Overview & Current Events

Deere & Company is the largest manufacturer of farm equipment in the world. The company also makes equipment used in construction, forestry & turf care, produces engines and provides financial solutions to its customers. Deere was founded in 1837, is headquartered in Moline, Illinois and is currently valued at \$57 billion.

On February 21st, 2020 Deere reported Q1 2020 results for the period ending February 2nd, 2020. (Deere's fiscal year ends October 29th.) For the quarter sales came in at \$7.63 billion, representing a -4.4% decline compared to Q1 2019. The Equipment Operations, Agriculture & Turf and Construction & Forestry segments saw declines of -6%, -4% and -10% respectively during the quarter. Net income equaled \$517 million or \$1.63 per share compared to \$498 million or \$1.54 per share in last year's quarter. Deere's CEO, John May, noted that this quarter showed "early signs of stabilization in the U.S. farm sector."

Deere also reiterated its outlook for fiscal year 2020, anticipating net income of \$2.7 billion to \$3.1 billion, indicating the expectation of company-wide earnings falling -15.4% to -2.8% this year.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	\$4.35	\$6.36	\$7.64	\$9.08	\$8.63	\$5.77	\$4.81	\$6.68	\$9.39	\$9.94	\$9.15	\$12.24
DPS	\$1.16	\$1.52	\$1.79	\$1.99	\$2.22	\$2.40	\$2.40	\$2.40	\$2.58	\$3.04	\$3.04	\$4.04
Shares²	422	406	388	374	346	317	315	322	318	321	320	300

Deere's earnings-per-share are relatively cyclical. Depending on the conditions in the markets the company addresses (agriculture, forestry, and construction), demand for Deere's products can vary widely on a year-to-year basis. Overall the earnings-per-share growth trend is positive, but it took Deere five years to grow its EPS above the peak from 2013. Still, dating back to 2008 Deere has been able to grow its earnings-per-share by an average compound rate of 7% per annum. That said, earnings are expected to be materially lower this year. Moving forward we believe 6% annual growth is achievable, despite recent uncertainties.

During fiscal 2020 and beyond there are several factors that could prove positive for the company's profitability. For instance, acquisitions such as the takeover of Wirtgen Group that closed during December of 2017. Wirtgen is a German manufacturer of construction machinery, which has increased Deere's market share in this segment considerably. Expanding its presence in the construction machinery industry is an opportunistic move by Deere, as growth rates in the construction machinery business are higher than in the agriculture & turf business. With a wider presence in construction machinery Deere should be able to benefit from strong construction activity in markets such as the US and China. Although, the current trade war with China puts a large question mark over this area and indeed over the business in general.

In addition, Deere could ramp up its share repurchases in the near future. The company reduced its share count by -25% in the 2008 to 2016 timeframe, but its share count has been stagnant since.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
Avg. P/E	13.7	12.5	10.4	9.5	10.1	15.2	16.7	17.1	16.1	15.9	19.4	14.0
Avg. Yld.	1.9%	1.8%	2.3%	2.3%	2.5%	2.7%	3.0%	2.1%	1.7%	1.9%	1.7%	2.4%

During the past decade shares of Deere have traded hands with an average P/E ratio of about 14 times earnings. We believe this is a fair starting place, considering the company's reasonable growth prospects coupled with its cyclical nature. With a current valuation over 19 times earnings, this could imply a significant valuation headwind.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	27%	24%	23%	22%	26%	42%	50%	36%	27%	31%	33%	33%

Deere's dividend payout ratio has never been especially high. The company paid out a maximum of ~50% of its net profits during 2016. Since then, the payout ratio has trended downwards as earnings-per-share have risen considerably. We believe that the dividend is quite safe, but dividend growth has not been overly reliable in the past – during 2015 to 2017 the company froze its dividend at \$2.40 each year.

Deere is the largest player in the agricultural machinery manufacturing industry. This means that it is hard for new competitors to steal market share from Deere, especially since it is difficult to replicate the company's global sales and dealership network. Deere has also been growing its presence in the higher-growth construction machinery market, both organically as well as via takeovers. The company is impacted by downturns in the industries it addresses. During the last financial crisis Deere remained profitable, but its earnings-per-share declined by -40%.

Final Thoughts & Recommendation

Shares are up 4% since our last report. Deere is the market leader in the agricultural equipment industry. The company's global presence provides sizeable competitive advantages. Growth has been acceptable during the last decade and was quite strong during 2018. However, total return potential comes in at just 1.3% per annum, stemming from 6% expected growth and a 1.7% dividend yield offset by the potential for a significant valuation headwind. Our view could be too conservative if shares continue to trade at an elevated valuation, but we are reiterating our sell rating.
