Overview & Current Events

Sony Corp. is an electronics and technology company that was founded in 1946, and is headquartered in Japan. It designs and manufactures a wide range of electronics, including electronic equipment, instruments, devices, game consoles, and software, for both consumers and professionals. It has a wide variety of product segments, including video games, a movie studio, television programming, smartphones, televisions, cameras, and professional services. It also has a financial services arm which includes life and non-life insurance operations through its Japanese insurance and banking subsidiaries. The company employs approximately 117,000 people.

Sony released results for the third quarter of fiscal 2019 on 2/4/2020. All figures listed in U.S. dollars. Earnings-per-share for the quarter was \$1.68, which was a 43% decrease from the previous year. Revenue grew 6% to \$22.6 billion.

Earnings-per-share suffered a steep decline due to significant declines in Game & Network Services and Music. A decline in PlayStation4 hardware unit sales and software titles caused a 20% decline in sales and a 27% drop in operating income. Lower sales for mobile games led to a 30% sales decline and an 83% decrease in operating income for the Music segment. The consolidation of segments in the prior year also impacted results for both Game & Network Services and Music. Imaging & Sensing Solutions continued a streak of high rates of growth with a 29% improvement in sales. Operating income was higher by 62% on higher unit sales and better product mix. The Picture Segment was down by 15% due to tough year-over-year comparisons as Q3 2018 benefited from *Venom* revenues. Operating income was cut by more than half, again due to the impact of motion picture sales. The Electronics Products & Solutions Segment had a 9% drop in sales on lower smartphone and television sales, but operating income increased 21% due to cost controls within the mobile communications business. Consensus estimates for Sony have been raised to \$4.21 per ADR share, up from \$3.81 previously.

Growth on a Per-Share Basis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
EPS	-\$0.44	-\$3.12	-\$5.55	\$0.43	-\$1.21	-\$0.94	\$1.04	\$0.51	\$3.57	\$6.38	\$4.21	\$4.58
DPS	\$0.27	\$0.30	\$0.30	\$0.27	\$0.24	\$0.12	\$0.08	\$0.18	\$0.20	\$0.31	\$0.37	\$0.40
Shares³	1,004	1,004	1,004	1,011	1,044	1,169	1,261	1,263	1,265	1,270	1,270	1,270

As one can see in the above table, Sony has had difficulty maintaining consistent profitability over the past 10 years. This is due to the intensely competitive forces inherent in the consumer electronics industry. Sony has to spend billions on research and development, as well as advertising in order to stay ahead of the competition. While earnings were up significantly in 2017 and 2018, we maintain our growth expectations of 1.7% as Sony has not yet demonstrated longer-term consistency.

Valuation Analysis

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	Now	2024
Avg. P/E	---	---	---	30.7	---	---	25.6	58.9	11.7	13.0	17.3	13.0
Avg. Yld.	0.9%	0.9%	1.4%	2.0%	1.3%	0.6%	0.3%	0.6%	0.5%	0.6%	0.5%	0.7%

Sony's stock valuation has been highly volatile over the past decade. Furthermore, in 6 of the 10 years Sony posted a net loss, which meant that a price-to-earnings ratio could not be computed. As such, history does not lend itself to a fair judgment of value. We assign a 2024 price-to-earnings ratio of 13 to the stock as we are not willing to award the security a premium, or even average multiple. It is true that this view could be understated if earnings were to start growing from this point. However, given the recent past, we believe Sony needs to sustain growth over the intermediate-term to warrant a higher valuation. Shares of Sony have increased \$12, or 20%, since our 10/31/2019 update. Using updated estimates for fiscal 2019, the stock trades with a P/E of 17.3. If the stock reverts back to our target P/E over the next five years, then valuation would be a 5.6% headwind to annual returns over this time frame.

Sony pays a semi-annual dividend. The first dividend payment is paid in June, and the second installment is paid in December. It should be noted that buying shares of international stocks exposes investors to currency risk as well as dividend withholding taxes.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2024
Payout	---	---	---	63%	---	---	8%	35%	6%	6%	9%	9%

Sony struggled to post a profit not just during the last recession, but throughout the last decade. Significant improvements have been made as of late, with much higher earnings to show for it, but the company's businesses are finicky and require substantial R&D investment to stay ahead of changing trends in the tech industry.

Sony is one of the top companies in the entertainment space and produces top of the line products. For example, Sony's image sensor is considered to be ideal for creating high quality pictures. The company's image sensor has been used by leading smart phone manufacturers, including Apple (APPL), which has used Sony's image sensor since the iPhone 4. Sony has also worked to create an ecosystem for its products, including its PlayStation segment, which offers a monthly subscription for consumers.

Final Thoughts & Recommendation

After reviewing results for third quarter of fiscal 2019 and taking into account the change in share price since our last update, Sony Corporation is now expected to lose 3.4% per year over the next five years, down from our prior estimate of a loss of 1.9%. The company had solid revenue growth during the quarter while earnings-per-share were impacted by declines in key businesses. We have increased our 2024 price target \$6 to \$60, but shares continue to receive a sell recommendation from Sure Dividend due to projected returns over the next five years.
