Overview & Current Events

On May 3rd, 2019, TransCanada Corporation changed its name to TC Energy Corporation. TC Energy Corporation operates Canada's largest natural gas pipeline system. The company owns more than 57,000 miles of natural gas pipelines and more than 3,000 miles of liquids pipelines. TC Energy Corporation operates through three segments: Natural Gas Pipelines, Oil Pipelines, and Energy. The Natural Gas Pipelines segment generated 66% of consolidated revenue in the most recent fiscal year. TC Energy Corporation is headquartered in Calgary, Alberta, Canada, and its common shares are cross listed on both the Toronto Stock Exchange and the New York Stock Exchange, where they trade with a market capitalization of US\$39.6 billion. In this report, all figures are reported in U.S. dollars.

In early May, TC Energy reported (5/1/20) financial results for the first quarter of fiscal 2020. The company grew its earnings-per-share 10% thanks to the strong performance of its legacy assets and the contribution from \$1.6 billion of growth projects that were placed into service in the quarter. Thanks to the strong demand for its assets, the company continued to enjoy almost historically high utilization rates. The energy market is going through a downturn due to the coronavirus, but the natural gas market has proved more resilient than the oil market. In addition, TC Energy is largely insulated from the downturn thanks to its regulated assets and its long-term contracts, which generate 95% of its EBITDA. Due to the pandemic, we slightly lowered our earnings-per-share forecast for the year, from \$3.20 to \$2.90.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	\$1.77	\$2.12	\$1.84	\$2.28	\$2.12	-\$1.26	\$0.12	\$2.38	\$2.97	\$3.18	\$2.90	\$3.53
DPS	\$1.60	\$1.65	\$1.76	\$1.73	\$1.66	\$1.50	\$1.68	\$1.99	\$2.12	\$2.31	\$2.44	\$3.11
Shares¹	696.2	704.0	705.0	707.0	709.0	702.6	863.8	881.4	918.0	938.0	960.0	1,100.0

TC Energy's growth strategy has been to raise capital (in the form of either debt or equity) to fund growth projects. Over the last decade, until 2017, this strategy failed to generate meaningful growth for the company *on a per-share basis*, as the additional net income generated by these projects was offset by the increased share count.

However, we believe that the next several years will show an improvement for TC Energy thanks to a strong pipeline of growth projects. TC Energy has more than \$20 billion of growth projects underway. These projects are supported by regulated or long-term contracted business models. Management expects earnings and cash flows to continue to grow in the upcoming years. We expect 4% annualized growth over the next five years. Management has guided for 8%-10% dividend growth in 2021 and 5%-7% dividend growth per year thereafter, though the high leverage is a concern.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
Avg. P/E	20.1	19.4	23.9	20.2	22.5	---	---	24.2	14.3	15.1	14.5	16.0
Avg. Yld.	4.5%	4.0%	4.0%	3.8%	3.5%	3.8%	4.0%	4.1%	5.0%	4.8%	5.8%	5.5%

TC Energy Corporation (TRP)

Updated May 26th, 2020 by Aristofanis Papadatos

Excluding 2015 and 2016, when the company's earnings were depressed, TC Energy has traded at an average price-to-earnings ratio of 20.0 over the last decade. The stock is currently trading at a price-to-earnings ratio of 14.5, which is lower than our assumed fair price-to-earnings ratio of 16.0. If the stock reverts to our fair value estimate over the next five years, it will enjoy a 2.0% annualized gain thanks to the expansion of its valuation level.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	90.4%	77.8%	95.7%	75.9%	78.3%	---	---	83.6%	71.4%	72.5%	84.0%	88.1%

TC Energy has been investing heavily in growth projects in the last decade and will continue to do so in the years ahead. Consequently, it has posted negative free cash flows in 9 out of the last 10 years and has a leveraged balance sheet, with interest coverage of only 2.5x and net debt that is about 15 *times its earnings*. The company is exposed to unforeseen headwinds, such as a downturn in the energy market or a recession. In addition, as it often issues new shares, it dilutes its shareholders at a high rate whenever its stock declines. On the other hand, despite its high payout ratio, the stock is not likely to cut its dividend anytime soon thanks to the strong momentum in its business and the increasing contribution of new projects to its cash flows. TC Energy also seems fairly resilient in the ongoing recession, which has hurt the natural gas market much less than the oil market.

Final Thoughts & Recommendation

TC Energy Corporation has shed -25% in about three months due to the spread of the coronavirus. However, the company has maintained its strong business performance amid the pandemic. Moreover, as we expect the pandemic to subside from next year, the stock could offer a 10.9% average annual return over the next five years thanks to its 5.8% dividend yield, 4.0% annual earnings-per-share growth and a modest expansion of its valuation level. For yield-hungry investors looking for exposure to the energy sector, we believe the company is a hold, on the verge of earning a buy rating. However, due to its high leverage, its negative free cash flows and its tendency to dilute shareholders, investors should take caution. There are other opportunities within the energy sector, such as Exxon Mobil and Total, which have good return prospects at current prices and a much less risky profile.
