Overview & Current Events

Gilead Sciences is a biotechnology company that operates with a clear focus on antiviral medication and treatments. Its main products include treatments for HIV, Hepatitis B, and Hepatitis C (HBV/HCV), but Gilead has also ventured into other areas such as oncology. Gilead Sciences was founded in 1987, the company headquartered in Foster City, CA, and current trades with a market capitalization of \$84 billion.

Gilead Sciences reported its third quarter earnings results on October 24. The company generated revenues of \$5.6 billion during the quarter, which was in line with the previous year's revenues. Revenues were also in line with the analyst consensus estimate. Gilead's Hepatitis C franchise continued to shrink, which can be explained by the fact that these medications are a cure, which means that the patient pool shrinks continuously. Gilead's other businesses showed growth rates that were high enough to compensate the ongoing shrinking of its HCV business, though. This was primarily the result of rising revenues from Gilead's HIV drugs, which generated revenues that were \$500 million higher than the revenues those drugs generated during the previous year's quarter. Yescarta, which was acquired through the takeover of Kite Pharma, generated revenues of \$120 million during the quarter, up from \$75 million year over year.

Gilead generated earnings-per-share of \$1.75 during the third quarter, which was down from \$1.84 that the company earned during the previous year's quarter. Gilead managed to beat the consensus estimate for its earnings-per-share, though. Management has increased its revenue guidance for 2019, to a midpoint of \$22.0 billion.

Growth on a Per-Share Basis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
EPS	\$1.41	\$1.66	\$1.78	\$1.64	\$1.81	\$7.35	\$11.91	\$9.94	\$8.84	\$6.67	\$7.01	\$8.95
DPS	---	---	---	---	---	---	\$1.29	\$1.84	\$2.08	\$2.28	\$2.52	\$3.53
Shares¹	1.80	1.60	1.51	1.52	1.53	1.50	1.42	1.31	1.31	1.30	1.29	1.25

Gilead's main sales driver for many years has been its HIV portfolio, until its \$11 billion takeover of Pharmasset started to pay off in 2014. With its new HCV drugs, Gilead was able to grow its top line very quickly. Due to strong operating leverage, Gilead's earnings-per-share exploded upwards. Since its HCV drugs cure patients, the patient pool started to shrink very quickly, which has led to a declining number of patients that start treatment with one of Gilead's HCV drugs. This is why profits peaked in 2015 and have been declining since, including during fiscal 2018.

Since HCV sales are now substantially lower than at the peak level, further sales declines will not be as impactful for Gilead in the future. Gilead's HIV business continues to grow, which is why earnings will likely not continue to decline forever; 2018 likely was the bottom in terms of profitability. Thanks to efforts by Gilead to grow its sales in the future, there is a good chance that the company's earnings-per-share will be higher in the 2020s. Those efforts include expansion into new markets via acquisitions, such as Gilead's 2017 takeover of Kite Pharma that gave Gilead the CAR-T drug Yescarta. Gilead has the commercialization rights for Filgotinib, which was developed by Galapagos, and has a good chance of becoming successful in the rheumatoid arthritis, Crohn's disease, and ulcerative colitis markets in the foreseeable future. Filgotinib will likely come to the market in 2020 in Europe and the US.

Valuation Analysis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	Now	2024
Avg. P/E	16.4	11.8	11.2	17.3	31.1	12.2	8.9	8.4	8.5	9.4	9.4	11.0
Avg. Yld.	---	---	---	---	---	---	1.2%	2.2%	2.8%	3.6%	3.8%	3.6%

Gilead Sciences has never traded at an especially high valuation, except for 2013, when the steep earnings growth during 2014 was foreseeable, which resulted in an above-average valuation for Gilead's shares. Gilead has been valued at a relatively low valuation since profits peaked in 2015, and shares continue to be valued below 10 times earnings. We see some upside towards an 11 times earnings multiple as earnings should start to rise during the coming years.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
Payout	---	---	---	---	---	---	10.8%	18.5%	23.5%	34.2%	35.9%	39.5%

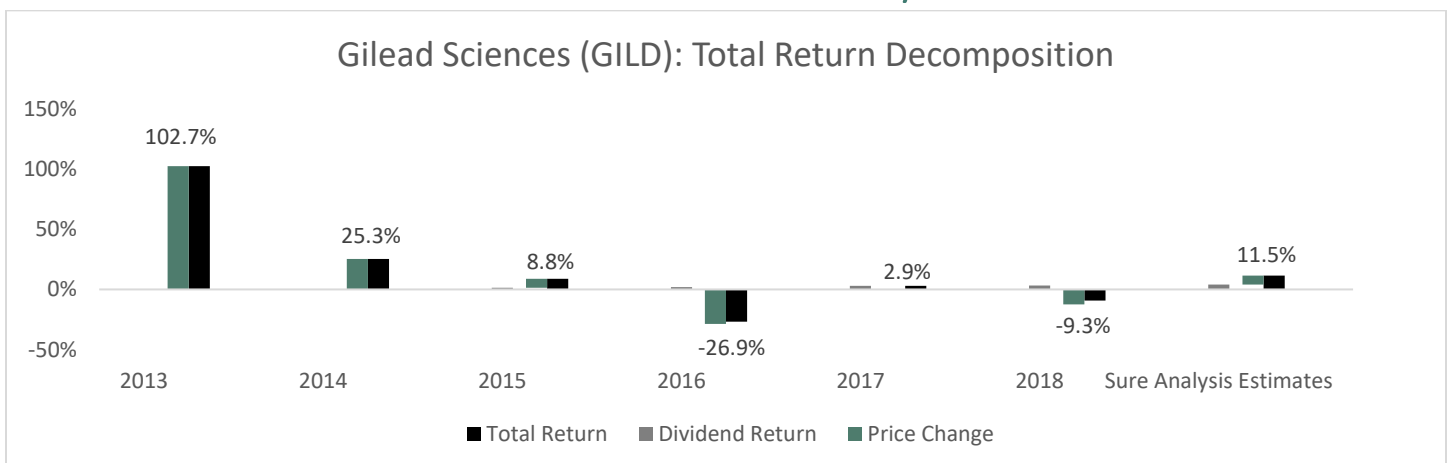

Gilead Sciences started to pay a dividend in 2015. Since then the dividend has been increased annually. Due to a combination of a double-digit dividend growth rate and declining earnings-per-share, Gilead's dividend payout ratio has risen substantially over the last couple of years. As we forecast positive earnings growth going forward, the payout ratio will not rise as much during the coming years. The payout looks relatively safe, we believe.

In the HIV market, which continues to grow globally, Gilead continues to be the market leader, holding a large market share. ViiV Healthcare is the other relevant player, and the market is more or less shared by these two companies. It is unlikely that Gilead will lose its market position, and both players have no interest in engaging in a price war. Gilead's main problem over the last few years was that the HCV market continues to shrink as more patients are cured. Gilead should not be negatively impacted by recessions, as demand for medicine is not based on how well the economy is doing. During the last financial crisis, Gilead's profits continued to rise, which proves its recession resiliency.

Final Thoughts & Recommendation

The peaking of the HCV business and subsequent sales and earnings declines were a major hurdle for Gilead Sciences and its stock over the last couple of years. 2018 likely was the bottom year for Gilead's profitability, though, as year-to-date earnings-per-share are up slightly versus 2018. Due to the ramp-up of Yescarta and a strong performance from the HIV business, 2019 could see positive earnings growth. Shares look somewhat undervalued and offer an above-average yield and total return potential, which is why we rate Gilead a buy at current prices.
