Overview & Current Events

Artisan Partners Asset Management Inc. is a global investment management firm that provides a broad range of high value asset investment strategies across several asset classes. Artisan executed its initial public offering on March 1st, 2013. The company has been a very shareholder-friendly allocator of capital since then, paying special dividends of \$0.95 per share in 2015, \$0.40 per share in 2016, \$0.36 per share in 2017, \$0.79 per share in 2018, and \$1.03 in 2019, in addition to its ample quarterly dividend. Artisan generates \$880 million in annual revenue and trades with a market capitalization of \$3.5 billion.

Artisan reported third quarter earnings on October 27th, 2020 and both the top and bottom lines came in stronger than expected as the company continues its recovery. Assets under management equaled \$134 billion, up from \$113 billion at the end of the year-ago period. The change in AUM was due to \$18 billion in positive investment returns and \$4 billion in net client cash inflows. Average AUM was \$131 billion, up 16% from the year-ago period.

Revenue came in at \$233 million, up \$30 million, or 15%, from the year-ago period. The gain in revenue was primarily attributable to higher AUM, from which the company generates its fees. Operating expenses were \$136 million, up 6% year-over-year due to higher incentive compensation expense, partially offset by lower travel expense as the company shut that down due to COVID-19.

Operating margin was 41.8% of revenue in Q3, up from 37.2% in the year-ago quarter. Adjusted net income was \$71 million, or \$0.90 per share, up from \$55 million and \$0.70 in the same period in 2019. We've boosted our estimate of earnings-per-share to \$3.20 for this year as Artisan is performing extremely well in a rising market environment.

The company also declared an \$0.83 dividend, up 24% from the prior \$0.67. The company said the board will consider a special dividend after the year ends, as is customary for Artisan.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	---	---	---	\$2.54	\$3.17	\$2.69	\$2.13	\$2.41	\$2.94	\$2.67	\$3.20	\$3.71
DPS	---	---	---	\$0.86	\$2.25	\$2.40	\$2.40	\$2.40	\$2.40	\$2.36	\$3.39	\$3.39
Shares³	---	---	---	20	34	39	42	51	54	56	61	72

Artisan has failed to generate meaningful per-share growth since its initial public offering, due largely to a ballooning share count. Because of this, we are hesitant to expect significant growth from the firm moving forward. Our 5-year earnings-per-share growth estimate for Artisan is 3%. Artisan's 2018 performance was quite strong against 2017 but given lower assets under management and operating margins that are moving unfavorably, 2019 earnings-per-share were more in line with 2017 than 2018. We had anticipated weakness in 2020, but Artisan is performing much better than expected and indeed, earnings are soaring thanks to a rising market.

Artisan Partners Asset Management (APAM)

Updated November 24th, 2020 by Josh Arnold

Income investors should note that the dividend figures listed in the above table exclude the numerous special dividends paid by the company since its IPO in 2013. Artisan pays a regular quarterly dividend, but it also pays out significant special dividends annually. The company's policy is to pay out 80% of the cash the company generates. At the end of the year, the board takes into account several factors, and determines a variable special dividend. The 2018 special dividend (paid in 2019) was \$1.03 per share in addition to the \$2.40 in regular quarterly dividends that were paid. For 2019, a \$0.60 special dividend was declared in addition to the variable quarterly dividend that totaled \$2.36 per share.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
Avg. P/E	---	---	---	20.0	17.7	16.1	13.7	13.0	10.9	10.2	14.1	12.0
Avg. Yld.	---	---	---	---	4.2%	5.4%	8.3%	7.7%	7.5%	8.9%	7.5%	7.6%

Like many firms, Artisan traded at elevated levels for some time following its initial public offering. Because of this, we do not believe that the company's historical valuation multiples are indicative of its fair value. Instead, we believe that a fair value for Artisan lies somewhere around 12 times earnings. The company is trading at a price-to-earnings ratio of 14.1 today. With the \$3.39 annual dividend, the stock is yielding 7.5%, excluding any special dividend received this year.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	---	---	---	34%	71%	89%	113%	100%	82%	89%	106%	91%

Artisan's payout ratio had improved significantly thanks to higher earnings but has been increased again by the recent dividend raise. The payout ratio is now 106%, so we see the risk of another cut as reasonably high. Given the high yield, this should hardly be a surprise. We do note that the company was bullish enough to raise the payout in October.

Artisan wasn't public during the last recession, but we expect the damage to earnings could be meaningful. Artisan is a highly cyclical company, so investors looking for safety and defensiveness need to look elsewhere. Adding to this risk, Artisan's competitive advantage of its well-performing funds hasn't resonated with customers.

Final Thoughts & Recommendation

Artisan can be seen as a leveraged play on the equity markets. When markets are rising, the company will benefit from ballooning AUM due to market returns and stronger client inflows. Conversely, the company will likely perform very poorly during a bear market, as it did at the end of 2018. Even with the recent rally, we still expect 6.4% total annual returns thanks to the very high yield, and decent growth outlook. After the Q3 report, we're moving Artisan from buy to hold as the valuation has worsened.
