Overview & Current Events

Synchrony Financial is a consumer financial services company. It operates through the following business units: Payment Solutions, Retail Credit, and CareCredit. Synchrony Financial offers private label credit cards, small-size business credit products, promotional financing for higher-priced consumer goods, promotional financing for healthcare procedures such as dental and vision, as well as a range of other services to its customers. The company is headquartered in Stamford, CT, and was founded in 2003.

Synchrony Financial reported its second quarter earnings results on July 21. The company managed to generate revenues of \$3.5 billion during the quarter, which represents a decline of 18% versus the prior year's quarter. Its top line decline was partially caused by the sale of its Walmart credit portfolio, while lower spending by card holders due to the lockdown measures aimed at combatting the current pandemic played an even bigger role. Synchrony Financial's purchase volume was down 19% during the quarter, to \$31 billion.

Synchrony Financial generated earnings-per-share of \$0.69 during the second quarter, which was more than twice the profits that the analyst community had forecasted. The sale of the Walmart portfolio hurt its profits to some degree, but a big increase in provisions for loan losses (due to the unknown impact that the coronavirus crisis will have) was an even bigger factor. Net charge-offs still remained at a quite normal level of 5.4% during the quarter, however. To adjust for the one-time crisis impact, we calculate fair value using an earnings power estimate of \$4.00 for the current year.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	---	---	---	---	\$2.78	\$2.65	\$2.71	\$2.61	\$3.74	\$4.29	\$2.50	\$5.11
DPS	---	---	---	---	---	---	\$0.26	\$0.56	\$0.72	\$0.86	\$0.88	\$1.18
Shares¹	---	---	---	---	757	834	834	771	719	662	630	550

Synchrony Financial was founded in 2003, but the company's initial public offering was in 2014, which is why there is no long-term data available for the company. Between 2014 and 2019 Synchrony Financial grew its earnings-per-share by 9% a year, although almost all of that growth took place in 2018 and 2019. Before that, profits remained relatively stagnant. In 2019, Synchrony Financial managed to grow its earnings-per-share at a strong pace.

Synchrony Financial has broadened its cooperation with key vendors in the recent past, which includes companies such as Amazon, Walgreens, and QVC. The relationships with these retailers should positively impact Synchrony Financial's growth during the coming years, as this will allow for a rise in the company's active accounts. On top of that, purchase volumes and loan balances should grow in the long term, which is the basis for rising transaction fees and further growth for Synchrony Financial's net interest income. The coronavirus crisis will likely lead to significant loan losses during 2020, which will hurt this year's bottom line to a large extent. We don't believe that this will hurt the company in future years to the same extent. In the above table, we see our estimate for this year's actual earnings-per-share, but we believe that the underlying earnings power (in normal times) is much higher; our estimate is \$4.00. To better reflect the total returns that shareholders could see, we use the earnings power estimate for our fair value calculation.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
Avg. P/E	---	---	---	---	9.5	12.0	10.7	12.4	8.7	8.4	5.8	8.0
Avg. Yld.	---	---	---	---	---	---	0.9%	1.7%	2.2%	2.4%	3.8%	2.9%

Synchrony Financial has been valued at a price to earnings ratio of roughly 10 throughout the majority of the years since its IPO. More recently, shares have become cheaper, even before the current pandemic. Based on our earnings power estimate of \$4.00 for 2020, the multiple is just ~6. The valuation should increase as profits get back to a more normal level once the coronavirus crisis has ended.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	---	---	---	---	---	---	9.6%	21.5%	19.3%	20.0%	22.0%	23.1%

Synchrony Financial started to make dividend payments just a few years ago. Since then, the company has raised its dividend regularly and at a meaningful pace. Yet, Synchrony Financial's dividend payout ratio is still relatively low. We do not know whether Synchrony Financial will maintain its dividend during every recession, as the company's track record does not date back to the last financial crisis. During the current pandemic, the company has maintained its dividend.

Synchrony Financial is not the largest credit card company in the world; it has significantly larger peers such as American Express. The market is large enough for a range of companies to be highly profitable, though, which is why Synchrony Financial's relatively small size is not necessarily a large disadvantage. During the current recession that is caused by the coronavirus, Synchrony Financial should see a larger-than-normal amount of credit losses, but the company will remain profitable in 2020, we believe. Once this crisis has passed, profitability should recover to pre-crisis levels.

Final Thoughts & Recommendation

Synchrony Financial is one of the smaller credit card players. In 2020 its share price has declined a lot, caused by worries about the impact that the coronavirus will have on its loan portfolio. The long-term growth outlook is not too bad, and we believe that Synchrony Financial should get back to pre-crisis profits eventually. Based on this expectation, we rate shares a buy, but Synchrony Financial is not a low-risk investment.
