Overview & Current Events

Microsoft Corporation, founded in 1975 and headquartered in Redmond, WA, develops, manufactures and sells both software and hardware to businesses and consumers. Its offerings include operating systems, business software, software development tools, video games and gaming hardware, and cloud services. Microsoft's market capitalization is now \$1.6 trillion, compared to annual underlying earnings power of ~\$50 billion.

On September 15th, 2020 Microsoft declared a \$0.56 quarterly dividend, marking the 19th consecutive yearly increase.

On October 27th, 2020 Microsoft reported Q1 fiscal year 2021 results for the period ending September 30th, 2020. For the quarter, the company generated revenue of \$37.2 billion, representing a 12.4% increase compared to Q1 2020. The growth was across the board with Productivity and Business Processes, Intelligent Cloud and Personal Computing growing 11%, 20% and 6% respectively. Azure, Microsoft's high-growth cloud platform, grew by 48% year-over-year, showcasing Microsoft's strong position in this ever-growing market. Operating income came in at \$15.9 billion, representing a 25% increase. Net income totaled \$13.9 billion, a 30% increase, while earnings-per-share equaled \$1.82 compared to \$1.38 previously.

Microsoft also provided a Q2 fiscal 2021 outlook, anticipating revenue to be in the \$39.5 billion to \$40.4 billion range.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$2.69	\$2.72	\$2.65	\$2.63	\$2.65	\$2.79	\$3.08	\$3.88	\$4.75	\$5.76	\$6.75	\$9.92
DPS	\$0.64	\$0.80	\$0.89	\$1.12	\$1.24	\$1.44	\$1.56	\$1.68	\$1.80	\$1.99	\$2.24	\$3.45
Shares¹	8,376	8,381	8,328	8,239	8,027	7,808	7,708	7,677	7,643	7,683	7,600	7,500

After years of solid growth, Microsoft had a hard time growing its profits during the 2011 through 2015 timeframe. After some change-up in its management and a strategic shift towards cloud computing and mobile, Microsoft's growth has been reinvigorated. Growth rates for revenues and especially for profits have been compelling during recent years.

Microsoft's cloud business is growing at a rapid pace thanks to Azure, which has been growing tremendously for a few years. Microsoft's Office product range, which had been a low-growth cash cow for many years, is showing strong growth rates as well after Microsoft has changed its business model towards the Office 365 software-as-a-service (SaaS) system. Due to low variable costs, the impact of operating leverage will allow Microsoft to maintain an earnings growth rate that is higher than the revenue growth rate for the foreseeable future. Buybacks are an additional factor for earnings-per-share growth, although this form of capital allocation becomes less attractive with an elevated valuation.

The markets Microsoft addresses continue to grow, with cloud computing being the most compelling one of these markets. This means that even without any market share gains Microsoft will most likely be able to grow its top line. Thanks to rising margins and a declining share count, Microsoft's growth outlook over the coming years looks quite compelling. Longer-term, from 2008 through 2019, Microsoft was able to grow its earnings-per-share by 8.8% annually. This is in-line with our anticipation, 8% annual growth, even taking into consideration the current COVID-19 pandemic.

¹ In millions.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	9.6	10.4	11.2	14.0	17.0	18.1	20.2	22.1	23.7	27.4	30.4	22.0
Avg. Yld.	2.5%	2.8%	3.0%	3.0%	2.7%	2.9%	2.5%	2.0%	1.6%	1.3%	1.1%	1.5%

Microsoft is marked by a number of very distinct valuation periods. In the 1990's and early 2000's, it was not uncommon to see shares trade north of 30- or 40-times earnings. From 2003 through 2008 shares regularly traded in the 20 to 25 times earnings range. From 2009 through 2014 a 10 to 15 multiple was typical. And lately, 20 times earnings and above has once again become the norm as growth has picked up extensively. Our view is that an above average multiple is warranted for the business, especially considering the strong balance sheet, but not something that approaches 30+ times earnings. From this point we are forecasting a meaningful headwind on the valuation front, using 22x as fair value.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	24%	29%	34%	43%	47%	52%	51%	43%	38%	35%	33%	35%

Microsoft has been a solid income investment throughout the last decade. The dividend payout ratio has never risen substantially above 50%, and the fact that Microsoft owns one of the strongest balance sheets in the world means that the dividend is very safe. However, the below-average yield makes Microsoft less suitable as an income stock today.

Microsoft has a great moat in the operating system & Office business units and a strong market position in cloud computing. It is unlikely that the company will lose market share with its older, established products, whereas cloud computing is such a high-growth industry that there is enough room for growth for multiple companies. Microsoft has a renowned brand and a global presence, which provides competitive advantages. The company is relatively resilient against recessions, and its AAA-rated balance sheet makes it a low-risk business.

As of the most recent quarterly report Microsoft held \$138.0 billion in cash and securities, \$177.1 billion in current assets and \$301.0 billion in total assets against \$70.1 billion in current liabilities and \$177.6 billion in total liabilities.

Final Thoughts & Recommendation

Shares are up marginally since our last update. Microsoft had been a low-growth cash cow throughout the majority of the last decade, but a focus on cloud computing and mobile has reinvigorated Microsoft's growth. However, we believe intermediate total return potential, 2.6% annually, is limited as the 8.0% anticipated growth rate and 1.1% starting dividend yield could be largely offset by the potential for a meaningful annual valuation headwind. Even though Microsoft the business looks strong, we are not compelled by the valuation and continue to rate shares as a hold.
