Overview & Current Events

Costco's humble beginning in a converted airplane hangar has given way to a powerhouse in an industry it helped create. Today, Costco is a diversified warehouse retailer that operates about 800 warehouses that collectively generate in excess of \$160 billion in annual sales. Costco's leadership in this industry has rewarded shareholders handsomely over the years as it sports a \$130 billion market capitalization.

Costco reported Q2 earnings on March 5th and results were better than expected on the top and bottom lines. Total revenue was up 10.5% to \$38.3 billion for the quarter and 8.1% to \$74.5 billion for the first half of the year. Comparable sales rose 7% in the US in the first half of the year, and 6.6% for the whole company. Excluding gasoline sales and foreign exchange, comparable sales rose 6.6% in the US and 6.5% company-wide. Digital sales were 28% of revenue in the second quarter and 17.3% in the first half of the year.

Net income for the quarter was \$931 million, or \$2.10 per share, up from \$889 million, or \$2.01 per share. For the first half of the year, net income was \$1.77 billion, or \$4.00 per share, up from \$1.66 billion or \$3.74 per share.

Costco has been an obvious winner in the coronavirus tragedy as consumers fight to keep their pantries and refrigerators stocked. As a result, we've bumped our earnings-per-share estimate for this year to \$8.75.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	\$2.93	\$3.30	\$3.97	\$4.49	\$4.65	\$5.27	\$5.33	\$5.82	\$7.09	\$8.26	\$8.75	\$12.56
DPS	\$0.77	\$0.89	\$1.03	\$1.17	\$1.33	\$1.51	\$1.70	\$1.90	\$2.14	\$2.44	\$2.60	\$4.19
Shares³	434	434	432	437	438	438	438	437	442	443	444	455

We see Costco's forecasted growth as pretty straightforward; sales growth will continue to make up most of its predicted growth. Its model does not allow for expanding profit margins because its retail pricing is intended to be as low as possible for consumers. We are forecasting 7.5% earnings-per-share growth annually in the coming years as gross margin gains and SG&A spending continue to roughly offset each other.

The vast majority of Costco's operating margin dollars come from its membership fees, which continue to grow at strong rates, but are a very small fraction of total revenue. This is 100% margin revenue and fuels higher comparable sales, as well as more members and more people in the stores buying. The company does not buy back stock in any sort of meaningful quantity so that is not a source of earnings growth. Steadily higher comparable sales should be enough to keep earnings growing at our forecast rate of 7.5% annually. Given Costco's outstanding track record on growing sales, we aren't ready to cut our growth estimate just yet. Comparable sales gains have slowed in recent quarters, but they are down from high single-digit values into the mid-single-digits, so the company is hardly struggling. Still, should comparable sales continue to see decelerating growth, we may have to reexamine our growth rate. The first half of this year has been strong thus far, so we are optimistic.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
Avg. P/E	19.9	22.1	21.9	23.4	25.1	26.7	29.0	27.6	28.1	27.8	33.7	24.0
Avg. Yld.	1.3%	1.2%	1.2%	1.1%	1.1%	1.1%	1.1%	1.2%	1.1%	1.0%	0.9%	1.4%

Costco's price-to-earnings multiple has been elevated for some time as investors have applied a premium to the stock due to the company's excellent performance. However, that premium has made the stock expensive against its historical multiples and as a result, we see a -6.6% headwind to annual total returns as the valuation moves down over time. Costco shares are as expensive right now as they have been in the past decade, so we certainly think the stock is overvalued. Given the slowdown in top line growth, this valuation surge is occurring at exactly the wrong time.

We see the yield as rising slightly over time as the stock drifts back towards a more normalized valuation, and as the payout continues to grow at a strong pace. We don't believe Costco will be an income stock anytime in the foreseeable future, but its payout growth should be robust.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	26%	27%	26%	26%	28%	28%	32%	33%	30%	30%	30%	33%

Costco's payout ratio is quite low at 30% for this year, and we believe it will remain under 40% going forward. The company certainly has the ability to boost the dividend at a much higher rate, but has thus far chosen not to. Regardless, Costco's dividend is ultra-safe, but of course, the yield is unattractive at this point.

Costco's competitive advantage is in its leadership position in a category it created and as Sam's Club closes down stores, that position should strengthen. It is not immune from a recession, but damage during the last one was slight.

Final Thoughts & Recommendation

Costco looks like a high growth stock that happens to be trading well above fair value. We see 1.6% total annual returns over the next five years, as the company's impressive growth rate is nearly offset by a valuation reset. Costco's growth outlook is quite robust, but the yield is low and the valuation is extremely high. We suggest waiting for a better entry price as Costco looks priced for perfection and then some. We rate Costco as a sell due to its excessive valuation.
