Overview & Current Events

National Fuel Gas Co. is a diversified energy company that operates in five business segments: Exploration & Production, Pipeline & Storage, Gathering, Utility, and Energy Marketing. The company's largest segment is Exploration & Production. National Fuel Gas was founded in 1902 and has grown to a market capitalization of \$4.0 billion. With 49 years of consecutive dividend increases, National Fuel Gas qualifies to be a Dividend Champion.

In late October, National Fuel Gas reported (10/31/19) financial results for the fourth quarter of fiscal 2019. The average price of natural gas fell -8%, from \$2.45 in last year's quarter to \$2.26, after the effect of hedging. However, the company grew its production 8% sequentially (25% over last year's quarter) and grew its adjusted earnings-per-share 10%, from \$0.49 to \$0.54. For the year, production increased 19% to an all-time high of 211.8 Bcfe. Despite the suppressed natural gas prices, National Fuel Gas grew its adjusted annual earnings-per-share 3% partly thanks to its integrated business model. More precisely, the record output provided a strong boost to the gathering segment, which offset the effect of lower realized natural gas prices.

Management reduced its guidance for the earnings-per-share of this fiscal year from \$3.25-\$3.55 to \$3.00-\$3.30 due to a decrease in its forecast for the average natural gas price from \$2.55 to \$2.40.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	\$2.65	\$3.09	\$2.63	\$3.14	\$3.52	-\$4.50	-\$3.43	\$3.30	\$3.34	\$3.45	\$3.15	\$3.83
DPS	\$1.36	\$1.40	\$1.44	\$1.48	\$1.52	\$1.56	\$1.60	\$1.64	\$1.68	\$1.72	\$1.76	\$1.96
Shares¹	82.1	82.9	83.3	83.7	84.2	84.6	85.1	85.5	86.0	86.8	87.5	90.5

National Fuel Gas pursues growth by growing its natural gas production and expanding its pipeline network. However, National Fuel Gas' earnings have barely grown over the last ten years. Earnings-per-share have compounded at a rate of 2.9% per year over the last 10 years. Due to the somewhat low comparison base formed this year, we are forecasting 4% long-term earnings-per-share growth for this Dividend Champion, which allows us to calculate a 2025 earnings-per-share estimate of \$3.83.

Investors should note that 90% of the production of National Fuel Gas is natural gas. Therefore, as the Exploration & Production segment generates about half of total profits, the earnings of the company greatly depend on the price of natural gas. As a result, there is always great uncertainty in the long-term forecasts of the earnings of this company.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025

National Fuel Gas Co. (NFG)

Updated November 18th, 2019 by Aristofanis Papadatos

National Fuel Gas is trading at a price-to-earnings ratio of 14.6, which is lower than its historical 10-year average of 17.5. If the stock reverts to its average valuation level over the next 5 years, it will enjoy a 3.7% annualized gain in its returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	51.3%	45.3%	54.8%	47.1%	43.2%	---	---	49.7%	50.3%	50.0%	55.9%	51.2%

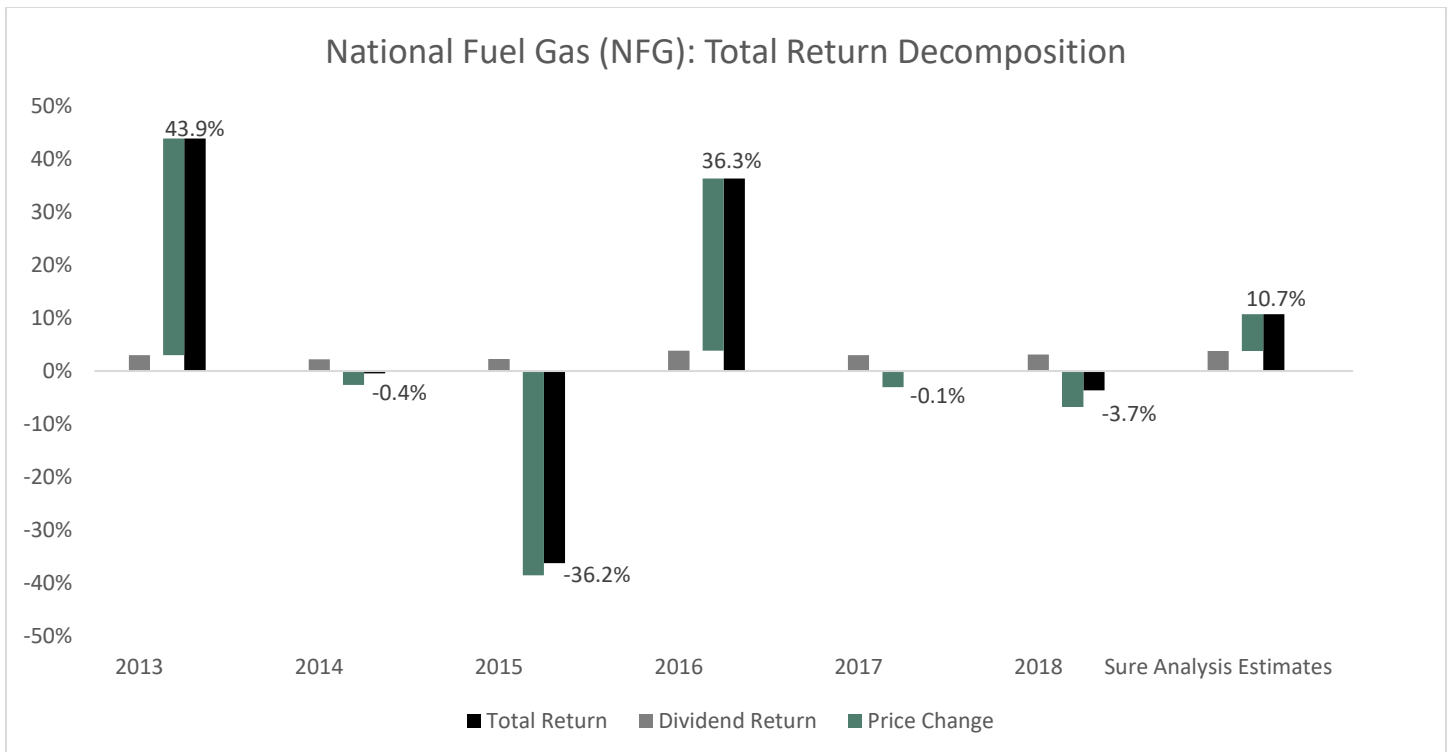

National Fuel Gas has a healthy balance sheet while its interest coverage level stands at a decent level, around 6.0. Moreover, its dividend payout ratio is sufficiently low to enable continued dividend growth even if earnings stall temporarily. Management has always targeted a dividend payout ratio around 50% in order to have a high margin of safety against the wide fluctuations of the price of natural gas. As the 3.8% dividend yield of National Fuel Gas is more than twice as much as the yield of the S&P (1.8%), the stock may entice income-oriented investors. However, these investors should be aware of the company's high dependence on the price of natural gas.

Qualitatively, National Fuel Gas' competitive advantage is its combination of regulated and stable businesses (like pipelines and utilities) with cyclical and potentially higher-growth sectors (like exploration & production). This allows the company to endure difficult operating environments with less difficulty than its peers who may focus exclusively on the more cyclical areas of the energy sector.

Final Thoughts & Recommendation

Thanks to its sustained production growth and the -25% decline of its stock price in the last seven months, National Fuel Gas could offer a 10.7% average annual return over the next five years. However, given the poor financial performance of the company in recent years and its heavy dependence on the price of natural gas, we maintain our hold rating.
