Overview & Current Events

Artesian Resources Corp. was founded in 1905 in New Castle County, Delaware. Through its subsidiaries, the company provides water, wastewater and other services, primarily in the Delaware region. Artesian Resources sells and distributes water to residential, commercial, industrial, governmental, and utility customers throughout the state. In addition, Artesian Resources provides water for public and private fire protection in Delaware, Maryland, and Pennsylvania. The company produces 7.9 billion gallons of water annually through 1,311 miles of water main with a population of approximately 301,000 served. Artesian has 241 employees, and a market capitalization of \$358.9 million.

On November 4th, 2020, Artesian Resources reported Q3 results. Earnings-per-share have increased by 15% to \$1.46 year-to-date and by 12.5% to \$0.54 in Q3 2020. Revenue also increased by 6.1% year-to-date and 9.7% this quarter. The company has also grown its common stock dividend by 3% this year while also investing \$31.6 million year-to-date in infrastructure. Furthermore, new acquisitions this year added 3,000 people to the number of people served in the Delaware service area.

Fortunately, the company's businesses are essential to their clients so impacts from COVID-19 are minimal.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	\$1.00	\$0.83	\$1.13	\$0.94	\$1.07	\$1.26	\$1.41	\$1.51	\$1.54	\$1.60	\$1.79	\$2.00
DPS	\$0.75	\$0.76	\$0.79	\$0.82	\$0.85	\$0.87	\$0.90	\$0.93	\$0.96	\$0.98	\$1.03	\$1.16
Shares³	7.7	8.6	8.7	8.8	8.9	9.1	9.1	9.2	9.3	9.3	9.3	9.7

Artesian Resources has enjoyed strong growth for a utility. EPS growth over the past decade has averaged just under 5% per year.

That being said, growth has been decelerating in the past four years, and we expect ~2.2% growth over the next five years. Delaware's population growth averages approximately 1% per year, which along with 1%-2% annual price increases, provides a baseline growth rate for the company of approximately 2%-3%. The company can potentially increase this further by offering new services, improving economies of scale, and expanding its area, but growth beyond 4% per year may be difficult going forward.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025

Artesian Resources Corp. (ARTNA)

Updated November 14th, 2020 by Samuel Smith

Due to its stability, Artesian Resources has historically commanded a rather high valuation. Its P/E ratio dropped to under 17 during the previous recession but has often floated over 20 during normal economic times. Currently the P/E ratio is around 20 and its dividend yield is 2.6%, both indicating a roughly fair valuation relative to historical norms.

Low government bond yields across the developed world have resulted in substantial equity premiums for recession-resistant stocks, meaning that even at rich valuations they potentially offer a sizable return premium over safe government bonds. Still, we believe that paying over 20x annual earnings is too rich given the lack of growth potential, and that a P/E of 20 or less for a company with this level of growth and high earnings resiliency is warranted.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	75%	92%	70%	87%	79%	69%	64%	62%	62%	62%	58%	58%

Artesian Resources has a debt/income ratio of approximately 8x, while debt/EBIT is less than 5x. Annual interest expense is approximately 25% of operating income, meaning that the company has an interest coverage ratio of around 4x. The company uses a substantial amount of leverage, but is in line with other utilities on this metric due to their stable, recession-resistant cash flows and large base of assets.

Like most utilities, the company's earnings have historically been very recession resistant. During the previous recession, the company's earnings-per-share declined by 5% in 2007 and declined by a further 7% in 2008. By 2009, the company had recovered to match its 2006 peak earnings and surpassed that peak in 2010. The company operates in a regulated environment with long-term contracts, and its cash flows should be very safe going forward. The company has increased its dividend for 22 consecutive years, although at times the payout ratio was high. Since 1992, the company has had the same CEO, Dian Taylor, who has proven to be an intelligent allocator of shareholder capital.

Final Thoughts & Recommendation

Artesian Resources has been a very successful utility company with a long stretch of consecutive annual dividend increases, and a solid growth rate in an otherwise slow-growing industry.

However, valuations have become very high in the utility sector, and Artesian Resources has not been spared from this. Forward returns are likely to be lower than past returns, as the company's P/E multiple is above its long-term average and its dividend yield is below its long-term average. We expect total returns over the next five years to average approximately 3.1% per year, and therefore consider Artesian Resources to be a sell at the current time.
