Overview & Current Events

In 1905, William Pigott, Sr. founded Seattle Car Mfg. Co, focusing on railway and logging equipment, which would later become Pacific Car and Foundry Company and eventually PACCAR Inc. Today PACCAR designs and manufactures light, medium and heavy-duty trucks under the Kenworth (U.S., Canada, Mexico & Australia), Peterbilt (U.S. & Canada) and DAF (Netherlands, Belgium, Brazil & UK) nameplates. In addition, the company provides financial services, information technology, and distributes truck parts related to its principle business. PACCAR, a \$31 billion market cap business with 28,000 employees, generated \$24 billion in revenue and earnings of \$2.4 billion last year.

On October 20th, 2020 PACCAR released Q3 2020 results for the period ending September 30th, 2020. For the quarter PACCAR generated \$4.94 billion in sales compared to \$6.37 billion in Q3 2019, as the company continues to deal with uncertainty related to the COVID-19 pandemic. Truck sales were down -29.6%, while Part sales were up 1.5% and the Financial Services segment was up 9.6%. Net income equaled \$385.5 million (\$1.11 per share) compared to \$607.9 million (\$1.75 per share) in the year ago period. PACCAR delivered 36,000 trucks during the quarter compared to 49,300 in Q3 2019. For the first nine months of 2020 PACCAR has delivered 92,500 trucks compared to 153,100 for the first nine months of 2019.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	\$1.25	\$2.86	\$3.12	\$3.30	\$3.82	\$4.51	\$3.85	\$4.26	\$6.24	\$6.87	\$4.00	\$5.88
DPS	\$0.69	\$1.30	\$1.58	\$1.70	\$1.86	\$2.32	\$1.56	\$2.19	\$3.16	\$3.58	\$1.28	\$2.94
Shares¹	365	357	353	354	355	351	351	352	347	346	348	345

PACCAR has an irregular dividend schedule: paying four regular quarterly dividends throughout the year and then supplementing this with a special dividend at yearend. The company has followed this practice for every year in the last two decades except for 2009. This method makes sense from a business prospective - only paying what you can afford instead of arbitrarily trying to bump up the payout - but you don't see it occur in practice very often. With that in mind, we are not yet forecasting a special dividend this year due to the COVID-19 uncertainty.

PACCAR operates in a needed industry: roughly 70% of total U.S. freight is hauled by truck, and the company currently supplies about a third of the heavy-duty market in the U.S., Canada, and Mexico. When economic times are good, the business is well positioned to capture its fair share of demand. Moreover, the company's focus on owner-operators instead of large customers with pricing power has proven to be an advantage thus far. Further, the company's brands command a premium.

Of course, that is not to suggest that the company does not face risks, especially as it relates to closing facilities in the past and the potential for this to occur again. The business is largely cyclical already - depending a great deal on general economic progress - and the crisis has exacerbated this inherent risk. We are using \$4 in estimated earnings-per-share this year, to go along with an 8% intermediate-term growth rate.

¹ In millions.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
Avg. P/E	35.8	16.0	13.5	16.1	16.6	13.3	14.5	15.9	10.5	10.3	22.5	14.0
Avg. Yld.	1.5%	2.8%	3.8%	3.2%	2.9%	3.9%	2.8%	3.2%	4.8%	5.1%	1.4%	3.6%

Absent the most recent recession, shares of PACCAR have traded hands with an average P/E ratio of about 14 times earnings. While earnings-per-share had risen dramatically through 2019, we expect a significantly down year for 2020 and are more comfortable with the average earnings multiple. With shares trading near 23 times our reduced earnings expectation, this implies a significant valuation headwind, which is somewhat offset by an artificially high growth rate.

PACCAR pays a special dividend every year, but we are not currently including that in this year's forecast. If conditions improved this could be back on the table again, but we are not yet ready to make that leap considering the liquidity requirements that could be necessary during a recession. The company targets a 45% to 55% payout ratio, which we expect to continue in a normalized environment.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	55%	45%	51%	52%	49%	51%	41%	51%	51%	48%	32%	50%

PACCAR currently enjoys a competitive advantage in offering a premium product to owner-operators. This has served the company exceptionally well in the past. Moving forward this advantage is less certain, as PACCAR will face economic cyclicity and the possibility of consolidation via autonomous vehicles. Both of which could hit its core customer.

The company's last recession performance – generating earnings of \$2.78, \$0.23, \$1.25 and \$2.86 in 2008 through 2011 – is noteworthy. It shows just how far earnings can fall during lesser times, but also gives you some insight into the resilience of the business. Also noteworthy is PACCAR's record of 81 consecutive years of net profit (the last recession was close) and paying a dividend every year since 1941 (although the lumpiness should still be considered).

PACCAR breaks its balance sheet down into two parts: Trucks, Parts & Other and Financial Services. The Trucks, Parts & Other segment held \$4.4 billion in cash and securities and \$12 billion in total assets against \$5.3 billion in total liabilities. The Financial Services segment held \$15.3 billion in assets against \$11.8 billion in liabilities.

Final Thoughts & Recommendation

After being up 30% in our last report, shares are up 5% in the last three months. PACCAR faces two main risks: poor performance during recessions and autonomous (or otherwise) vehicle disruption. Still, the company has proven to be a quality firm over a business cycle, has a conservative financial stance and a premium product. However, total return potential comes in at 0.7% per annum, stemming from an 8% growth rate and 1.4% dividend yield offset by a meaningful valuation headwind. We believe the business is sound but will face short-term challenges and may generate much lower profits this year. Due to the higher valuation, shares earn a sell rating.
