#### **Overview & Current Events**

NextEra Energy Partners was formed in 2014 as Delaware Limited Partnership by NextEra Energy to own, operate, and acquire contracted clean energy projects with stable, long-term cash flows. The company's strategy is to capitalize on the energy industry's favorable trends in North America of clean energy projects replacing uneconomic projects. As of year-end 2018, NextEra Energy Partners operates 34 contracted renewable generation assets consisting of wind and solar projects in 12 states across the United States. The company also operates contracted natural gas pipelines in Texas which accounted for 18% of NextEra Energy Partners income in 2018. On July 1, 2014, NextEra Energy Partners had its initial public offering at \$25 per share; it is now trading at almost double the IPO share value. Following the IPO, NextEra Energy (the largest utility company in North America) held 82.6% of NextEra Energy Partners. The \$3.4 billion market capitalization company is listed on the New York Stock Exchange under the ticker NEP.

On April 22<sup>nd</sup>, 2020 NextEra Energy released Q1 results for the period ending March 31<sup>st</sup>, 2020. The partnership maintained significant financial flexibility with net liquidity of \$650 million. Other than a \$300 million convertible debt maturity in September 2020, they have no other corporate level debt maturities until 2024. The partnership grew its Cash Available for Distribution (CAFD) from \$43 million in Q1 2019 to \$130 million in Q1 2020 thanks to new projects coming online and further growth in existing projects.

| Year                | 2010 | 2011 | 2012 | 2013 | 2014   | 2015   | 2016   | 2017   | 2018   | 2019   | 2020   | 2025   |  |
|---------------------|------|------|------|------|--------|--------|--------|--------|--------|--------|--------|--------|--|
| CAFD/S              | N/A  | N/A  | N/A  | N/A  | \$3.10 | \$4.10 | \$4.10 | \$4.59 | \$6.04 | \$6.34 | \$6.59 | \$8.02 |  |
| DPS                 | N/A  | N/A  | N/A  | N/A  | \$0.19 | \$0.91 | \$1.30 | \$1.49 | \$1.71 | \$2.07 | \$2.30 | \$2.80 |  |
| Shares <sup>3</sup> | N/A  | N/A  | N/A  | N/A  | 18.7   | 30.7   | 54.2   | 54.3   | 56.1   | 58.8   | 65.5   | 70.0   |  |

#### Growth on a Per-Share Basis

NextEra Energy Partners continues to grow its cashflows at an aggressive clip. Since the company's historic EPS has been very inconsistent, we were unable to use it as the company's primary growth metric, instead we used book value per share (Book/S). We chose book value per share as the primary growth metric because it shows how well the company has been obtaining new assets and revenue while also being diluted by the growth in the shares outstanding during this time. As you can see, their book value per share has been growing consistently since their IPO in 2014, and it continued this trend in 2019. Another growth metric we used is cash available for distribution (CAFD) per share. The CAFD metric is used to see a company's cash generation that is available to be distributed back to shareholders as dividends. From the CAFD/S metric we observed excellent growth of over 14% annually since 2014, which is noticeable in their rising dividend. Since 2014, the company has grown their dividend from \$0.19 annually to \$2.07 in 2019.

We expect growth from further expansion in renewable energy sales and addition of new infrastructure to drive an average annual growth rate of 4% throughout the next half decade to 2025.

#### **Valuation Analysis**

| Year      | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | Now  | 2025 |
|-----------|------|------|------|------|------|------|------|------|------|------|------|------|
| P/CAFD    | N/A  | N/A  | N/A  | N/A  | 11.5 | 9.5  | 6.8  | 7.6  | 7.5  | 8.4  | 7.7  | 8.0  |
| Avg. Yld. | N/A  | N/A  | N/A  | N/A  | 0.5% | 2.6% | 4.7% | 4.1% | 3.9% | 3.9% | 4.5% | 4.4% |

Instead of using the average price-to-earnings ratio we used the company's price-to-CAFD ratio for the valuation analysis. We decided to use price-to-CAFD ratio instead, because we did not have enough information from the price-toearnings ratio since the company has had inconsistent earnings over the last half decade. We observed the price-to-CAFD ratio to be generally decreasing since 2014 until this year. The current price-to-CAFD ratio is slightly below where we see its long-term average settling, resulting in us considering the company to be slightly undervalued.

#### Safety, Quality, Competitive Advantage, & Recession Resiliency

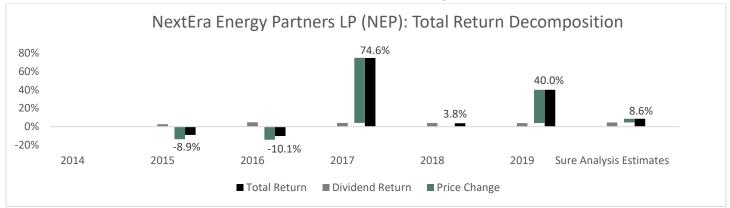

| Year   | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2025 |
|--------|------|------|------|------|------|------|------|------|------|------|------|------|
| Payout | N/A  | N/A  | N/A  | N/A  | 6%   | 22%  | 32%  | 32%  | 28%  | 33%  | 35%  | 35%  |

NextEra Energy Partners is trying to become an industry leader in producing renewable energy and simply producing energy with as little carbon output as possible. The company's operations are very proactive for getting ahead of regulations that the utility sector has been getting in the past years on carbon emissions. To calculate the payout ratio above, since the company does not have consistent earnings, instead we used the company's cash available for distribution per share divided by their dividends per share.

Utilities generally have lower competitive risks because of the regulations that are put on them. NextEra Energy Partners has found their own competitive advantage within the sector by producing only renewable energy. This is an advantage because the company can put all their efforts into innovation in the part of the utilities sector with the most growth potential; renewable energy generation. Another advantage that NextEra Energy Partners has over their competition is that the company is a subsidiary of utility giant, NextEra Energy. A benefit of all utilities is that it is not a cyclical industry; in the event of an economic downturn utilities historically outperform the market, due to sheer need of the company's operations.

## Final Thoughts & Recommendation

NextEra Energy Partners has been performing very well since the company's IPO in 2014. The company currently has a dividend yield of 4.5%, which has been growing very quickly since their first payment in 2014. Overall, we expect a total return of 8.6% annualized over the next half decade. As a result, we rate NextEra Energy Partners as a hold at current prices.
