Overview & Current Events

MSA Safety Incorporated, formerly Mine Safety Appliances, was established in 1914. Today, it develops and manufactures safety products. Customers come from a variety of industrial markets, including oil & gas, fire service, construction, mining, and the military. MSA Safety's major products include gas and flame detection, air respirators, head protection, fall protection, air purifying respirators, and eye protection gear. The \$4.6 billion market cap company, which has increased its dividend for more than four decades, employs about 5,000 people worldwide.

On July 29th, 2020 MSA released Q2 2020 results for the period ending June 30th, 2020. For the quarter revenue came in at \$314 million, representing a -10% decline on a reported basis and a -8% decline on an organic basis. Notably, airpurifying respirators revenue increased 63% amid the COVID-19 pandemic and the company is committed to ramp up investments in this segment. Adjusted earnings equaled \$44 million or \$1.11 per share compared to \$48 million or \$1.22 per share in Q2 2019. MSA ended the quarter with \$335 million in debt and a 1.2x adjusted EBITDA-to-debt ratio.

Growth on a Per-Share Basis

| Year | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2025 |
|---------------------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|
| EPS | \$1.05 | \$1.87 | \$2.42 | \$2.28 | \$2.52 | \$2.52 | \$2.77 | \$3.65 | \$4.50 | \$4.80 | \$4.70 | \$6.59 |
| DPS | \$0.99 | \$1.03 | \$1.10 | \$1.18 | \$1.23 | \$1.27 | \$1.31 | \$1.38 | \$1.49 | \$1.64 | \$1.72 | \$2.65 |
| Shares ² | 37 | 37 | 37 | 37 | 38 | 37 | 38 | 38 | 39 | 39 | 39 | 39 |

Note that we have used adjusted earnings in the table and forecast above. MSA has put together a solid growth record in the past decade, although perhaps not quite as impressive as the above table demonstrates given that 2009 and 2010 are coming off a recession low. Still, over the longer-term MSA has been able to grow in the mid-single digits.

MSA's acquisition of Globe Manufacturing in 2017 has boosted the company's revenue growth profile and provides the company with an expansion into new product categories such as protective clothing for firefighters. Furthermore, innovations such as the thermal imaging camera in the self-contained breathing apparatus and the company's V-Series line of fall protection have been gaining traction. In addition, the new Sierra Monitor acquisition and a strong backlog cement the idea of the possibility of continued growth.

With that being said, the COVID-19 pandemic will have some impact on the business. An important offsetting factor is the fact that many of MSA's products are in demand in the current environment. However, we are still anticipating a small decline in earnings this year. Over the intermediate term we are assuming a 7% growth rate coming off a lowered base.

Valuation Analysis

| Year | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | Now | 2025 |

MSA Safety Inc. (MSA)

Updated July 31st, 2020 by Eli Inkrot

Over the past 10 years shares of MSA have traded hands with an average P/E ratio of about 20 times adjusted earnings. We have used this multiple as a starting place for a "fair" valuation. With a current P/E ratio near 25 times expected earnings, this implies the possibility of a moderate valuation headwind over the intermediate term.

While the dividend has been increasing nicely, and indeed has a spectacular long-term record of being increased every year for nearly half a century, the current 1.5% dividend yield does not add meaningfully to an investment thesis.

Safety, Quality, Competitive Advantage, & Recession Resiliency

| Year | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2025 |
|--------|------|------|------|------|------|------|------|------|------|------|------------|------|
| Payout | 94% | 33% | 55% | 45% | 49% | 50% | 47% | 38% | 33% | 34% | <i>37%</i> | 40% |

MSA Safety has several competitive advantages that fuel its growth as the leader across the safety and protection products industry. It has a global reach that competitors cannot match, with roughly a third of annual sales from outside the Americas and it can invest in growth initiatives to retain its industry leadership.

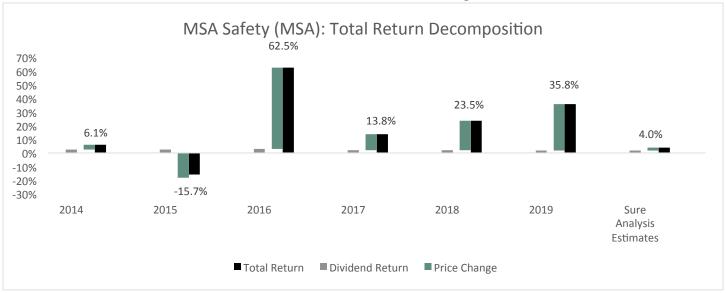

During the last recession MSA posted earnings-per-share results of \$1.96, \$1.21, \$1.05 and \$1.87 for the 2008 through 2011 stretch. This gives you a fair idea of the cyclicality inherent in the business – safety is always important, but budgets become squeezed in lesser times. We are somewhat encouraged by the idea that the dividend kept increasing during this time. That was good news for the current income investor, but the payout ratio did become quite elevated for a few years. The current crisis will put MSA's resilience on display once again.

As of the most recent report MSA held \$136 million in cash, \$722 million in current assets and \$1.8 billion in total assets against \$293 million in current liabilities and \$1.0 billion in total liabilities. Notably, about a fourth of total assets are made up of goodwill. Long-term debt stood at \$315 million against underlying earnings power of close to \$180 million.

Final Thoughts & Recommendation

Shares are up marginally since our last report. MSA Safety is a strong business with significant competitive advantages. Moreover, the company also has a reasonable growth profile, 7.0% over the intermediate-term coming off a lowered base, coupled with a solid, albeit currently low-yielding 1.5% dividend. The main downside, in our view, is the elevated valuation which could lead to a moderate headwind and the potential for a total return 4.0% per annum. This has the prospect of turning solid business performance into mediocre investment returns. As such, we rate MSA as a hold.
