Overview & Current Events

CSX can trace its roots all the way back to 1827 when the B&O Railroad was first chartered. From just 13 miles of track, CSX has grown to cover 23 states and more than 20,000 route miles. CSX provides rail, rail-to-truck and intermodal transport services. The company's market capitalization is \$60 billion after another rally in the stock, and it should produce well over \$10 billion in revenue this year.

CSX reported third quarter earnings on October 21st, with revenue coming in slightly below estimates, while profits handily beat consensus. Revenue was down -11% year-over-year to \$2.65 billion, owed to intermodal volume growth that was more than offset by declines in coal and merchandise volumes. In addition, the company saw lower fuel surcharge revenue as fuel prices decreased.

Expenses were also down -11%, matching revenue, and falling to \$1.51 billion. The company's sharp focus on efficiency gains and volume-related cost reductions continue to drive margins in the right direction, even in the face of a very tough operating environment.

Operating income was down -11% as well as revenue and expense declines matched, and operating income came to \$1.14 billion in Q3. CSX's operating ratio came to 56.9% in Q3, even with the year-ago period. Earnings came to \$736 million, or \$0.96 per share, down from \$856 million, or \$1.08 per share from a year ago. We've boosted our estimate for earnings this year to \$3.60 per share after Q3 results.

In addition, CSX added \$5 billion to its existing buyback authorization, and now has a total of \$6.1 billion in total share repurchase authorizations outstanding.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	\$1.36	\$1.67	\$1.79	\$1.83	\$1.92	\$2.00	\$1.81	\$2.30	\$3.85	\$4.17	\$3.60	\$6.07
DPS	\$0.33	\$0.45	\$0.54	\$0.59	\$0.63	\$0.70	\$0.72	\$0.78	\$0.88	\$0.96	\$1.04	\$1.75
Shares¹	1,111	1,049	1,021	1,009	992	966	928	890	860	778	750	650

CSX's earnings-per-share has grown somewhat unpredictably over the past decade as its fortunes are tied to rail volumes and pricing strength, both of which are heavily dependent upon particular industries and economic conditions. CSX stands to gain in the form of modest revenue increases in the coming years, helping to fuel our estimate of 11% earnings-per-share growth annually. The remainder will come from improved operating efficiency leading to higher margins, as well as sizable buyback spending. We see the share count declining in the mid-single digits annually as CSX generates strong free cash flow and puts it to use. We see a path to recovery that has cleared up in the past couple of quarters and believe that CSX's growth will pick up substantially in 2021 and beyond.

Likewise, we see the dividend increasing at roughly the rate of earnings, reaching \$1.75 in five years from today's level of \$1.04. CSX has put buybacks first in recent years but with a much-reduced capex budget as part of its operational

efficiency initiatives, more cash should be freed up for dividend increases. With the payout ratio still very low, CSX has plenty of room to continue its streak of dividend increases while still affording it the ability to buy back stock.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
Avg. P/E	13.2	14.0	12.1	13.6	16.1	15.7	15.5	21.8	16.8	17.2	21.5	16.0
Avg. Yld.	1.8%	1.9%	2.5%	2.4%	2.0%	2.2%	2.6%	1.6%	1.4%	1.3%	1.3%	1.8%

CSX's price-to-earnings multiple has moved higher once more as the share price and earnings have moved in different directions and is now 21.5 times our expectation for 2020 earnings. This is well in excess of our estimate of fair value of 16 times earnings, so we continue to see a sizable headwind to total returns from the valuation moving forward.

We see the yield moving up to 1.8% over time from the current 1.3%, stemming from a higher dividend and lower valuation. The dividend was raised from \$0.96 to \$1.04 for 2020.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	24%	26%	30%	32%	33%	35%	40%	34%	23%	23%	29%	29%

CSX's payout ratio remains low and as a result, is well covered. The company has experienced high rates of earnings growth in recent years, so the payout ratio has fallen as a result of earnings rising, not because the company cannot afford to pay its dividend. Indeed, its dividend safety is outstanding, but we note that the company has made it clear buybacks take priority over dividend growth.

The company's competitive advantage is in its lean operating structure, as well as its dominance in its service area. CSX looks poised to gain from its leverage to intermodal transport and the coal export market, although these things will not save it from recessions; rail operators are particularly sensitive to economic conditions and we see that as the key risk to owning CSX in the coming years, particularly in light of the pandemic. That weakness should be temporary, though.

Final Thoughts & Recommendation

In our view, CSX is still trading above fair value. It could see total annual returns in the next five years of 6.1%, consisting of the low current yield, 11% earnings growth and a meaningful headwind from the valuation. CSX could therefore be appropriate for dividend growth investors as well as those seeking growth, but the low current yield would make it unattractive for those seeking current income. In addition, the valuation has kept CSX out of value stock territory once again. However, we are upgrading CSX from sell to hold on the improved earnings recovery outlook.
