Overview & Current Events

FedEx Corp. is a transportation and shipping company. It was founded in 1971. The company offers a variety of services including transportation, e-commerce, and business services. It operates four core segments: FedEx Express, FedEx Ground, FedEx Freight, and FedEx Services. FedEx provides domestic and international shipping for package delivery and freight. It also provides sales, marketing, information technology, communications, customer service, technical support, billing, and collection services.

On 03/17/20, FedEx reported financial results for the fiscal Q3. For the quarter, revenue increased 3% to \$17.5 billion against the comparable quarter a year ago. The adjusted operating margin of 2.8% saw a great compression of 3%. This led to net income falling 57% to \$315 million and adjusted earnings-per-share (EPS) falling 53% to \$1.41. FedEx management admitted there were many headwinds, including “the impact of the coronavirus, higher self-insurance accruals, an unfavorable variable incentive compensation comparison, increased FedEx Ground costs from expanded service offerings, the loss of business from a large customer, a continuing mix shift to lower-yielding services and a more competitive pricing environment.” In fact, there’s so much uncertainty, particularly from the coronavirus pandemic, that management decided to suspend its earnings forecast for fiscal 2020.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	\$3.76	\$4.90	\$6.59	\$6.23	\$6.75	\$8.95	\$10.80	\$12.30	\$15.31	\$15.52	\$10.09	\$13.50
DPS	\$0.44	\$0.48	\$0.52	\$0.56	\$0.60	\$0.80	\$1.00	\$1.60	\$2.00	\$2.60	\$2.60	\$3.48
Shares¹	314.0	317.0	317.0	318.0	287.0	282.4	265.5	268.3	272.0	260.9	260.9	248.1

We were already forecasting a 30% decline in EPS for FedEx this fiscal year. There’s one more quarter to go for the fiscal year. We’re going to go ahead and be more prudent and lower our estimate to a 35% decline in EPS for fiscal 2020. For now, we’re maintaining our five-year EPS growth estimate of 6%. Because of the weak outlook, management has decided to keep the same dividend for 8 consecutive quarters so far. However, when the world economies improve, the company will increase its dividend again. We reduce our dividend growth rate estimate from 10% to 6% through 2025 because of the many headwinds. As a global transport, FedEx is an economic “bellwether”, a term used to describe a company that benefits from global economic growth (and vice versa). In the last recession, FedEx’s adjusted earnings-per-share declined about 44% over a two-year period. In the last update, we warned that “it’s possible that a downturn will happen again”. It’s happening now, and it’s at a global level. So, this time, the economic woes will likely take longer to recover. However, expect strong growth to occur when it happens. For example, FedEx’s adjusted earnings-per-share increased by about 19% per year from fiscal 2010-2018.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025

FedEx Corporation (FDX)

Updated March 17th, 2019 by Kay Ng

Because of its sensitivity to economic growth (and decline), historically, FedEx has traded for a wide range of P/E's. FedEx trades at a P/E of 9.4, which is well below its 2010-2019 average P/E of 16.1. In the past 20 years, time and time again, FedEx had traded at fair P/E's of 16.6-17.7. Because of the weak outlook, we expect lower earnings will compress the P/E. So, we're setting a fair P/E of 15 for 2025. Therefore, the stock appears to be severely undervalued for long-term investment. Expansion of the stock valuation could add 9.8% annually to returns over the next five years.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	12%	10%	8%	9%	9%	9%	9%	13%	13%	17%	26%	26%

FedEx scores high in safety and quality. It is consistently profitable and has a strong balance sheet. It generates more than enough cash flow to satisfy its debt obligations, invest in growth, and return cash to shareholders. The interest coverage ratio is high, and the dividend payout ratio is low. FedEx has a strong competitive advantage. It essentially operates in a duopolistic industry, alongside United Parcel (UPS). These two companies dominate the ground and air package delivery industry. This means FedEx gets a certain level of demand each year and tends to generate strong profit margins and cash flow. Amazon (AMZN) performing its own fulfillments will be of little impact to FedEx because Amazon contributed less than 1.3% of FedEx's revenue in 2018. So, FedEx's economic moat is intact. FedEx estimates to invest \$5.9 billion in capital expenditures in fiscal 2020 to maintain its competitive advantages. However, FedEx is not a recession-resistant business. While the company should remain profitable in a downturn, its revenue and earnings are likely to decline in a recession. However, the dividend is unlikely to be cut even in a severe recession thanks to its low payout ratio.

Final Thoughts & Recommendation

FedEx will eventually grow its dividend again. Right now, it will experience lower profitability during harsh economic times. The current yield of 2.7% is below average. However, FedEx is a quality business with durable competitive advantages that can deliver strong long-term returns. We forecast 6% annual earnings growth and a boost of 9.8% per year from P/E multiple expansion. Due to an expected return of 18.1% per year, FedEx currently earns a buy recommendation from Sure Dividend.
