Overview & Current Events

Brown & Brown Inc. is a leading insurance brokerage firm that provides risk management solutions to both individuals and businesses, with a focus on property & casualty insurance. Brown & Brown has a notably high level of insider ownership. At the end of the most recent fiscal year, Brown & Brown's Chairman, J. Hyatt Brown, and his son, J. Powell Brown, collectively and beneficially owned approximately 16% of the company's outstanding common stock. Separately, the firm's executive officers, directors, and their family members together own a total of nearly 17% of the company. Overall, Brown & Brown appears to be a very shareholder-friendly company, as its 26-year streak of consecutive dividend increases qualifies it to be a member of the Dividend Champions list. The company should produce \$2.2 billion in revenue this year, and trades with a \$12.7 billion market capitalization.

Brown & Brown reported second quarter earnings on July 27th, with results beating expectations on the top and bottom lines. Total revenue was up 4% year-over-year to \$599 million. Organic revenue was up 0.5%, reflecting weakness due to COVID-19, as Brown & Brown has generally performed much better than that on an organic revenue growth basis in recent years. Earnings rose \$4.2 million to come in at \$96.8 million. On a per-share basis, earnings rose 3% to \$0.34. On an adjusted basis, earnings-per-share rose 6.3% to \$0.34, excluding non-operating charges. Employee compensation and benefits costs rose more than 10% year-over-year thanks primarily to Brown & Brown's near-constant acquisition integrations.

We have boosted our estimate of earnings-per-share to \$1.60 for 2020, up from \$1.52, as organic revenue was still positive despite a very tough operating environment, and as margins are holding up.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	\$0.55	\$0.56	\$0.63	\$0.74	\$0.83	\$0.85	\$0.92	\$1.42	\$1.21	\$1.40	\$1.60	\$2.35
DPS	\$0.16	\$0.17	\$0.17	\$0.19	\$0.21	\$0.23	\$0.25	\$0.28	\$0.31	\$0.33	\$0.34	\$0.52
BVPS	\$5.27	\$5.73	\$6.28	\$6.90	\$7.37	\$7.73	\$8.42	\$9.35	\$10.73	\$12.19	\$13.50	\$19.84
Shares¹	279	281	284	285	286	280	276	278	276	275	274	270

Brown & Brown has a remarkable growth track record that includes a decade-long compound annual earnings growth rate of 8.4%. The company's book value per common share has grown at a similar rate, expanding at 8.3% per year over the last ten years. Brown & Brown's growth strategy is both simple and sustainable. Over the years, the company has actively acquired smaller insurance brokerage firms and integrated them into its larger operating base. We believe that this strategy has plenty of room left to run and forecast that the firm is capable of continuing to grow at 8% per year for the foreseeable future.

In addition, we see 8% annual growth in the dividend for the foreseeable future given that Brown & Brown has exhibited strong earnings growth over time, and its strategy is sustainable.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
Avg. P/E	18.7	20.6	21.7	23.0	20.9	22.4	20.6	24.2	18.5	23.9	27.9	22.0
Avg. Yld.	1.6%	1.4%	1.3%	1.1%	1.3%	1.3%	1.3%	1.2%	1.1%	1.0%	0.8%	1.0%

Brown & Brown has historically traded at a somewhat lofty valuation, with a 10-year average price-to-earnings ratio of 20.7. Looking ahead our fair value earnings multiple for Brown & Brown is a price-to-earnings ratio of around 22. Using our 2020 earnings estimate of \$1.60 and the company's current stock price, Brown & Brown is trading at a current price-to-earnings ratio of 27.9. Valuation contraction to an earnings multiple of 22 would reduce Brown & Brown's total returns moderately if this mean reversion occurred over a five-year holding period. The stock has rallied of late, and even on higher earnings expectations, shares look quite expensive.

We see the yield rising somewhat over time as the payout rises, but primarily due to a lower valuation.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2019	2024
Payout	29%	30%	27%	26%	25%	27%	27%	20%	26%	24%	21%	22%

Brown & Brown's competitive advantage comes from its willingness to execute small and frequent acquisitions. This growth-by-acquisition strategy gives the company an enduring opportunity to continue growing its business for the foreseeable future. Brown & Brown is also modestly recession resistant. The company's earnings-per-share declined by just -20.5% during the worst of the 2007-2009 financial crisis, while dividends continued to grow.

Final Thoughts & Recommendation

Brown & Brown has many of the characteristics of a high-quality business. It has increased its dividend for 26 consecutive years, and company insiders own a great deal of its outstanding stock. With that said, its valuation is too rich to earn a buy rating today. We have lowered our expected returns to 3.9% from 7.5% in our last update, due entirely to the higher valuation. We are therefore moving the stock from hold to sell despite strong fundamentals; shares are simply too expensive today.
