Overview & Current Events

Founded in 1925 and headquartered in Peoria, Illinois, Caterpillar is the world's leading manufacturer of construction and mining equipment, diesel and natural gas engines, industrial gas turbines and diesel-electric locomotives. The \$87 billion market cap company operates in three primary segments: Construction Industries, Resource Industries and Energy & Transportation, along with ancillary financing and related services through its Financial Products segment.

On October 27th, 2020 Caterpillar reported Q3 2020 results for the period ending September 30th, 2020. For the quarter the company reported revenue of \$9.9 billion, representing a -23% decline compared to Q3 2019. This result was primarily due to lower sales volume driven by lower end-user demand for equipment and services. All three primary segments reported declines of -21% to -24% in the quarter. Earnings-per-share equaled \$1.22 compared to \$2.66 in the prior year quarter, as the COVID-19 pandemic continues to weigh on results. On an adjusted basis, which excludes \$0.12 in premeasurement losses of pension obligation, EPS would have equaled \$1.34. Caterpillar ended the third quarter with \$9.3 billion of enterprise cash and more than \$14 billion in available liquidity sources.

Prior to the pandemic, Caterpillar provided a 2020 outlook, anticipating \$8.50 to \$10.00 in EPS. However, the company withdrew this guidance amid the ongoing crisis and results are expected to be significantly impacted this year.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	\$4.15	\$7.81	\$9.36	\$5.79	\$6.37	\$4.62	\$3.44	\$6.88	\$11.20	\$11.06	\$5.50	\$11.75
DPS	\$1.74	\$1.82	\$2.02	\$2.32	\$2.70	\$3.01	\$3.08	\$3.11	\$3.36	\$3.78	\$4.12	\$5.12
Shares¹	639	648	655	638	606	582	586	598	576	568	550	550

Caterpillar's customers, primarily mining companies & construction companies, operate in cyclical industries. During good times they are inclined to expand their operations and to upgrade their equipment in order to make operations more efficient. During weak times they are less likely to expand their operations, and they will defer the purchase of new equipment, which means lower sales for Caterpillar. Caterpillar's business therefore is relatively cyclical, which is clearly visible in the above table. During the last financial crisis profits experienced a tremendous decline, and during 2015-2016, when commodity prices were relatively low, Caterpillar's sales and profits declined significantly as well.

Things were going well for Caterpillar, but the company has run into numerous headwinds as of late. Global trade uncertainties have now taken a back seat to the COVID-19 pandemic, as demand will be seriously impacted in the short-term. Furthermore, even if consumer demand comes back, dealers may be more cautious with their inventories moving forward, as was seen in the first three quarters of 2020. Results will be volatile in the short-term.

We expect earnings to be down significantly this year, but we are more optimistic over the long-term. For forecasting purposes, we are using \$8 per share in underlying earnings power – based on ~\$50 billion in sales and a ~9% margin. In addition, we are keeping our 8% intermediate-term growth rate intact, but this still implies a lower earnings figure coming off a lower base. This reflects both some caution with regard to the cyclical nature of the business and Caterpillar's ability to bounce back when demand returns.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
Avg. P/E	16.6	12.4	10.0	15.1	15.8	17.1	22.8	16.4	12.9	12.0	19.8	15.0
Avg. Yld.	2.5%	1.9%	2.2%	2.7%	2.7%	3.8%	3.9%	2.8%	2.3%	3.0%	2.6%	2.9%

Since 2010 shares of Caterpillar have traded hands with an average P/E ratio of about 15 times earnings; although this did include periods such as 2016 when earnings collapsed, while the share price held up much better. Still, given the company's growth prospects and overall quality, we view 15 times earnings as a reasonable starting place. With the current valuation near 20 times underlying earnings power, this implies the potential for a valuation headwind.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	42%	23%	22%	40%	42%	65%	90%	45%	30%	34%	52%	44%

Caterpillar's dividend payout ratio has moved up and down throughout the last couple of years, which is not surprising as the company's profits were quite cyclical. In 2018, the significant increase in Caterpillar's earnings-per-share allowed the payout ratio to decline substantially. Due to the fact that the payout ratio rose above 100% during the last financial crisis, we view the dividend as somewhat risky, even though Caterpillar did not cut its dividend during this time.

Qualitatively, Caterpillar is one of the largest players in the markets it addresses, with a brand that is well-known and recognized around the globe. The fact that Caterpillar has a global presence and is selling its products to several industries (construction, mining, etc.) makes it less dependent on any single market. That being said, during global economic downturns, Caterpillar's business can be hit hard. This was illustrated during the last recession, when EPS declined by 75% between 2008 and 2009. We expect significantly lower results this time around as well.

Final Thoughts & Recommendation

After being up 15% in our last report, shares are up another 19% in the last three months. Caterpillar is a leader in its industry, with volatile earnings. Total return potential comes in at 4.8% per annum, stemming from 8% growth and a 2.6% starting dividend yield, offset by the potential for a valuation headwind. We are cautious on the cyclical nature of the business, especially today. While we are less enthused about the higher valuation, shares continue to earn a hold rating.
