Overview & Current Events

Gorman-Rupp began manufacturing pumps and pumping systems back in 1933. Since that time, it has grown into an industry leader with annual sales of about \$350 million and a market capitalization of \$807 million. Today, Gorman-Rupp is a focused, niche manufacturer of critical systems that many industrial clients rely upon for their own success. Gorman-Rupp generates about one-third of its total revenue from outside of the US. The company also has one of the most impressive dividend increase streaks in the market, which currently stands at 47 years.

Gorman-Rupp reported second quarter earnings on July 24th, with both revenue and earnings coming in ahead of expectations. Total sales for the quarter came to \$86 million, down sharply from \$108 million in the year-ago period. Domestic sales fell -20%, while international sales were off -22%. The company noted sales declined across all of its markets as a result of reduced activity attributable to COVID-19. Gorman-Rupp's facilities and supply chain remain open and operating, but demand fell off significantly in Q2.

Gross profit was \$22 million in Q2, or 25.5% of revenue, compared to \$28 million, or 26% of revenue in last year's Q2. The decline of 50bps was due to loss of leverage in fixed labor and overhead costs from lower sales volumes.

SG&A costs came to 15% of net sales, up from 13.8% in last year's Q2, attributable to deleveraging from lower revenue.

Operating income was \$9 million during the quarter, good for operating margin of 10.5%, but down from \$13 million and 12.2% in the year-ago period, respectively.

Net income was nearly cut in half year-over-year, falling from \$0.40 per share to \$0.22. Our estimate remains at \$1.10 per share for this year as we expect earnings to rebound to closer to normalized levels in the second half of the year.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	\$0.93	\$1.10	\$1.07	\$1.15	\$1.38	\$1.06	\$0.95	\$1.22	\$1.53	\$1.37	\$1.10	\$1.62
DPS	\$0.27	\$0.27	\$0.31	\$0.33	\$0.37	\$0.41	\$0.43	\$0.47	\$0.51	\$0.55	\$0.58	\$0.66
Shares¹	26	26	26	26	26	26	26	26	26	26	26	26

Gorman-Rupp's earnings volatility has been very high, and that has translated into lots of volatility for the stock in the past decade. As the company makes products for industrial and municipal clients, its revenue can swing wildly from one year to another. Margins have been fairly stable over the past decade, but it does experience boom/bust cycles in revenue generation, leading to lots of earnings volatility, as was the case in 2019 following a strong performance in 2018. We are forecasting 8% earnings-per-share growth going forward from this year's trough but note that recent weakness continues to suggest further volatility in earnings moving forward.

The company can achieve this result mostly through low single-digit sales growth. Management correctly forecast higher sales in 2018 and 2019 and given its robust backlog of uncompleted work, we see that continuing for the near term. Gorman-Rupp's primary earnings growth driver is certainly revenue as its margins fluctuate over time, even when sales rise. The company managed decent profits in Q2 this year despite lower revenue, highlighting margin volatility.

The Gorman-Rupp Company (GRC)

Updated August 1st, 2020 by Josh Arnold

We are forecasting mid-single-digit growth in the dividend as Gorman-Rupp's increases have been lumpy in the past but have picked up in terms of significance lately. This is not a stock one buys for the current yield, however.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2024
Avg. P/E	19.1	21.4	21.5	23.5	23.1	25.8	28.4	24.7	21.6	24.5	27.5	22.0
Avg. Yld.	1.5%	1.1%	1.4%	1.2%	1.2%	1.5%	1.6%	1.6%	1.5%	1.6%	1.9%	1.8%

Gorman-Rupp's price-to-earnings multiple stayed in a fairly narrow range from 2008 to 2014, but in more recent years, investors have been willing to pay more. Shares trade at 27.5 times earnings today, which is in excess of our fair value estimate of 22 times earnings, so we are forecasting a modest headwind to total returns from the valuation in the coming years. The yield should also remain near 2%; Gorman-Rupp did pay a \$2 special dividend in Q4 of 2018.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	29%	26%	29%	29%	27%	38%	45%	39%	33%	40%	53%	41%

Gorman-Rupp's payout ratio is around half of earnings and should remain there for the foreseeable future as we anticipate moderate dividend growth over the intermediate term.

The company's competitive advantage is in its many decades of experience in providing innovative solutions for niche, but critical, engineering problems facing its customers. However, it is far from immune to recessions as revenue and earnings both fell very sharply during the Great Recession. We see earnings as at-risk for this recession, as noted above.

Final Thoughts & Recommendation

Gorman-Rupp is trading at 125% of our estimate of fair value following the Q2 report. The company's moderate level of earnings growth could afford investors 5% annual returns as the valuation has improved since our last report. As a result, we're reiterating Gorman-Rupp at a hold rating, but note that investors are likely to experience significant volatility in earnings in the coming years.
