Overview & Current Events

Iron Mountain is a storage and information management REIT. Its services include record management, destruction, fulfillment services, data protection and recovery, server and computer backup services, and safeguarding of electronic and physical media. Iron Mountain operates in North and Latin America, Europe and the Asia Pacific region. The trust was founded in 1951, is headquartered in Boston, MA.

Iron Mountain reported its first quarter earnings results on May 7. The trust announced that it generated revenues of \$1.07 billion during the quarter, which was up 1.9% from the revenues that Iron Mountain generated during the previous year's quarter. This was slightly below what the analyst community had forecast. Revenues would have been higher by 3.2% year-over-year at constant forex rates, which is not at all a bad result for a REIT.

Iron Mountain's funds-from-operations came in at \$0.59 per share during the first quarter, which was up 20% compared to the previous year's quarter, which had been rather weak. Iron Mountain has taken back its previously announced guidance for 2020, as the impact of the coronavirus crisis is not yet known. During the first quarter, the virus crisis did not have a meaningful impact, and the operating performance was quite solid, but management thinks it is possible that the impact will be bigger during the remainder of the year, although a deterioration is not at all guaranteed.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
FFOPS¹	\$2.72	\$3.03	\$2.76	\$2.70	\$2.95	\$2.84	\$2.72	\$2.92	\$3.05	\$2.98	\$2.95	\$3.42
DPS	\$0.34	\$0.86	\$1.00	\$1.08	\$1.49	\$1.91	\$2.04	\$2.24	\$2.37	\$2.44	\$2.47	\$2.60
Shares²	218	187	190	192	210	211	264	283	283	287	289	298

Iron Mountain is not a high-growth investment trust, but it still managed to increase its cash flows per share by 3% annually since 2009. Growth has been driven by several contributing factors. The first one is organic revenue growth, primarily through pricing increases. Iron Mountain has achieved organic revenue growth rates of ~3% in the past, and guides for organic revenue growth of 3% to 5% annually in the future.

Iron Mountain repeatedly made takeovers and asset purchases over the last couple of years, which drove revenue growth further. These acquisitions were partially funded via debt, which is why the trust is relatively highly leveraged. Acquisitions were also partly funded via equity, though, which is why Iron Mountain's share count has been rising steadily. As long as Iron Mountain's takeovers provide higher returns than its cost of capital, those acquisitions are accretive and beneficial for Iron Mountain's current shareholders. Iron Mountain's management forecasts that its revenues could rise by up to 5% a year on an organic basis in the long run, and that EBITDA could rise by 5%+ annually. Due to the weaker growth rate during the last decade and during recent quarters, we use a somewhat lower estimate for Iron Mountain's long term cash flow growth. 2019 was not a strong year for Iron Mountain, as funds from operations declined slightly versus 2018. The start to 2020 was solid, but not spectacular, and it remains to be seen what the rest of the year will look like. Right now, we expect that results will not change much from 2019 to 2020.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
P/FFO	8.0	9.3	10.7	11.5	10.9	11.7	12.6	12.5	10.5	10.7	8.5	10.5
Avg. Yld.	1.6%	3.1%	3.4%	3.5%	4.6%	5.8%	6.0%	6.1%	7.6%	7.6%	10.1%	7.2%

Iron Mountain has not traded at a high valuation throughout the last decade, which is not surprising. Due to the low growth rate that Iron Mountain has achieved during that time frame, shares were primarily valued based on the income yield that Iron Mountain provides to its owners. Shares trade below our fair value estimate today.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	12.5%	28.4%	36.2%	39.7%	50.5%	67.3%	75.0%	76.7%	77.7%	81.9%	83.7%	77.8%

Iron Mountain pays out a quite large portion of its cash flows to its owners in the form of dividends. Iron Mountain has increased its dividend regularly, although the dividend growth rate has slowed down in recent years. This seems reasonable, as cash flows have not grown very quickly either. The payout ratio is rather high, but not necessarily unsustainable. Iron Mountain's dividend would be vulnerable if the trust's cash flows came under a lot of pressure.

Iron Mountain's focus on secure data storage sets the trust aside from competitors in the storage industry by providing a unique focus. The trust is active in several geographic markets across the US and internationally, and plans to expand its international operations further. This geographic diversification, coupled with the fact that demand for its services is not very cyclical, means that Iron Mountain is relatively resilient to recessions, which should help during the current crisis. Cash flows continued to grow during the last financial crisis, resulting in a strong recession performance.

Final Thoughts & Recommendation

Iron Mountain is active in a low-growth, recession-resilient industry. Its unique focus on secure data storage, and its customer base that includes most of the large US corporations, provide for a relatively safe business model. Iron Mountain does not operate a high-growth business, total returns will therefore mostly come from its dividend payments. The total return outlook is strong, which is why we rate Iron Mountain a buy at current prices.
