eaton suffered an extreme decline in earnings during the last recession that forced the company to pause its dividend growth. The company would likely experience a decline in earnings in another recession due to the nature of its business and could pause its dividend increases again. Eaton's key competitive advantages are its expertise and understanding of the businesses that it operates. The company specializes in providing highly engineered products to customers in niche end markets. Switching to a different provider could prove costly and comes with a risk of failure. While Eaton is not recession proof, the company is likely to do well in an improving economy due to these factors.

Final Thoughts & Recommendation

After third quarter results, Eaton is expected to offer a total annual return of 4.5% through 2024, down from 6.8% previously. Currency translation continues to hamper the company's results. In addition, the Hydraulics and Vehicle segments continue to offset growth in most of the other areas of the company. Neither of these segments is expected to return to growth in the near future. On the other hand, three other divisions posted record operating margins during the quarter. The stock ending the trading day higher following results and the reduced earnings estimates should be taken as a positive sign. Shares have a generous yield, but Eaton continues to receive a hold recommendation from Sure Dividend. The 2024 target price has been lowered \$3 to \$95 due to updated earnings forecasts.
