Overview & Current Events

CSX can trace its roots all the way back to 1827 when the B&O Railroad was first chartered. From just 13 miles of track, CSX has grown to cover 23 states and more than 20,000 route miles. CSX provides rail, rail-to-truck and intermodal transport services. The company's market capitalization is \$49 billion after a recent rally in the stock, and it should produce under \$11 billion in revenue this year.

CSX reported Q1 earnings on April 22nd, with revenue slightly missing expectations and earnings coming in higher than expected. Revenue was down -5% year-over-year to \$2.86 billion, as growth in revenue from general merchandise was more than offset by sizable declines in coal and other revenue. Expenses were down -7% year-over-year as CSX's intense focus on operating efficiency paid off once again. Indeed, the company's operating ratio fell 80bps to a Q1 record of 58.7%, meaning it spent less on operating expenses as a percentage of revenue than it ever has in Q1.

Operating income was off -3% despite higher margins, falling from \$1.22 billion to \$1.18 billion in Q1. Net earnings came to \$770 million, or \$1.00 per share, against \$834 million, or \$1.02 in the year-ago period.

We are cautious on railroads for 2020 given that the surge in merchandise volume has been more than offset by energy demand, automobiles, and a variety of other critical cargos for railroads. As such, we've cut our estimate for earnings-per-share to \$3.55 for this year, but expect a rebound in 2021 and beyond.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	\$1.36	\$1.67	\$1.79	\$1.83	\$1.92	\$2.00	\$1.81	\$2.30	\$3.85	\$4.17	\$3.55	\$5.46
DPS	\$0.33	\$0.45	\$0.54	\$0.59	\$0.63	\$0.70	\$0.72	\$0.78	\$0.88	\$0.96	\$1.04	\$1.75
Shares³	1,111	1,049	1,021	1,009	992	966	928	890	860	778	750	650

CSX's earnings-per-share has grown somewhat unpredictably over the past decade as its fortunes are tied to rail volumes and pricing strength, both of which are heavily dependent upon particular industries and economic conditions. CSX stands to gain in the form of modest revenue increases in the coming years, helping to fuel our estimate of 9% earnings-per-share growth annually. The remainder will come from improved operating efficiency leading to higher margins, as well as sizable buyback spending. We see the share count declining in the mid-single-digits annually as CSX generates strong free cash flow and puts it to use. We are becoming increasingly more concerned with revenue headwinds, but operating efficiency and buybacks should keep earnings-per-share moving higher.

Likewise, we see the dividend increasing at roughly the rate of earnings, reaching \$1.75 in five years from today's level of \$1.04. CSX has put buybacks first in recent years but with a much-reduced capex budget as part of its operational efficiency initiatives, more cash should be freed up for dividend increases. With the payout ratio still very low, CSX has plenty of room to continue its streak of dividend increases while still affording it the ability to buy back stock.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
Avg. P/E	13.2	14.0	12.1	13.6	16.1	15.7	15.5	21.8	16.8	17.2	18.0	15.0
Avg. Yld.	1.8%	1.9%	2.5%	2.4%	2.0%	2.2%	2.6%	1.6%	1.4%	1.3%	1.6%	2.1%

CSX's price-to-earnings multiple has moved somewhat lower as the share price and earnings estimates have fallen at about the same rate, and is now 18.0 times our expectation for 2020 earnings. This is well in excess of our estimate of fair value of 15 times earnings, so we see a -3.6% headwind to total returns from the valuation moving forward.

We see the yield moving up to 2.1% over time from the current 1.6%. This stems from the dividend moving higher but also, if the valuation reverts back to our estimate of fair value, the yield would move higher. The dividend was raised from \$0.96 to \$1.04 for 2020.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	24%	26%	30%	32%	33%	35%	40%	34%	23%	23%	29%	32%

CSX's payout ratio remains low and consequentially, is well covered. The company has experienced high rates of earnings growth in recent years, so the payout ratio has fallen as a result of earnings rising, not because the company cannot afford to pay its dividend. Indeed, its dividend safety is outstanding, but we note that the company has made it clear buybacks take priority over dividend growth.

The company's competitive advantage is in its lean operating structure, as well as its dominance in its service area. CSX looks poised to gain from its leverage to intermodal transport and the coal export market, although these things will not save it from the next recession; rail operators are particularly sensitive to economic conditions and we see that as the key risk to owning CSX in the coming years.

Final Thoughts & Recommendation

In our view, CSX is still trading above fair value. It could see total annual returns in the next five years of 6.9%, consisting of the low current yield, 9% earnings growth and a meaningful headwind from the valuation. CSX would therefore be appropriate for dividend growth investors as well as those seeking growth, but the low current yield would make it unattractive for those seeking current income. In addition, the valuation has kept CSX out of value stock territory once again. Due to the move higher in the valuation, we are reiterating our hold rating. The current valuation is high, but we see a rebound for the company in the coming years, along with strong dividend growth.
