Overview & Current Events

Prudential Financial, now in business for over 140 years, operates in the United States, Asia, Europe and Latin America, with \$1.5 *trillion* in assets under management. The company provides financial products – including life insurance, annuities, retirement-related services, mutual funds and investment management. Prudential operates in four divisions: PGIM (formerly Prudential Investment Management), U.S. Workplace Solutions, U.S. Individual Solutions, and International Insurance. The \$23 billion market cap company employs approximately 50,000 people.

On May 4th, 2020 Prudential released Q1 2020 results for the period ending March 31st, 2020. For the quarter Prudential reported a net loss of -\$271 million (-\$0.70 per share) compared to net income of \$932 million (\$2.22 per share) in Q1 2019. However, these results included substantial investment losses. On an adjusted basis, operating income totaled \$939 million (\$2.32 per share) compared to \$1.259 billion (\$3.00 per share) in the year ago period. Results were helped by a lower share count. Adjusted book value per share totaled \$99.71, against \$96.76 in the year-ago quarter. At quarter-end Prudential held \$1.481 trillion in assets under management compared to \$1.456 trillion in Q1 2019.

Growth on a Per-Share Basis

| Year | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2025 |
|---------------------|--------|--------|--------|--------|--------|---------|--------|---------|---------|---------|---------|---------|
| EPS | \$6.27 | \$6.41 | \$6.27 | \$9.67 | \$9.21 | \$10.04 | \$9.13 | \$10.58 | \$11.69 | \$11.69 | \$10.50 | \$12.77 |
| DPS | \$1.15 | \$1.45 | \$1.60 | \$1.73 | \$2.17 | \$2.44 | \$2.80 | \$3.00 | \$3.60 | \$4.00 | \$4.40 | \$5.35 |
| Shares ² | 484 | 468 | 463 | 461 | 454 | 447 | 430 | 423 | 411 | 399 | 400 | 380 |

If you look at 2007 (when the company was earning \$7.31 and paying out \$1.15) through 2019, Prudential has grown earnings-per-share by about 4.0% per year and the dividend has compounded at a rate of roughly 11.8% per annum.

Higher interest rates and general economic improvement could be positives for the company's growth prospects over the long-term. Of course, there are offsetting factors; chief among them being lower rather than higher rates in the short-term. The majority of Prudential's business is in the U.S. and Japan, both of which are mature markets where we do not anticipate above average growth. Life insurance and annuities are highly competitive industries. Further, insurers do not know the price of the goods sold for years, allowing for the temptation to underprice policies in search for growth. We believe a slow, steady and profitable approach in this industry is prudent.

In addition, the current COVID-19 pandemic is set to impact the business. We have reduced our expectation for 2020 earnings and presume a 4% growth rate. This implies reduced expectations over the intermediate term and could turn out to be too optimistic or pessimistic depending on the length of the pandemic.

Valuation Analysis

| Year | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | Now | 2025 |

Prudential Financial Inc. (PRU)

Updated May 7th, 2020 by Eli Inkrot

In the last decade shares of Prudential have traded hands with an average P/E ratio between 8- and 9-times earnings. This may seem low compared to your average firm, but this has been typical of insurers. However, with shares currently trading at 5.4 times expected earnings, this still implies the potential for a substantial valuation tailwind.

The dividend ought to add meaningfully to shareholder returns as well, as it sits above 7% and takes up less than half of earnings – leaving ample room for growth. Note the payment was increased 10% to \$1.10 per quarter earlier this year.

Safety, Quality, Competitive Advantage, & Recession Resiliency

| Year | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2025 |
|--------|------|------|------|------|------|------|------|------|------|------|------|------|
| Payout | 18% | 23% | 26% | 18% | 24% | 24% | 31% | 28% | 31% | 34% | 42% | 42% |

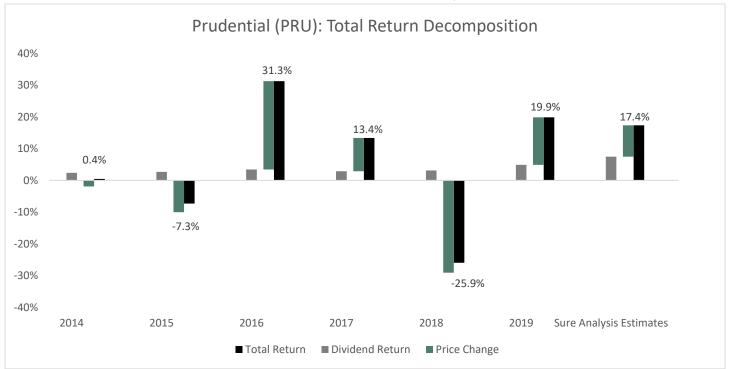

While Prudential is highly profitable and well-known, we do not believe the firm carries a significant competitive advantage over its competitors as the products it sells are highly commoditized.

During the last recession, Prudential generated earnings-per-share of \$7.31 in 2007 followed by \$2.69, \$5.58 and \$6.27 in 2008 through 2010. It wasn't until 2014 that earnings finally eclipsed their pre-recession peak. Similarly, the dividend was slashed from \$1.15 in 2007 down to \$0.58 in 2008 and did not recover until 2010. This sort of cyclicality is certainly possible in the next downturn. Still, the company has a reasonable payout ratio and financial position. We do note that while earnings dipped significantly during the last recession, dilutive activity was not excessive.

Final Thoughts & Recommendation

Shares are down -40% since our last report amid the coronavirus pandemic and much lower interest rates. Prudential has proven to be a solid business over the years with a variety of positive attributes. We are forecasting 17.4% annual total return potential, stemming from 4% growth, a 7.7% starting dividend yield and a meaningful valuation tailwind. There is a lingering negative: even in good times growth is not especially robust and in lesser times the rate of improvement can fall off the rails completely. Still, with shares down materially, the security earns a buy rating.
