Overview & Current Events

Old Republic was founded back in 1907, and the past 113 years have not always been easy. However, the company has persevered and today, it markets, underwrites and provides risk management services for a variety of general and title insurances. It generates about \$5 billion in annual revenue and its market capitalization is \$7 billion. Old Republic also has an outstanding dividend increase streak of 39 years.

Old Republic reported Q1 earnings on April 23rd, with results beating expectations on the top and bottom lines. The company's total operating revenue came to \$1.65 billion, representing a 9.7% gain year-over-year. Consolidated underwriting composite ratio came to 94.9%, an improvement from 96.0% in the year-ago period. Net investment income rose slightly, adding 1.8% to \$114 million in Q1.

The company's common stock portfolio took significant mark-to-market losses late in Q1 as stock markets around the world fell sharply. This led to a decline in book value per share from \$19.98 at the end of 2019 to \$17.29 at the end of Q1. These losses should be temporary as equity markets have rebounded significantly since then.

Total operating loss came to -\$605 million in Q1, but excluding investment gains and losses, earnings would have been \$0.47 per share, up from \$0.40 in last year's Q1.

Management sounded bearish in its guidance wherein it suggested that future fee revenue from its residential and commercial real estate markets could fall if the economic downturn hurts real estate prices. We've reduced our estimate of earnings-per-share for this year from \$1.90 to \$1.55 as a result of this.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	-\$0.16	-\$0.86	-\$0.39	\$1.25	\$0.84	\$1.28	\$1.47	\$1.11	\$1.86	\$1.84	\$1.55	\$1.89
DPS	\$0.69	\$0.70	\$0.71	\$0.72	\$0.73	\$0.74	\$0.75	\$0.76	\$0.78	\$0.80	\$0.84	\$1.05
Shares³	259	259	259	260	261	262	263	269	303	303	303	303

As one would expect, Old Republic's earnings-per-share has been very volatile during the past decade. Insurers have notoriously unpredictable earnings and Old Republic is certainly no exception, having seen its earnings plummet and skyrocket multiple times in this period. To this end, we see Old Republic adding 4% annually to earnings-per-share, down from our previous estimate of 7%.

This rate of growth will be possible as the company looks to continue its low to mid-single-digit growth in premiums, strong investment income as well as lower losses, with recent results supporting this. Keep in mind, however, that gains likely will not be linear as the insurance business is highly cyclical, and that expenses have been rising in recent periods. Still, Old Republic looks poised for growth ahead, particularly if equity markets are strong. We note that additional

Old Republic International Corp. (ORI)

Updated April 27th, 2020 by Josh Arnold

caution is warranted for this year given the extreme uncertainty surrounding the COVID-19 pandemic, but long-term holders should find value in Old Republic's earnings streams and growth prospects.

The dividend will likely continue to grow at a relatively slow pace as dividend increases in the past decade have been very small. It did pay a \$1 special dividend early in 2018, and again in late 2019. The stock's yield is still very strong even with its sluggish payout growth, so income investors will likely find it attractive.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2024
Avg. P/E	---	---	---	11.2	18.6	12.5	12.6	18.0	11.4	12.0	10.2	12.5
Avg. Yld.	5.4%	6.3%	7.3%	5.1%	4.7%	4.6%	4.1%	3.8%	3.7%	3.6%	5.3%	4.4%

Old Republic's price-to-earnings multiple has been volatile in recent years, but that has mostly been due to changes in earnings and not valuation resets from investors. Our estimate of fair value for Old Republic is 12.5 times earnings, which is higher than the current 10.2, and lower than its average of 14. We are therefore forecasting a ~4% tailwind to annual total returns from the valuation over the coming years.

We see the yield staying very strong as growth in the dividend could be roughly matched by growth in the share price. The wildcard is the recent special dividends the company paid in lieu of larger quarterly dividend increases, but we think Old Republic will continue to be a strong income stock for years to come.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	---	---	---	58%	87%	59%	51%	68%	42%	43%	54%	56%

The payout ratio has fallen significantly in recent years. Given slow payout growth coupled with strong earnings that trend could continue. Overall, Old Republic is in significantly better shape than it was a few years ago.

Old Republic operates in a tremendously competitive field, making advantages hard to come by. However, it sets itself apart with its strong premiums against claims, the product of prudent underwriting. Investors would do well to remember that Old Republic, and indeed the insurance industry as a whole, will likely suffer during this downturn.

Final Thoughts & Recommendation

Overall, Old Republic looks compelling if one can stomach the potential risk of owning an insurer. The stock is now well below fair value in our view and offers forecasted total annual returns of 12.4% in the coming years, consisting of the current 5.3% yield, 4% earnings-per-share growth and a modest tailwind from the rising valuation. The only caveat is that owning any insurer is an exercise in patience as Old Republic's growth will likely be far from constant. We are reiterating Old Republic with a buy rating on the very low valuation, which we think prices in current risks.
