Overview & Current Events

Jack Henry & Associates is a business software & services company that is headquartered in Missouri. It was founded in 1976 and trades with a current market capitalization of \$11.7 billion. The company provides information technology services to the financial services industry, including to more than 1,300 banks as well as other companies.

Jack Henry & Associates reported its fiscal first quarter earnings results on November 4. The company generated revenues of \$438 million during the quarter, which was 11.6% more than the revenues that Jack Henry & Associates generated during the previous year's quarter. This was slightly more than what the analyst community had expected, and the revenue growth rate also accelerated from the previous quarter. The company was able to grow the revenues for its services and support and processing product lines, while deconversion fees also continued to rise.

Jack Henry & Associates' adjusted operating income grew by 14% year-over-year, which represents a major improvement versus the operating income growth rate from the previous quarter. This can be attributed to the positive impact of Jack Henry & Associates' accelerating revenue growth.

Jack Henry & Associates reported earnings-per-share of \$1.16, which was easily ahead of the analyst consensus, beating estimates by \$0.12, or roughly 10%. Net earnings grew by 7% year over year, a higher effective tax rate was a headwind, otherwise net profits would have grown more in line with the company's double-digit operating earnings growth.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	\$1.38	\$1.59	\$1.78	\$2.04	\$2.36	\$2.59	\$3.12	\$3.14	\$3.65	\$3.52	\$3.67	\$5.78
DPS	\$0.36	\$0.40	\$0.44	\$0.56	\$0.84	\$0.94	\$1.06	\$1.18	\$1.36	\$1.54	\$1.60	\$2.70
Shares¹	85	86	86	85	83	81	79	77	77	77	76	73

Jack Henry & Associates has a great earnings-per-share growth track record. Over the last decade its earnings-per-share grew by 12.9% annually. Between 2013 and 2018, earnings-per-share grew by 12.3% annually, so earnings growth has slowed down only marginally over the last couple of years, which shows that the compelling earnings growth rate during the last decade was not the result of the recovery from the last financial crisis. Jack Henry & Associates' earnings-per-share grew every year over the last decade, even during the financial crisis. Unfortunately, 2019 was not a year where Jack Henry & Associates could continue its growth track record, as profits declined slightly.

In the past, profit growth has been driven by rising revenues as well as by growing margins, which is not a surprise, as Jack Henry & Associates benefits from strong operating leverage. Due to relatively high fixed and low variable costs, revenue increases allowed for margin expansion in most years. During fiscal 2019 Jack Henry & Associates did not manage to grow its operating margin at a strong pace, as product mix changes pressured its margins. In the future the company should continue to benefit from operating leverage, though, which is why profits will likely grow faster than revenues. Growth rates in the industry will likely decline somewhat due to a much higher base compared to ten years ago, but Jack Henry & Associates should nevertheless be able to record solid earnings growth for many years.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
Avg. P/E	17.0	18.1	18.0	20.1	23.3	24.1	24.8	29.1	43.8	37.1	41.7	22.0
Avg. Yld.	1.5%	1.4%	1.4%	1.4%	1.5%	1.5%	1.4%	1.3%	0.9%	1.2%	1.1%	2.1%

Jack Henry & Associates is a high-quality growth company. Shares had been trading at a relatively inexpensive valuation about ten years ago, but the stock has become more expensive in recent years. The valuation peaked during fiscal 2018. Shares are slightly less expensive right now, but they still trade well above our fair value estimate today. This will result in a steep headwind to the company's total returns over the coming years.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	26.1%	25.2%	24.7%	27.5%	35.6%	36.3%	34.0%	37.6%	37.3%	43.8%	43.6%	46.7%

Jack Henry & Associates has raised its dividend at a very compelling pace over the last decade, which was partially possible due to an increase in the company's dividend payout ratio, and partially due to its strong earnings growth. Jack Henry & Associates pays out roughly 40% of its net profits, which is why the dividend looks relatively safe. It is likely that Jack Henry & Associates would be able to raise its dividend during a recession or economic downturn as well, as this is what the company did during the last financial crisis.

Jack Henry & Associates has shown that it operates a recession-resistant business model. The company was able to generate earnings-per-share growth during every year through the Great Recession. Jack Henry & Associates' services have high switching costs from the customers' perspective, which creates sticky customers with high lifetime values. The positive growth outlook for the whole industry is why competitive pressures are not a major problem.

Final Thoughts & Recommendation

Jack Henry & Associates is a high-quality business that generated attractive earnings and dividend growth in the past, which went hand in hand with strong total returns for shareholders. The company's growth outlook over the coming years is robust as well due to strong industry tailwinds. Shares are trading at a very high valuation right now, which is why Jack Henry & Associates earns a sell recommendation from Sure Dividend at current prices.
