Overview & Current Events

KLA-Tencor Corporation is a supplier to the semiconductor industry. The company supplies process control and yield management systems for semiconductor producers such as TSMC, Samsung and Micron. KLA-Tencor was created in 1997, through a merger between KLA Instruments and Tencor Instruments, and has grown through a range of acquisitions since then. The company is headquartered in Milpitas, CA.

KLA-Tencor reported its third quarter (fiscal 2020) earnings results on May 5. The company reported revenues of \$1.4 billion for the quarter, which represents an increase of 29% compared to the prior year's quarter. This revenue growth rate was slightly stronger than what the analyst community had expected, as KLA-Tencor's top line beat the analyst consensus by \$20 million. KLA-Tencor's Product segment revenue grew 32% year-over-year, while the Services segment grew at a pace of 23% year-over-year. This was a reversal from previous quarters, during which Services revenues had been growing at a faster pace compared to Product revenues.

KLA-Tencor generated earnings-per-share of \$2.47 during the third quarter, which beat estimates by \$0.11, and which was up by a massive 37% compared to the previous year's quarter. The coronavirus crisis is not having a big impact on KLA-Tencor so far, and 2020 should be a new record year for the company, with profits rising well above \$9.00 per share.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	\$1.54	\$4.91	\$4.64	\$3.21	\$3.47	\$2.98	\$4.66	\$5.94	\$7.50	\$8.46	\$9.80	\$14.74
DPS	\$0.60	\$1.00	\$1.40	\$1.60	\$1.80	\$2.00	\$2.08	\$2.14	\$2.52	\$3.00	\$3.40	\$5.48
Shares³	168	167	167	165	165	158	156	157	156	156	155	150

KLA-Tencor grew its earnings-per-share by ~20% annually between 2010 and 2019, although growth has been quite uneven. During 2009 the company reported net losses, and it has reported year-over-year earnings declines several times since then. Growth has seemingly stabilized during the last couple of years. From 2015 to 2018 the company reported strong results, and during fiscal 2019 the company hit new record profits.

KLA-Tencor's earnings-per-share growth has historically come from a mix of revenue growth, margin improvements, and share repurchases. The revenue growth outlook remains strong, as KLA-Tencor has been able to grow its sales considerably during the last couple of quarters. The majority of KLA-Tencor's revenues come from product sales, but service revenues are becoming increasingly important. This is a positive in the long run, as a higher rate of recurring service revenues should help KLA-Tencor's top line become less cyclical.

The semiconductor industry profits from massive tailwinds such as the Internet of Things, big data, autonomous driving, and cloud computing. These trends drive demand for chips, which means that companies such as Samsung and TSMC are increasing capacity to be able to meet demand, which fuels their demand for KLA-Tencor's products. KLA-Tencor Corporation (KLAC)

Updated May 18th, 2020 by Jonathan Weber

markets recovering from a period of low prices helps KLA-Tencor. KLA-Tencor has also made several acquisitions in the past, which have added to its growth, such as the \$3.4 billion takeover of Orbotech that closed in early 2019.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
Avg. P/E	20.9	7.9	9.9	15.9	18.2	22.8	13.6	14.1	13.6	14.4	17.4	15.0
Avg. Yld.	1.9%	2.6%	3.0%	3.1%	2.8%	2.9%	3.3%	2.5%	2.9%	2.5%	2.0%	2.0%

KLA-Tencor trades at more than 17 times this year's net earnings, which is not an overly high valuation in absolute terms. It nevertheless represents a premium to our fair value estimate, as we believe that shares have downside potential towards a price to earnings multiple of 15. KLA-Tencor offers an unspectacular dividend yield at current prices.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	39.0%	20.4%	30.2%	49.8%	51.9%	67.1%	44.6%	36.0%	33.6%	35.5%	34.7%	37.2%

KLA-Tencor did not raise its dividend during the last financial crisis, but since then the dividend has been raised very consistently. KLA-Tencor was not profitable during 2009, but the company chose to maintain its dividend nevertheless. The payout ratio looks highly sustainable, although the cyclical nature in KLA-Tencor's earnings could make the payout ratio rise substantially during another global economic downturn that hurts chip markets massively.

KLA-Tencor is a key supplier to the largest semiconductor companies, and therefore a relevant part of this large industry that is extremely important to our modern way of life. KLA-Tencor is the market leader in the process control sector. Its scale and size give it advantages over competitors when it comes to receiving big contracts, and through better economies of scale, KLA-Tencor also has the ability to achieve higher margins than smaller peers. KLA-Tencor's business is cyclical, as lower spending by semiconductor manufacturers during market downturns hurts KLA-Tencor.

Final Thoughts & Recommendation

As an important supplier to the very large semiconductor industry, KLA-Tencor benefits from megatrends that increase the global demand for chips, such as the Internet of Things. KLA-Tencor should be able to capitalize on these trends by growing its earnings-per-share, and despite the fact that shares trade slightly above fair value, the total return outlook is not bad. We rate KLA-Tencor a hold at current prices, and a potential buy at or below fair value.
