Overview & Current Events

American Tower, founded in 1995, is one of the world's largest global Real Estate Investment Trusts (REITs). The company specializes in owning, operating and developing multitenant communications real estate, with a portfolio of approximately 181,000 communications sites, in the United States and Internationally. Last year the \$102 billion company generated \$3.5 billion in Adjusted Funds from Operations (AFFO) attributable to stockholders.

On October 29th, 2020 American Tower reported Q3 2020 results for the period ending September 30th, 2020. For the quarter total revenue increased 3.0% to \$2.013 billion, while property revenue increased 3.4% to \$1.988 billion. Net income declined 8.4% to \$463 million. Consolidated AFFO increased 14.7% to \$1.022 billion or \$2.29 per share, as results continue to prove resilient. The company ended the quarter with a net debt to EBITDA ratio of 4.5x.

American Tower also updated its 2020 outlook. For the year the company expects total property revenue of \$7.855 billion to \$7.915 billion (from \$7.655 - \$7.785 billion previously), net income of \$1.855 billion to \$1.905 billion (from \$1.75 - \$1.83 billion prior), adjusted EBITDA of \$5.075 billion to \$5.125 billion (from \$4.89 - \$4.97 billion) and consolidated AFFO of \$3.72 billion to \$3.77 billion (from \$3.63 - \$3.71 billion). This implies ~\$8.34 to ~\$8.45 in AFFO per share this year. We have updated our forecast accordingly.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
AFFO	\$2.10	\$2.42	\$3.24	\$3.42	\$4.57	\$4.45	\$5.81	\$6.72	\$7.59	\$7.90	\$8.40	\$11.24
DPS	---	---	\$0.90	\$1.10	\$1.40	\$1.81	\$2.17	\$2.62	\$3.15	\$3.78	\$4.56	\$6.10
Shares²	399	394	395	395	397	424	427	429	441	446	446	460

Note that we are using consolidated AFFO instead of earnings, as this more accurately captures the underlying profitability of the REIT. American Tower has put together an exceptional record in the last decade, and many of those tailwinds still exist today. The company is well entrenched as a leader in the U.S. market and also has been significantly expanding into International markets. The continued increase in data usage, especially as it relates to International countries "catching up," will be a trend for some time. Moreover, with long-term leases in place, American Tower has good visibility into the future.

On the other hand, there are a variety of risks that could formulate in the years to come. While the COVID-19 pandemic is materially impacting many businesses, American Tower does not see a significant impact to its business yet. Other risks on the horizon could be major carrier consolidation – such as the tie-up between Sprint and T-Mobile – reducing redundant networks and thus American Tower's revenue. Moreover, the evolution of 5G – while promising for consumers – could disrupt the company's macro tower business model. Further, it is becoming harder to grow as the company has a market capitalization over \$100 billion.

Collectively, we are enthused about the business – and the continued trend toward more data usage – but we are somewhat cautious with our assumption of 6% annual intermediate term growth.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
P/AFFO	24.6	24.8	23.8	23.3	21.6	21.7	18.2	21.2	20.8	30.4	27.1	22.0
Avg. Yld.	---	---	1.3%	1.4%	1.5%	1.8%	2.2%	2.0%	2.1%	1.6%	2.0%	2.5%

During the last decade American Tower exchanged hands at an average price-to-AFFO ratio of 23. We believe this premium valuation was warranted due to the fast-growing nature of the business and its high visibility into future leases. Moving forward our growth rate assumption is a bit more cautious, but the same type of visibility still exists. As such, we are using 22 times AFFO as a beginning baseline for our estimate of fair value. At the current quotation, this would imply a moderate potential negative drag from the valuation. This view is underscored by the idea that the share price has doubled in the last few years without commensurate business improvement.

The dividend also warrants special mention. Despite the yield not being particularly impressive, especially for a REIT, American Tower has raised its payout (often substantially) every quarter dating back to 2012.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	---	---	28%	32%	31%	41%	37%	39%	42%	48%	54%	54%

American Tower enjoys a competitive advantage in its leadership in the U.S market. Not only is the company entrenched in the space but switching costs for the company's customers (once equipment is installed) are quite high. Meanwhile, American Tower enjoys economies of scale as it grows larger, with the cost to add additional tenants to a tower being effectively negligible. Further, unlike its U.S. counterparts, American Tower is geographically diversified around the globe. This can increase risk somewhat – for instance with currency translation and working in different operating environments – but it insulates the firm from relying on a single country in lesser times.

As of the most recent report American Tower had long-term obligations of \$24 billion, with net debt to adjusted EBITDA of 4.5x. This leverage is moderately elevated but is offset by the company's long-term leases.

Final Thoughts & Recommendation

Shares are down 12% since our last report. American Tower has performed exceptionally well in the last decade and many of those trends that helped the company previously are still in the process of playing out today. However, the stock price reflects this in our view. We are forecasting total return potential of 3.8% annually, stemming from 6% growth and a 2.0% dividend yield, offset by a valuation drag. Our estimates could be too conservative should growth continue to develop at a faster rate or if shareholders are willing to pay a higher multiple for the security. However, at this juncture we are not willing to make either speculation. Shares earn a hold rating.
