Overview & Current Events

Booz Allen Hamilton Holding Corporation traces its roots to 1914. The company had an IPO on November 10, 2010. Booz is a leading provider of professional management and technology consulting services to the U.S Government. Technology consulting services includes information technology, cybersecurity, cloud computing, and engineering services. The company basically provides staffing to U.S. Government clients. About 96% of revenue was derived from contracts where the U.S Government was the end client in FY19. Revenue was 47% defense, 27% civil, 23% intelligence and 3% global commercial in FY19. The company had ~\$7.5B in revenue in FY20.

Booz reported another excellent quarter in Q4 FY 2020 and a solid year for FY 2020 as revenue and earnings per share grew robustly. For the quarter, revenue increased 10.6% to \$1,969.6M from \$1,780.1M and diluted adjusted EPS increased 14.1% to \$0.73 from \$0.64 on a year-over-year basis. Top and bottom line growth was again driven by strong client demand for Booz' services. Booz increased headcount to 27,173 in the quarter from 26,069 in the prior year. Consulting headcount increased to 24,218 from 23,379 in the prior year. Greater head count drives revenue for Booz. Contract type mix for the quarter changed as cost-reimbursable contracts increased to 56%, time-and-materials was flat at 24%, and fixed-price declined to ~20%. Booz grew the backlog by 7.3% to \$20.729M of which \$3,415M is funded, \$4,518M is unfunded, and \$12,796M is priced options. Notably, the book-to-bill ratio for the trailing 12 months has decreased to 1.19 from 1.49 in the prior year. This is still healthy. Contract wins are cyclical and tend to peak in the second quarter. For FY 2020, revenue increased 11.3% to a record \$7,463.8M from \$6,704M and adjusted diluted EPS increased 15.2% to \$3.18 from \$2.76. For FY 2021, Booz guided for 6% to 10% revenue growth and adjusted diluted EPS of \$3.40 to \$3.60. Booz should have another good year in FY 2021 barring changes to U.S. Government spending.

Growth on a Per-Share Basis¹

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	\$0.66	\$1.70	\$1.45	\$1.54	\$1.52	\$1.94	\$1.67	\$2.03	\$2.91	\$3.18	\$3.50	\$5.14
DPS	--	\$0.09	\$0.36	\$0.40	\$0.46	\$0.54	\$0.62	\$0.70	\$0.80	\$0.96	\$1.24	\$2.19
Shares²	127.9	132.4	145.8	148.7	149.1	148.0	148.9	143.5	140.0	137.2	134.5	121.6

The EPS history for Booz Allen Hamilton's short operating history as a public company has been volatile. But until recently the federal budget environment has been unstable. However, Booz has exhibited an upward trend in EPS since 2016. We are expecting this to continue over the next several years. Although changes in administration may interrupt this trend. We are now forecasting on average an 8% annual growth rate for EPS out to fiscal 2025. This will be driven by client demand for the company's services combined with a 2% decrease in share count annually. The company recently increased the share repurchase program by \$400M to \$658M total of which \$485M is left. Booz has consistently increased the dividend at a double-digit rate since 2011. We expect the growth rate to slow over the time. But we are still forecasting on average a 12% annual growth rate in DPS out to 2025 due to the relatively low payout ratio.

¹ BAH's fiscal year ends on the last day of March and the FY is ahead of the CY. As a result, we've put the stock's FY 2019 results in the '2018' column in the table above and followed the same convention throughout the data tables.

² Share count in millions.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
Avg. P/E	--	28.5	10.1	10.0	11.9	16.4	14.3	19.2	17.9	24.7	21.8	18.0
Avg. Yld.	--	0.5%	2.5%	2.2%	1.8%	1.9%	1.9%	1.9%	1.7%	1.2%	1.6%	2.4%

Booz Allen Hamilton's stock price has recovered after a steep drop due to COVID-19. The stock now trades at a price-to-earnings ratio of 21.8. We have upped our fair value multiple two notches to 18X due to market leadership and continued good execution. But the stock is still trading at an elevated valuation. Our current fair value estimate is now \$63. Our 5-year price target is now up to \$93.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	--	5%	25%	26%	30%	28%	37%	34%	27%	30%	35%	42%

Booz Allen Hamilton is one of the largest prime services contractors for the U.S. Government. The company's competitive advantages include its scale, long-term history, technical depth, first mover advantage with many clients, and historical knowledge of many consulting projects. This is evident in the 83% win rate for re-compete contracts and 60% win rate for new contracts. This provides some degree of recession resistance. But saying that, the company is not immune to economic downturns or slowdowns in federal government spending. Events such as changes in administration or party control of Congress can affect the federal budget and impact Booz' top and bottom lines.

The company has \$177.9M in short-term debt and \$2,008M in long-term debt offset by \$741.9M in cash and cash equivalents. The leverage ratio has come down and is now 2.2X and interest coverage is ~7X.

Final Thoughts & Recommendation

At present we are forecasting on average a 5.9% annualized total return through 2025. The good times are continuing for Booz as U.S. government spending remains robust. A risk is the upcoming election that may affect demand. The company continues to win contracts despite increasing competition. The dividend is growing rapidly at a double-digit rate, but the yield is low. At the current valuation and stock price, we rate this stock a hold.
