Overview & Current Events

Nutrien Ltd. (NTR) is a Canadian company formed through the merger of Agrium and PotashCorp in a transaction that closed on January 1, 2018. The company produces and markets crop nutrients to agricultural, industrial, and feed customers around the world. The company has over 1,700 retail locations in North America, South America, and Australia and is one of the world's largest manufacturers and suppliers of potash, nitrogen, and phosphate. The company provides over 20% of global potash, 3% nitrogen, and 3% of phosphate. Nutrien has a market capitalization of approximately \$19.2 billion, more than 20,000 workers, and produced roughly \$20 billion in revenue in 2019.

On May 6, 2020, Nutrien reported results for the quarter ended March 31. Sales saw an increase of 13% from \$3,719 million in the first quarter of 2019, to now \$4,186 million. However, the cost of goods sold increased by 21%. This hurt the company's net earnings, which came in at a loss of \$(35) million compared to a net gain of \$41 million in 1Q19. The free cash flow decreased from \$382 million to \$181 million, or a (53)% decrease. The quarter's net loss was primarily caused by the impacts of lower selling prices from the temporary slowdown in specific fertilizer markets. COVID-19 had a limited direct impact on the business, said the earnings report.

Management updated their full-year earnings guidance to \$1.50-\$2.10 per share vs. prior guidance of \$1.90-\$2.60. The management team also expects adjusted EBITDA to be between \$3.5 billion - \$3.9 billion. The new guidance puts the dividend at risk with a potential payout 100% or higher.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	---	---	---	---	---	---	---	---	\$2.34	\$1.95	\$1.80	\$2.30
DPS	---	---	---	---	---	---	---	---	\$2.06	\$1.33	\$1.80	\$2.09
Shares¹	---	---	---	---	---	---	---	---	609.0	573.0	565.0	520.0

Nutrien does not have a long history as a combined company, and neither PotashCorp nor Agrium represent directly comparable predecessors. PotashCorp was primarily involved in the potash production side of the business, while Agrium mostly represented the agricultural retail side. As a combined company, Nutrien now has a significant stake in both sides, and with a 52/48 split, the merger was one of the equals.

Analysts expect an EPS rebound in 2020 due to renewed commodity demand and pricing. Share repurchases are expected to contribute several percentage points per year on top of baseline growth. Nutrien repurchased approximately 6.7% of its market capitalization in 2019. We expect a 5% growth per year over the next five years from a rebound in cyclical fertilizer pricing and consistent share repurchases. Dividend growth is expected to be 3%, as the company normalizes its payout ratio. Significant increases or decreases in the prices of fertilizer would substantially affect the growth rate and are mostly outside the company's control.

¹ Share count is in millions.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
Avg. P/E	---	---	---	---	---	---	---	---	22.1	26.10	18.9	17.0
Avg. Yld.	---	---	---	---	---	---	---	---	4.0%	2.6%	5.3%	5.3%

One of Nutrien's primary industry peers with a long history as a unified company, The Mosaic Company, has had an average P/E ratio of 19.9 over the past ten years with a high of 31 and a low of 13. With an anticipated mild recovery in agriculture commodity prices, which have been in a multi-year bear market, we expect Nutrien's P/E ratio to decline to 17 as a baseline potentially.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	---	---	---	---	---	---	---	---	80%	68.2%	100%	91%

Nutrien has an economic moat from its potash and nitrogen production operations resulting in relatively high returns on invested capital in most years compared to the broader materials sector. The company has geographically significant production assets in Canada that sit on the bottom half of the global production cost curve, meaning that even in a low-price environment, the company can outlast its competitors and survive to see periods of higher commodity prices. On the other hand, the company's phosphate production operations are in the upper half of the global cost curve. Its retail agriculture business, being the largest in North America, may have mild cost advantages, but several of its competitors are similar in scale. Therefore, these aspects of the business lack economic moat.

Agricultural commodities, especially fertilizer, are not very economically sensitive because people need to eat through recessions and expansions alike. However, the agricultural and fertilizer industries do have their cycles, and the supply/demand relationship in agricultural commodity production due to weather and other factors can dramatically affect prices. For example, potash spiked to over \$800/ton in 2009 but is currently under \$300/ton. Due to the breakup of a significant eastern European potash cartel in 2013, and thanks to a previous period of high potash prices that spurred production growth, potash prices have been in a bear market for several years. Nutrien strongly benefits from higher rates in potash, nitrogen, and phosphate, and is hurt by lower prices. Nutrien's balance sheet is moderate, with a debt/equity (D/E) ratio of 1.2, which is slightly higher than the D/E ratio of 1.0 in 2019. The company currently has a credit rating of BBB.

Final Thoughts & Recommendation

With an expected 7.5% annual return over the next five years, we consider Nutrien to be a Hold. However, Nutrien has a high variance of performance based on crop nutrition commodity prices and could deliver returns that are significantly higher or lower than this expected baseline. The company also potentially serves as a diversifier in a portfolio as a non-correlated asset. While most stocks are economically sensitive, Nutrien and other agricultural companies operate on separate cycles that are distinct from the economic cycle.
