Overview & Current Events

W.P. Carey is a commercial real estate focused REIT that operates two segments: real estate ownership and investment management. The REIT operates more than 1,200 single tenant properties on a net lease basis, across the US and Northern and Western Europe. W.P. Carey was founded more than 40 years ago and is headquartered in New York, NY.

W. P. Carey reported its first quarter earnings results on May 1. The trust reported that its revenues totaled \$309 million during the quarter, which was 3.6% more than the revenues that W. P. Carey generated during the previous year's period. Revenues came in ahead of the analyst consensus estimate.

During the first quarter the trust was more profitable than what the analyst community expected, as funds-from-operations came in at \$1.25 on a per-share basis, which was \$0.11, or 10% more than the analyst consensus. Funds-from-operations were up on a per-share basis compared to the previous year's quarter, growing by 3% year-over-year. W. P. Carey has withdrawn its guidance for 2020, citing the coronavirus crisis and the unknown impact it will have on its operations. So far, W.P. Carey is weathering the storm very well, as not only its Q1 results were an improvement versus the previous year's quarter, the REIT also has collected more than 95% of its April rents at the time of the earnings release, which is an outstanding result compared to the rent collection ratios of most other retail REITs.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
FFOPS	\$3.27	\$4.71	\$3.76	\$4.22	\$4.81	\$4.99	\$5.12	\$5.30	\$5.41	\$5.00	\$5.05	\$6.00
DPS	\$2.03	\$2.19	\$2.44	\$3.39	\$3.69	\$3.81	\$3.90	\$4.01	\$4.09	\$4.15	\$4.16	\$4.59
Shares³	41	40	69	68	104	104	107	108	146	165	167	180

W. P. Carey generated FFO-per-share growth at a rate of 6 % annually between 2009 and 2019, which is a very solid growth rate for a real estate investment trust, as these usually are low-growth vehicles. The growth rate has slowed down over the years, though, as W. P. Carey's FFO-per-share growth rate has averaged just 3% between 2014 and 2018. This is still a decent growth rate for a REIT with an above-average dividend yield.

W. P. Carey invests additional money into new properties continuously. Since 2012, the REIT invested more than \$10 billion into new assets by either purchasing entire REITs or through single-asset/portfolio purchases. W. P. Carey can access debt markets at favorable rates, which lowers the trust's cost of capital, which then allows for improved investment spreads. Since W. P. Carey cannot finance these acquisitions with debt alone, and since the REIT does not retain a large portion of its cash flows, W. P. Carey issues new shares regularly. A factor that drives organic revenue growth is that the contracts W. P. Carey and the tenants sign include ongoing rent increases, which results in growing revenues even without new asset purchases. These growth factors should persist going forward, which is why W. P. Carey should be able to increase its profits over the coming years. Due to the defensive nature of its business and a strong performance during past recessions, we believe that W.P. Carey will fare well during the coronavirus crisis.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
P/FFO	9.5	8.7	12.4	13.4	12.9	12.7	12.2	12.4	12.0	15.8	10.9	12.5
Avg. Yld.	6.7%	5.6%	5.2%	5.2%	5.7%	6.0%	6.2%	6.1%	6.3%	5.3%	7.6%	6.1%

W. P. Carey's share price has fallen substantially year to date, while funds from operations are not forecasted to be significantly impacted by this year's crisis. This has resulted in a rather low valuation, as W.P. Carey's FFO multiple has declined to the low-double-digits. We see some upside potential from the current price.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	62.1%	46.5%	64.9%	80.3%	76.7%	76.4%	76.2%	75.7%	75.6%	83.0%	82.4%	76.6%

W. P. Carey has grown its dividend very regularly during the last decade. There has not been a dividend cut or dividend freeze during that time frame. The dividend payout ratio is high, as the REIT is paying out more than 80% of its funds from operations via dividends right now. We still believe that the dividend is sustainable, especially as W. P. Carey did not have any problems financing its dividend during previous recessions.

W.P. Carey is quite recession-proof, as even during the last financial crisis the REIT managed to keep its profits stable. Due to diversification across industries, as well as geographically (65% US, 30% Europe, 5% other), W. P. Carey is not overly dependent on the progress of any single market, which makes the REIT a safer investment. This safety is underlined by long-lasting contracts, very high occupancy rates of ~99%, considerable scale, and an investment grade rating. W. P. Carey is one of the biggest players in its industry, and its focus on the sale-and-lease-back-transactions niche markets means that it is unlikely that any competitor or new market entrant will hurt the trust's business.

Final Thoughts & Recommendation

W. P. Carey is a fundamentally strong, low-risk REIT, and the trust has a very solid dividend growth track record. W. P. Carey is active in an attractive and non-cyclical industry. During the last couple of quarters its shares always traded well above our fair value estimate, but this has changed over the last two months, and shares are now valued rather inexpensively. Due to strong forecasted returns, we rate W.P. Carey a buy at the current price.
