## Overview & Current Events

NextEra Energy Partners was formed in 2014 as Delaware Limited Partnership by NextEra Energy to own, operate, and acquire contracted clean energy projects with stable, long-term cash flows. The company's strategy is to capitalize on the energy industry's favorable trends in North America of clean energy projects replacing uneconomic projects. NextEra Energy Partners operates 34 contracted renewable generation assets consisting of wind and solar projects in 12 states across the United States. The company also operates contracted natural gas pipelines in Texas which accounts for about a fifth of NextEra Energy Partners' income. On July 1, 2014, NextEra Energy Partners had its initial public offering at \$25 per share; it is now trading at more than double the IPO share value. Following the IPO, NextEra Energy (the largest utility company in North America) held 82.6% of NextEra Energy Partners. The \$3.9 billion market capitalization company is listed on the New York Stock Exchange under the ticker NEP.

On July 24<sup>th</sup>, 2020 NextEra Energy released Q2 results. The partnership generated significant year-over-year growth during the quarter and benefited from the successful resolution of the PG&E bankruptcy, which leaves all contracts with NextEra Energy Partners intact, without modification. Adjusted EBITDA and CAFD each grew by 23% and 46% year-over-year, respectively. Year-to-date, adjusted EBITDA and CAFD increased by 26% and 86%, respectively.

## Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
<b>CAFD/S</b>	N/A	N/A	N/A	N/A	\$3.10	\$4.10	\$4.10	\$4.59	\$6.04	\$6.34	<b>\$6.59</b>	<b>\$8.02</b>
<b>DPS</b>	N/A	N/A	N/A	N/A	\$0.19	\$0.91	\$1.30	\$1.49	\$1.71	\$2.07	<b>\$2.31</b>	<b>\$2.80</b>
<b>Shares<sup>3</sup></b>	N/A	N/A	N/A	N/A	18.7	30.7	54.2	54.3	56.1	58.8	<b>65.5</b>	<b>70.0</b>

NextEra Energy Partners continues to grow its cashflows at an aggressive clip. Since the company's historic EPS has been very inconsistent, we were unable to use it as the company's primary growth metric, instead we used cash flow per share (CAFD/S). Another growth metric we used is cash available for distribution (CAFD) per share. The CAFD metric is used to see a company's cash generation that is available to be distributed back to shareholders as dividends. From the CAFD/S metric we observed excellent growth since 2014, which is noticeable in their rising dividend. Since 2014, the company has grown their dividend from \$0.19 annually to an expected \$2.31 in 2020.

We expect growth from further expansion in renewable energy sales and addition of new infrastructure to drive an average annual growth rate of 4% throughout the next half decade to 2025.

## Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
P/CAFD	N/A	N/A	N/A	N/A	11.5	9.5	6.8	7.6	7.5	8.4	9.4	8.0
Avg. Yld.	N/A	N/A	N/A	N/A	0.5%	2.6%	4.7%	4.1%	3.9%	3.9%	3.7%	4.4%

Instead of using the average price-to-earnings ratio, we used the company's price-to-CAFD ratio for the valuation analysis. We decided to use price-to-CAFD ratio instead, because we did not have enough information from the price-to-earnings ratio since the company has had inconsistent earnings over the last half decade. We observed the price-to-CAFD ratio to be generally decreasing since 2014 until this 2019-2020. The current price-to-CAFD ratio is above where we see its long-term average settling, resulting in us considering the company to be slightly overvalued.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	N/A	N/A	N/A	N/A	6%	22%	32%	32%	28%	33%	35%	35%

NextEra Energy Partners is trying to become an industry leader in producing renewable energy and simply producing energy with as little carbon output as possible. The company's operations are very proactive for getting ahead of regulations that the utility sector has been getting in the past years on carbon emissions. To calculate the payout ratio above, since the company does not have consistent earnings, instead we used the company's cash available for distribution per share divided by their dividends per share.

Utilities generally have lower competitive risks because of the regulations that are put on them. NextEra Energy Partners has found their own competitive advantage within the sector by producing only renewable energy. This is an advantage because the company can put all their efforts into innovation in the part of the utilities sector with the most growth potential; renewable energy generation. Another advantage that NextEra Energy Partners has over their competition is that the company is a subsidiary of utility giant, NextEra Energy. A benefit of all utilities is that it is not a cyclical industry; in the event of an economic downturn utilities historically outperform the market, due to sheer need of the company's operations.

## Final Thoughts & Recommendation

NextEra Energy Partners has been performing very well since the partnership's IPO in 2014. The stock currently has a dividend yield of 3.7%, and its payout has been growing very quickly since their first payment in 2014. Overall, we expect a total return of 4.5% annualized over the next half decade. As a result, we rate NextEra Energy Partners as a hold at current prices.
